The Statesboro News

(INCORPORATED.)

J. R. MILLER, Editor and Genl. Mgr.

Entered at the post office at Statesboro as 2nd. class mail matter.

Published Tuesdays and Fridays by THE STATESBORO NEWS PUBLISHING COMPANY.

The News gets there with the news before the other fellow wakes up.

The cold wave was a pretty hard blow at prohibition. So many New Year's resolutions being broken using the wave as an excuse.

Boost the factory idea. We must have a cotton factory before 1909 leaves us.

Three times a week for only a dollar a year. The fellow who could turn down a proposition like that wouldn't give ten cents for a guarantee of a bountiful supply of ice in the great hereafter.

Mrs. Lula Folsom widow of the late editor of The Tattnall Journal announces that she will run the paper. Some of the brightest weeklies in the country are run by women, and we predict success for the Journal.

The old war has broken out again between Jacksonville and Savannah. There seems to be no ground "gum" to go around.

The cold wave will prevent the Georgia Taft boom from being put on sold store.

We wonder where all these cold winds were last August.

The Savannah Press thinks that Charleston is a little uppish because she refuses to ask a "Crum" of the present administration. Savannah has her Devereaux and is satisfied because she has to be.

It is said that a mule was found beneath the ruins of Messina quietly feeding, we will wager that he was a "Georgia mule," but where was the darkey?

The Savannah Press allows that "Little Joe Brown" is a big man after all.

Gunby Jordan hints that he will tackle "Little Joe" for his second term. It may be that history will repeat itself and it may be that it will not. Watch and see.

The fellow who says "every man his price" is only waiting for a bid.

If the cold wave reaches very far down in Florida, oranges will become a luxury the rich only can afford.

The Californian who rushed in to print to say that the preachers were the meanest men on earth had probably been fired from some church for his own devilment.

Thinks This a Great Section

Mr. W. F. Masters who is here talking washers has written a letter to his home paper at Clinton Mass., telling of the good points of this section, the letter is reproduced in this issue. Mr. Masters states that there were hundreds of people in the North who would be glad to come South and make investments. He knows of one party who would like to come here and establish a dairy farm, others are ready to put capital in manufacturing and he believes if they were to come here and investigate they would see the advantages of this favored section and locate with us.

Get a sack of Fertilizer prepared especially for gardens—made by Bulloch Oil Mills and put up in 100 lb. bags.

Our garden fertilizer will give you satisfaction—try our 100 pound bags. Bulloch Oil Mills.

Three-Times-A-Week.

Commencing with this week The Statesboro News will be issued three times a week instead of two times as heretofore. We will go to press in time to catch all the mails leaving here on the morning of publication viz: Tuesday, Thursday and Saturday reaching our subscribers every other day. Subscribers at Statesboro and the seven routes leading out from Statesboro all points over the line of the Savannah & Statesboro railway including the routes, Blitch, Blitch route and Portals, Rocky Ford and route, Scarborough and route, Garfield and route, Graymont and route, Clito, Cameron, Egypt, Millen, Savannah, Macon, Atlanta, Jimps and route, Register and route, Pulaski and route, Parrish, Metter and route, Pembroke, Groveland, Daisy, Claxton, Hagan and other railroad points will be reached on the day of publication. Subscribers on the routes leading out from Metter, Jimps, Pulaski, Haledonville, Ellabelle, Pembroke, Groveland, Claxton and elsewhere should get the paper next day, and should any of our subscribers miss getting the paper we will send them to let us know. Specifying what issue they missed, don't tell us that you fail to get your paper regularly as that is too indefinite a complaint for the postal authorities to trace.

Remember we print and mail a paper to every name on our subscription list and do it regularly and promptly. We pay the postal authorities the postage on them and they will trace down any neglect of their employees. It is our intention to make it hot for those who handle our paper and fail to do their duty. If you get your mail in a box with one or more other parties it will be useless for you to complain to us for the chances are ten to one your neighbor who divides your box with you also divides the use of your paper instead of subscribing for it himself. We find as a rule those who do not take the paper keep about as well posted on what is in it as do those who subscribe for it. They make a practice of using their neighbor's paper.

