New Harness Shop

I have opened a harness and repair shop at the old stand on West Main at which I am prepared to do first class work on short notice. Harness made and repaired and shoe work done on short notice. Come and see me.

T. A. Wilson.

deWitt's Carbolized Witch Hazel Salve is very good for chapped hands, cuts, burns or bruises scratches, for it heals quickly, but it is especially good for piles. It is sold here by W. H. Ellis.

State May Own Oyster Beds

Savannah, Ga., March 2.—In an interview here today Governor-elect Brown suggested the acquisition by the state of the oyster beds along the state coast. He referred to the state ownership in Virginia and Maryland, saying it gave employment to many, and was a source of much revenue, and said he favored state ownership of the oyster beds in Georgia.

Mr. Brown went to Springfield today to attend a good roads meeting. The trip was made by train, and the governor-elect is expected to return in an automobile, but this may be prevented by the heavy rains. He will be dining tonight at the Casino, when he will be the guest of about 20 of the state, county and city officials.

A failing tiny nerve—no larger than the finest silken thread—takes from the heart its impulse, its power, its regularity. The stomach who has its hidden, or inside nerve. It was Dr. Shoop who first told us it was wrong to drug a week or failing stomach. Heart or kidneys. His prescription—Dr. Shoop's Restorative—is directed straight for the cause of these ailments—these weak and faltering inside nerves. This no doubt clearly explains why the Restorative has of late grown so rapidly in popularity. Druggists say that those who test the Restorative even for a few days soon become fully convinced of its wonderful merit. Anyway, don't drug the organ. Treating the cause of sickness is the only sensible and successful way. Sold by W. H. Ellis Co.

Mr. W. H. Hollingsworth

Register was in town yesterday and sold eight bales of Sea Island cotton at 181 cents per pound.

Mr. Henry Scott of Stillson was in town yesterday and gave the News a pleasant call.

Andy Donaldson of Statesboro Route No. 2 came in yesterday and renewed his subscription for another year. Andy is one of our well to do colored farmers who makes a success of farming and numbers his friends by the score among the whites as well as his own race, a good law abiding citizen and a fine example to other members of his color.

Mr. J. S. Mikell sold to Mr. R. Simmons twenty six bales of Sea Island cotton yesterday.

Mr. J. C. Donaldson of Blitch was in town yesterday.

Dr. J. Z. "Pattick" was among those who attended the meeting of the Medical Society yesterday.

Southern Builders

Supply Co.

188-140 Barnard St. SAVANNAH, GEORGIA.

Headquarters for

Sash, Blinds, Doors, Mantels, Paints, Oils, Lime, Etc.

Special agents for Harrison's "Town and Country" Paints. Correspondence Solicited.

Local and Personal.

Mr. J. A. and C. W. Brannen have returned from their Cuban trip. Arriving home last Monday.

Dr. R. L. Durrence returned Monday from Tampa, Florida, where he spent a few days last week.

Paint your house now. Pay for it next month or next fall.

A. J. Franklin.

Mr. L. R. Blackburn has returned from a trip to Tampa, after spending sometime in Florida.

Mr. J. W. Wright of Ivanhoe was in town one day this week.

Group positively stopped in 20 minutes, with Dr. Shoop's Cough Remedy. One test alone will surely prove this truth. No vomiting, no distress. A safe and pleasing syrup—50c. Sold by W. H. Ellis Co.

We expect to close down our mill soon—bring in your cotton seed and get \$20.00 per ton for them.

Bullock Oil Mill.

Messrs. P. R. McElveen and J. L. Hutchinson of Arcola spent the day in town Tuesday.

We expect to close down our mill soon—bring in your cotton seed and get \$20.00 per ton for them.

Bullock Oil Mill.

We are placed under many obligations to Mr. B. L. Robertson of Hubert for a fine mess of Hoke Smith country sausage sent in Sunday afternoon, they came in the nick of time and relieved our embarrassment Monday morning when we stuck our number tens under the table with his Excellency Governor-elect Brown for whom the were sent. The Governor forgot for the time being that there were any rough places in this life and enjoyed those fine sausages as he had no other dish in a long time. They put Taft's possums to shame.

