The church at Lower Lotts Creek has sustained another great loss in the death of Bro. Remer Dekto, whose sudden taking a way was a great shook. He was killed by a falling tree on the 13, Jan, 1903, which was one of the saddest occurrences that has ever been our lot to witness. He was born Feb. 9, 1858, and was married to Mary J. with these very much higher and safer standards the company is still able to show a surplus of practically \$2,000,000.
Last year the company sectived for interest, premiums, etc. \$5,548,79, and paid back to policy-holders \$2,123,856.
The new insurance written amounted to \$12,850,591, which increased the business in force to \$12,141,815. And since the company began business it has paid back to policy-holders over \$5,00,000,000. The Paris health department has been devoting its leisure time to calculating the number of rats and mice annually kiled in the French capital, and has prepared the following estimate Eighty thousand in the Central markets; 25,000 in the other markets; 120,000 in the abattoirs; 50,000 by the butchers; 300,000 by the grocers; 500,-000 by private individuals; 100,000 by the tanners; 110,000 by rat-catchers, in the sewers, cellars and streets, and 200,000 by various poisons. The professor's conclusion, moreover, that the Aventine Hill were originally the habitations, respec tively, of two hostile tribes coincides in the main with that reached by Professor Mommsen a generation ago What is new in Professor Airoli's theoretical reconstruction of the earliest period of Roman history is the identification of the nationality of these tribes, says the Philadelphia Record. From measurements of skulls found in the burial places of these ancient Romans he feels authorized to say that the early hillsmen were Etruscans, while the lowlanders were Sabines. Romulus, who enforced peace between the rival tribes by his victory over the Sabines, would appear to have been king of the Etruscan city on the Aventine; and he did not give his name to, but derived it from the city. The proverbialism that Romulus had to be invented to account for Rome seem thus to express the reverse of the

The keen interest felt in this new legislation, which, it is hoped, will promote peace and contentment in Ire-land, was shown by the crowded buse. Why you should insure in the

NATIONAL LIFE OF THE U.S A.

BECAUSE it is the only National Life Insurance Company incorporated by Congress.

BECAUSE it has \$1,000,000,000 Capital Stock all paid in.

BECAUSE it is 34 years old and never contested a just claim. BECAUSE its premium rates are low, and guarantees high.

BECAUSE it will sell you a policy with every figure warranted. BECAUSE it has a larger percentage of Surplus than any other leading company.

BECAUSE it has more Assets in proportion to its outstanding insurance than any other leading company.

BECAUSE it has more surplus in proportion to its insurance liability than any other leading company in the world, which means that the Stockholders put up more money to guarantee the payment of its claims than any other leading company. BECAUSE it sells you a policy that guarantees to be paid up in full in 15 years for a less

annual premium than some companies charge for a 20 Pay Policy. Why Agents Should Represent The

NATIONAL LIFE OF THE U. S. of A.

BECAUSE its managers belong to no association or compact, and are at liberty to and do pay better commissions than any other leading companies doing business in

BECAUSE its managers pay the same commission on all kinds of policies. They do not reduce the commission on Stock rate and cheap insurance in order to force the

agent to sell to the people the higher priced policies. BECAUSE the Company has just begun to develop the Southern territory, and furnishes better chances for promotion than a company already established.

BECAUSE our policies absolutely guarantee the results, and are sold at prices that come within the reach of all. If you want to know more "reasons why" you should take a Policy or an Agency, Address,