We have arranged for a telegraphic news service in plates. A farmers paper, live stock, poultry farm notes, etc. In addition to this we will publish promptly all the local news up to the hour of going to press, giving you the news while its news. We will give you such a service as no other paper is doing between Macon and Savannah and will therefore be compelled to ask you to pay for it promptly. We cannot and will not send the paper to anyone who does not pay for it. We expect to discontinue the paper sent to some of our best friends if they do not settle for it. The fact that we have put so much expense in the production of the paper is the only reason we have for enforcing this rule. There is no sentiment about this affair, its cold blooded business. The cashiers of the banks take our best friends in fact all of them are stockholders in the News, but there is no spirit we have put to them that will pull the bill of lading through the window that holds the shipment of paper on which your's is printed except the cold cash. They like us but the money has to come or the paper remains in the railroad station, that is what we call cold blooded business.

We are going to make an effort to merit your patronage by giving you more than your dollar's worth. We assure that a three-a-week paper is necessary in a community where we have to come in competition with all the big dailies to a certain extent, of course we do not expect everybody to take it, there are those who had rather have a once-a-week than a three-a-week. Fortunately they can be accommodated. There are those who don't like us because we have not walked in the narrow path of their way of thinking. Those who don't like us because we have stood by our town and county, and last but not least those who dislike the fact that we insist on being paid

for what we send out. Fortunately all those who don't want to patronize the only paper that prints three-times-a-week can be accommodated elsewhere, but we feel assured there are thousands who will appreciate our efforts will come up and give us a helping hand that we may give this county and section a first-class three-times-a-week newspaper such as no other rural county has in this state.

In sickness, if a certain hidden nerve goes wrong, then the organ that this nerve controls will also surely fail. It may be a stomach nerve, or it may have given strength and support to the heart or kidneys. It was Dr. Shoop that first pointed to this vital truth. Dr. Shoop's Restorative was made to do the stomach or to temporarily stimulate the heart or kidneys. That old-fashioned method is all wrong. Dr. Shoop's Restorative goes directly to these failing internal nerves. The remarkable success of this prescription demonstrates the wisdom of treating the actual cause of these failing organs. And it is indeed easy to prove. A simple five or ten days test will surely tell. Try it once, and see! Sold by W. H. Ellis.

HOW'S THIS.

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Dr. Hall's Catarrh Cure. F. J. CUREN & Co., Toledo, O. We, the undersigned have known F. J. CUREN for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him.

WATKINS, KIRWAN & MARVIN, Wholesale Druggists, Toledo, O. Dr. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all Druggists. Take Hall's Family Pills for constipation.

Loan Co's. Successful Year The annual stockholders meeting of the Statesboro Building and Loan Association was held on yesterday in the office of Col. J. E. Brannen, and after a dividend of twelve per cent was declared and paid the following new board of officers were elected to serve the ensuing year.

President: Remer Proctor, Secretary and Treasurer: B. A. Trapnell. Board of directors: R. L. Durrance, A. F. Michael, J. W. Franklin, A. J. Mooney and W. B. Martin.

There is not any better Salve than DeWitt's Carbolized Witch Hazel Salve. We hereby warn the public that we are not responsible for any injurious effects caused from worthless or poisonous imitations of our DeWitt's Carbolized Witch Hazel Salve, the original. It is good for anything when a salve is needed, but it is especially good for piles. Sold by W. H. Ellis & Co.

Two Good Pigs.

Dr. A. J. Mooney killed two pigs on yesterday that tipped the scales at 842 pounds. The doctor is a great farmer as well as a good physician. All his friends hereabouts are proposing to pay him a visit when liver pudding and sausage get ripe.

Group positively stopped in 30 minutes, with Dr. Shoop's Group Remedy. One test alone will surely prove this truth. No vomiting, no distress. A safe and pleasing syrup—Sold by W. H. Ellis.

Pension Checks Ready.

All veterans entitled to a pension will please call at my office for their check. Same is now ready awaiting your call, S. L. Moore, Ordinary.

Indigestion or dyspepsia is inability of the stomach—weak digestive juices—to digest what you eat. Kindred combinations of all the natural digestive juices found in an ordinary healthy stomach, and it will digest your food in a natural way. Pleasant to take. Sold by W. H. Ellis & Co.

Mr. R. Simmons returned home on Sunday, after a visit of ten days in Hawkinsville.

Get a sack of Fertilizer prepared especially for gardens—made by Bulloch Oil Mills and put up in 100 lb. bags.

Mr. T. B. Moore had the misfortune to have his teeth frozen during the blizzard. He had laid them aside in a tumbler of water is the reason they froze.

GENERAL AWAKENING OF THE SOUTH.

MANUFACTURERS' RECORD REPORTS NEW DEVELOPMENT IN SOUTHERN STATES.

Baltimore, Jan. 25.—The list of new enterprises and improvements reported during the week includes among many things the following, which are noted as indicative of the tendency to greater activities: The Woodlawn Mills, Greenville, S. C., will add 25,000 spindles and 700 looms at a cost probably of \$500,000; the Keeler Manufacturing Co., Salisbury, N. C., is to spend \$200,000 for enlargement of its cotton mill; the Southern Spinning & Manufacturing Co., Zebulon, N. C., will build a 5,000 spindle mill; the Mooresville Cotton Mills, Mooresville, N. C., has increased its capital stock from \$200,000 to \$400,000; the Maximus Metals Corporation has been organized at High Hill, Va., with capital stock of \$3,000,000 to develop copper and other mineral deposits; Washington, Okla., is organizing for the company to build a Portland cement plant with a daily capacity of 3,000 barrels; Oklahoma Publishing Co., of Oklahoma City, has awarded contract for reinforced concrete printing plant and office building to cost \$140,000, not including printing equipment, which will be about \$30,000; the Southern Cotton, Pulp & Paper Co., of Atlanta, Ga., which proposes to manufacture paper out of cotton stalks, is planning to build its first mill at a cost of about \$75,000.

Country's Best Skaters in Meet. Pittsburgh, Jan. 25.—Tonight and tomorrow night the best amateur skaters of the United States and Canada will contest in Duquesne Gardens in this city, the largest indoor skating rink in America, for the championship of the two countries.

Chief among the entries is Edmund Lamy, the eighteen-year-old wonder on runners who is the present amateur champion. He is frequently called "the Saranac Lake whirlwind," and reports from this winter than ever before. Clarence Grover, the New York speedster, with his club mate, Phil Kearney, of the Wanderers; Lot Reo, amateur champion of Canada; Anderson, champion of Illinois, and many others will help to make skating history on the two nights of the meet.

This is McKinley Day. Washington, Jan. 25.—The birthday of William McKinley, late president of the United States, which occurs today, will be commemorated with appropriate exercises by the patriotic societies of the national capital. Mr. McKinley was born Jan. 29, 1843.

Next Sunday evening a memorial sermon on "William McKinley, the Man, the Soldier, the Citizen, President and Christian," will be delivered by Rev. Dr. Woodrow in the First Congregational church. Many of the attendants at today's exercises will hear the sermon.

Marriage and Divorce in U. S. Washington, Jan. 25.—The bulletin on marriage and divorce, just compiled by the bureau of the census, contains some astonishing detailed information with regard to divorces, tabulated by states, causes of divorces and the parties to which granted.

During the twenty-year period a total number of marriages recorded was 19,829,044. The same period the number of divorces was 948,625. In other words, one marriage out of every thirteen contracted during this period terminated in the divorce court.

Cotton Experts to Meet.

Washington, Jan. 25.—The personnel of the committee of expert cotton classifiers, which will meet here on February 1 to establish an official standard for the various grades of cotton, in conformity with an act of congress, was announced today by Secretary of Agriculture Wilson.

Dr. Bull Goes to Savannah. New York, Jan. 25.—Dr. William T. Bull, the well-known surgeon, whose illness and gradual betterment from a condition which, because of cancerous complications, long seemed hopeless, will leave this city for Savannah, Ga., today. Mrs. Bull and three physicians will accompany him.

\$50,000 Offered for Tuberculosis Cure. Harrisburg, Pa., Jan. 25.—A bill introduced in the lower house of the legislature yesterday provides for the payment by the state of \$50,000 as a reward to the man who first succeeds in discovering a cure for tuberculosis.

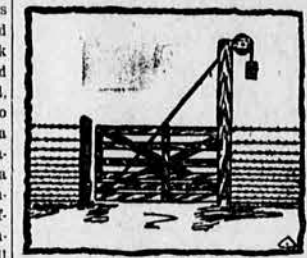

Jury Disagrees in Night Rider Case. Union City, Tenn., Jan. 25.—After being out for sixteen hours the jury in the Ed Marshall night rider trial reported yesterday morning that they could not agree on a verdict.

Farm and Garden

A RISING AND FOLDING GATE.

Easily Constructed, Inexpensive and Operated by a Balance Weight.

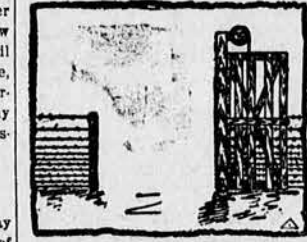

A gate that will rise or fold has its advantages. One may be constructed without much expense. The gate should be braced both ways and made of good, clear lumber. The balance weight may be hung with a wire rope or a one-half inch cotton rope. However, if cotton, hemp or sisal is used the rope should have close attention, that it does not in some manner become worn or cut. The weight may be made in several ways, the best and least expensive perhaps being a slim galvanized iron bucket.

THE GATE WHEN CLOSED.

It may be filled with gravel, etc., until the gate is slightly the heavier and so that a slight pull will cause it to fold back in place.

It may be necessary where unrunly soil is kept to set two posts for the gate to shut between. In order to keep the weight from rubbing through the ordinary fenceposts, or they may be full length, but in either case they should be set well into the ground. The grooved wheel over which the rope works may be secured from almost any pile of old scrap iron, or, if one cannot be found, make it of wood by sawing three wheels and having the wheels slightly smaller than the axle. Nail them together, with the small wheel in the center. This forms a flange that will hold the rope in place. The gate may be constructed to lift straight up by setting long posts on

GATE OPENED BY WEIGHT.

both sides and using two weights. But there is no advantage, and it is more expensive, also rather dangerous, as a slight weight sometimes form on the gate and add so much to its weight, and in falling these gates have several times injured both animals and men.

Country News and Views.

The government is developing the Morgan horse at the breeding establishment at Waybridge, Va. The American mule is said to be worth \$416,820,000, for it is claimed that it is comparatively immune from disease and is not susceptible to contagion.

The Kansas experiment station has realized \$11.90 per acre from rape pasture and \$24.10 from alfalfa pasture in ninety-eight days. These results were obtained from experiments which were begun July 25 and concluded Oct. 31.

To keep up the fertility of the soil it is imperative that the orchards be liberally fertilized with mineral and vegetable fertilization is necessary. A crop of apples will remove considerably more potash from the soil than will a crop of wheat. To produce trees require large quantities of both vegetable and mineral matters. Unleached wood ashes are excellent.

Horses that are idle in the winter should not be fed much feed that is rich in nitrogen—as, for instance, clover hay. If a horse does not receive regular exercise he cannot assimilate such feeds, and consequently the system becomes clogged and the disease known as asztoria takes place. Horses to keep in good condition should have daily work or exercise.

Method For Curing Hams. The following method of curing hams and bacon has been used in a Missouri family for many years: For an eighteen or twenty pound ham mix a desertspoonful of saltpeter with one-fourth or one-third pound of brown sugar and rub well into the flesh side of the ham. Pack in tubs or boxes and cover the flesh side well with fine salt. Allow the meat to remain in the boxes from four to six weeks. Small hams or pieces may be cured in four weeks' time. Lift out and rub all salt off and cover well with good ground black pepper. Be sure to put plenty of pepper around the bone. Let hang for two or three days to dry and smoke for six or eight weeks. You will not only have very fine flavored meat, but it will not have to be bagged. To make Mississippi sausage take eight pounds of lean tenderloin, five pounds of back-bone fat, four teaspoonfuls of black peppers, two teaspoonfuls of salt, one teaspoonful of cayenne pepper, seven teaspoonfuls of sage. Grind twice and mix well.

The United States consumes annually white paper which makes a solid roll 830 feet high and 377 feet in diameter and weighs approximately 2,700,000 tons. To produce it requires \$8,800,000 worth of raw materials, 10,000 of waste paper and \$20,800,000 of wood pulp, besides other essential materials.

On some of the irrigated lands of the western states as high as eight and a half tons of alfalfa hay are grown per acre yearly under irrigation. A feature that adds much to the value of the crop is that ideal weather conditions usually prevail for the curing and securing of the hay. Three and sometimes four cuttings are secured yearly from established fields.

It is worthy of mention that L. R. Clure of Indiana, who carried off sweepstakes prizes at the national corn show at Omaha on best ten ears and best bushel of corn, owns a farm of about 675 acres in the north-west section. He has probably come to the conclusion, to which some others come sooner or later, that a fellow can't spread himself or his operations over all creation and amount to much in any one spot.

The total value of the agricultural products in the United States for the year just closed is placed at \$28,000,000,000, of which grand total \$1,750,000,000 was raised in the cornfields of the country. It is not surprising in the face of such figures that hard times cannot stay for long or that the export trade of the country is far in excess of the import. The production of this enormous volume of new wealth directly from the soil means a national prosperity in which every citizen will share.

Those in charge of the farm crops section of the Wisconsin experiment station feel justly proud of the showing which they have made in the past five years in the matter of developing the Odebrucker type of barley. In the interval mentioned they have been able to increase the yield of this variety nearly ten bushels per acre. A test shows that the new barley contains 15 per cent of protein, which not only means that it is the best grain for malt, but for feed as well. So well has the new barley been advertised and so effectively has it been introduced that the past year it comprised one-third of all the barley grown in the state. Its remarkable vigor and productivity are shown in a yield of sixty bushels to the acre on one of the station fields of fifty-five acres, and this not an experimental plot.

Wenatchee (Wash.) apple growers are feeling pretty good over the results of the national apple show held recently at Spokane, in which they carried off better than 75 per cent of the prizes. Among the prizes were one of \$1000 awarded by the National Apple Growers' association for the best crop of apples, a number of minor prizes, ranging from \$25 to \$500, and first prize for the largest perfect apple, which weighed thirty-one ounces. One of the finest displays of apples at the recent horticultural congress at Council Bluffs, Ia., was exhibited by the Wenatchee Fruit Growers' association, the size and beauty of the fruit being almost beyond description. The Wenatchee people seem to be exceptionally well situated for fruit raising and from appearances are making the most of their opportunities.

Recent figures made public by the bureau of statistics at Washington show that during the year 1901 the total consumption of sugar in the United States was 7,089,655,975 pounds, which means that each American consumed on the average eighty-six pounds, or about three times as much as half his own weight of the sweet stuff. Of the total amount of sugar consumed 21.7 per cent was produced at home, 17.7 per cent was brought from our island possessions, while the remaining 61 per cent came from foreign countries. An interesting feature of the report is that for the first time in the history of home sugar production the output of best sugar exceeded that of cane, the figures being 967,000,000 pounds of the former to 544,000,000 of the latter. During the past twenty years the world's sugar production has nearly doubled, the total for last year being 32,000,000,000 pounds.

One of the interesting and also inspiring features of the big Omaha corn show was the presence there of Senor Zefelino Dominguez, a wealthy ranchman and agriculturist who lives at Puebla, Mexico. He was in charge of the Mexican exhibit, mostly of his own furnishing, and gave practical proof of his interest in progressive agriculture by donating the splendid \$1500 trophy, a solid silver bust of President Diaz, mounted on a handsome carved onyx pedestal, for the Kansas making the best record in corn judging. Not only this, but the senator has 3,500 acres of fine land on which he is working out the experiments in seed selection and plant breeding and securing much the same results as are obtained by American experiment stations. His generous attitude is still further shown in the time and energy which he is devoting to get the results of his own and American experiments in tangible shape—lectures and photographs—so as to better the agricultural conditions of his poorer, less educated fellow countrymen. Visitors at the corn show were privileged to hear an address from Mr. Dominguez which was direct and practical, gave warm commendation of the progress of American agriculture and exhibited with a kindly and generous spirit. Mexico is fortunate in having such a citizen.

Most cough cures are constipating, because they contain opium, and you should be careful to take something that does not tend to constipate. You should take Kennedy's Laxative Cough Syrup. It not only allays inflammation and irritation of throat and lungs, but it drives out the cold from the system by a free yet gentle action on the bowels. Children like the pleasant taste that is so orderly like maple sugar. Sold by W. H. Ellis & Co.

Highest market price paid for chickens and eggs. The Racket Store.

Mad Dog Run Amuck.

The neighborhood of Arcola, Stilson and Hubert were disturbed one day last week over the fact that a mad dog was at large.

The dog was the property of Mr. J. M. Merett who noticed something wrong and confining him in his garden believing the dog was all right. Mr. Merett turned him loose. He started out spreading terror in his wake, the inhabitants of Arcola were pretty badly frightened, than the dog appeared at the gate of Mr. P. C. Richardson making an attempt to bite him and one or two other member of the family who barely escaped into the house, the dog then ran off next attacking Mr. Tillis Brannen who succeeded in fighting him off, having no gun with him he allowed the dog to escape, going all over the community biting and snapping at everything he met, a large number of dogs were bitten and other stock but fortunately nobody was bitten. The dog was finally killed by Mr. E. H. Robertson of Hubert but not before he had terrorized the country for several miles.

The Secret of Long Life. A French scientist has discovered a secret of long life. His method deals with the blood. But long ago millions of Americans have proved Electric Bitters prolongs life and makes it worth living. It purifies, enriches and vitalizes the blood, rebuilds wasted nerves, cures impurities and tones up the entire system. It is a godsend to weak, sick and debilitated people. "Kidney trouble had blighted my life for months," writes W. M. Sherman, of Cushing, Me., "but Electric Bitters cured me entirely." Only 50c. at W. H. Ellis & Co.

Heavy Shipment of Fertilizer.

The largest shipment of fertilizer ever shipped into this county came in on the Central yesterday. It was a full train of thirty cars consigned to Register. The goods were shipped by the Virginia-Carolina Chemical Co. of Savannah, and sold by Mr. W. L. Street of this city. The order all went in by one mail, and was consigned principally to points in the 44th District.

Naval Stores Men Hard Hit.

Mr. H. M. Robertson one of the prominent naval stores operators of the Brooklet neighborhood was in town on yesterday, and when asked by a News reporter what was doing in naval stores replied, "things look awful blue." Mr. Robertson says that there is no demand for futures and he fears the market will not justify very extensive operations during the coming season, though he says operators are cutting new boxes all over the turpentine belt.

REVOLTS AT COLD STEEL.

"Your only hope," said three doctors to Mrs. M. E. Fisher, Detroit, Mich. suffering from severe renal trouble, lies in an operation." When I used Dr. King's New Life Pills," she writes, "I will surely cure." They prevent appendicitis, cure Constipation, Headaches. 50c. at W. H. Ellis & Co.

Death of Mrs. Jones.

The remains of Mrs. Minerva Jones wife of Mr. Adam Jones was brought up from Savannah on yesterday morning, her death occurring at her home on Montgomery st. on Saturday. The deceased had been suffering from consumption of the bowels for some time. The funeral and interment was held at the cemetery at Friendship church five miles from here on yesterday afternoon, Elder J. L. Smith conducted the services. The deceased was a resident of this county all her life until a few years ago, when she removed to Savannah.

Most cough cures are constipating, because they contain opium, and you should be careful to take something that does not tend to constipate. You should take Kennedy's Laxative Cough Syrup. It not only allays inflammation and irritation of throat and lungs, but it drives out the cold from the system by a free yet gentle action on the bowels. A Southern Trip.

(By W. F. Masters.)

Statesboro, Ga., Jan. 18, 1902.

Mr. Editor:

Since my last letter, we have had two or three cold waves, (as they term them here) but to my notion were only cold waves, for there has hardly been a day since I came here but what I have seen white and black boys out on the streets in their bare feet, and not of necessity, either, and men in their shirt sleeves around on the streets at their business and work.

Last week's Atlanta paper reported rain, snow, sleet, etc. The altitude of Atlanta is several hundred feet higher than here, near the mountains; but we have got none of it, only the cooling influence, with three or four days of cloudy weather and for one day it looked and felt like snow; but soon warmed up, and this reminds me of the constant warring of the elements, heat and cold, like two mighty armies, world wide. In the spring as the sun radiates toward the equator, the mighty heat gradually but none the less effectually drives the cold northward toward its frigid breastworks, but not without a conflict and battle royal; during March and April the heat will chase the cold northward several degrees, and then as if by a flanking movement the cold wave will drive back the heat, appearing as though it had lost but little ground; and then as if by little effort the power of heat drives back still farther northward the cold wave, and so on until the cold is virtually driven behind its frigid fortifications; and in the fall the cold moves out for a mighty attack and hostilities, varying as in the spring, until the heat is driven south within its fortress, continuing year in and year out, through countless ages, until this planet or earth is consumed or at least purified for Christ's second coming. But during all these hostilities humanity has to suffer the awful effects and countless numbers of human beings are yearly offered up to the Great Moloch of disease, the result of sin in the world.

The weather here is still fine and all kinds of business are good, but the citizens and business men wait better times by having more business; and so many of the enterprising business men have assured me that if any man or company of men, from any of the northern states, with some capital, pluck and push, will come here and start any kind of a factory or business enterprise they will lend a helping hand by giving or donating plenty of ground for mill or factory, and will also take stock to help along the enterprise.

Now this is no visionary, but real fact, (no fakers need apply) but honest men who mean real business. First come, first served. They have a saw and planing mill here that is doing a rushing business, a factory is also doing a fine business in the manufacturing of cement brick blocks for sidewalks, and shipping all over the country; also a cotton seed oil mill doing a good business; and next week there will start up a fertilizer factory. They now have a company organized to at once erect a large ice manufacturing plant and storage warehouse. Their greatest wish now is for a good mill for the manufacture of the "Sea Island Cotton," the finest and best grade on the market, which is raised here in large quantities, this county, "Bulloch," taking the lead in the state; also large quantities of rosin in tall barrels are gathered and shipped from here in every direction; so any one can see that this is a good town and with enterprising citizens.

Last Saturday, they had a big sale of suburban town-lots, and to show their enterprise had a pretty good colored brass band, up from Savannah, to drum up a crowd—and they got them; and I can assure any person or persons who mean real business, that here is a grand opening. No millionaires here, but some wanted. This town has a very good electric light plant

and city water works system, two Baptist churches, one Methodist and one Presbyterian, and has her quota of lawyers and doctors. The residential buildings of the white people are almost all good substantial modern structures, showing thrift and good taste for homes, and will compare with any northern town or county seat of its size. They have three fairly good hotels and a sanitarium, and what I say of the thrift of Statesboro, can be said of hundreds of towns in Georgia and in other southern states, and I repeat that the South is in her infancy yet, compared with the North.

I find a great many trees leafless here in Georgia, that are bedecked with large and small green bunches of mistletoe, and beautifully festooned with hanging moss, which is a delight to the beholder. A great country for "sweet-taters" and cane, and the fame of Georgia watermelons is world-wide. Am still enjoying strawberries and cream. Many people are clearing off and plowing their gardens and potato patches for planting, and plowing their gardens and potato patches for planting, and only the middle of January. President Bleet Taft's trip and visit to the South has surely proven a "Coupe-d'etat," that will prove a power for good in many ways especially within the South. More Anon.—Clinton, Mass., Daily Item.

Notice To The Public.

Referring to our notice in today's issue it will be seen that we have leased our Ice Factory to Mr. E. G. Enright. He is now actively engaged in getting everything in readiness for the approaching warm weather. It is his intention to give the people of this city and vicinity a better service than they have ever had. The quality of ice, delivery and prices will be in every way satisfactory. We bespeak for Mr. Enright, the fullest measure of support from all the citizens of Statesboro, it will be appreciated by David B. Morgan, Pres. Statesboro Ice Mfg. Co.

SELDEN BALKS DEATH PLAT.

It seemed to J. A. Stone, a naval veteran, of Kemp, Tex., that a plot existed between a desperate long trouble and the grave to cause his death. "I contracted a stubborn cold," he writes, "that developed a cough that stuck me, in spite of all remedies, for years. My weight ran down to 180 pounds. Then I began to use Dr. King's New Discovery, which restored my health completely. I now weigh 170 pounds. For severe Colds, obstinate Coughs, Hemorrhages, Asthma, and to prevent Pneumonia it is unrivaled. 50c. and \$1.00. Trial bottle free. Guaranteed by W. H. Ellis & Co.

House For Rent. Dwelling on North Main st near in, 5 rooms in good locality, barn and garden etc, on lot. For further particulars apply to S. F. Oliff.