Our garden Fertilizer will give you satisfaction—try our 100 pound bags.

Bullock Oil Mills.

The argument for a new trial in the case of the State vs. the Finch brothers was submitted Monday afternoon. Judge Brannen refused to grant a new trial and the case will be taken to the Court of Appeals.

Our garden Fertilizer will give you satisfaction—try our 100 pound bags.

Statesboro Produce & Commission Co. buys Country Produce for cash, Spring Chickens especially. Back of Blitch-Parrish Co.

Mr. J. W. Plackwell of Savannah was among our business men this week.

Get a sack or Fertilizer prepared especially for gardens—made by Bullock Oil Mill and put up in 100 lb. bags.

Dr. J. Z. Patrick of Pulaski spent the day in town yesterday.

Mr. G. W. Kelly of Louisville was shaking hands with our merchants yesterday.

Dol. R. E. DeLoach and Mr. D. B. Colson of Claxton came over to court yesterday.

Col. Hinton Booth is representing Statesboro up at the Great Inauguration in Washington to day. Col. Booth will do the thing right, and if Taft is not made to remember that Statesboro is on the map it will not be Col. Booth's fault.

M. C. DeWITT & CO., Chicago, Ill.

Brooklet Dots.

Mrs. M. J. McElveen was in Statesboro Tuesday.

Mr. J. N. Shearouse spent Friday in Savannah.

Mr. Zack Brown spent Monday in town.

Mrs. and Mrs. J. W. Wright visited relatives here Friday.

Miss Daisy McElveen was the guest of relatives here last week.

Mr. and Mrs. N. J. Wicks left on the first for Roswell New Mexico.

Mr. Lawrence Bland of Savannah visited his father Mr. James Bland this week.

Mrs. Clisby Cone of Ivanhoe was the guest of friends last Friday.

Messrs. Charlie and Felix Parrish spent Saturday and Sunday with their parents Mr. and Mrs. Wayne Parrish.

Mr. Robbie Morgan of Savannah visited his mother Mrs. L. A. Warnock Saturday and Sunday.

Mr. J. R. Hall of Savannah is spending a while with friends in town.

An enjoyable party was given Friday evening by Mr. and Mrs. J. W. Robertson, games were played and refreshments served. Among those present were: Misses Stella Rustin, Bettie Lee, Lilla Warnock, Myrtle Robertson, Minnie Hughes, Allie Warnock, Mary Emma Robertson, Daisy McElveen, Lula Warnock, Messrs. Chas. Well Cumley, Frank Hughes, Marshal Robertson, Harry Simmons, Dan Lee and P. B. Lee.

A crowd of about 300 people were out to hear the address given by Governor-elect Brown last Monday evening at the auditorium of the Brooklet high school. Immediately after the speaking he left for Savannah. We thank the Governor for his presence.

Mr. and Mrs. Jim Gould of Statesboro spent Sunday with relatives in town.

It Saved His Leg

"All though I'd lose my leg," writes J. A. Swenson, "Watertown, Wis." "Ten years of eczema, that 16 doctors could not cure, had at last laid me up. Then Bucklen's Arnica Salve cured it sound and well." Lefstable for Skin Eruptions, Eczema, Salt Rheum, Boils, Fever Sores, Burns, Scalds, Cuts and Piles. Price 25c at W. H. Ellis & Co.

Register Dots.

Quite a number of men went to Statesboro Monday to hear Governor-Elect Brown speak.

Mr. and Mrs. D. L. Kennedy visited relatives near Brooklet Sunday.

Mrs. Horace Riggs of Pulaski visited her sister Mrs. Wm. Holway Saturday.

Rev. J. B. Dixon is acting as principal at the Register high school this week, in order to keep the school going. Prof. C. A. Warnock will conduct the school until Prof. Rushing is able to take charge again.

Mrs. E. H. Usher of Brooklet returned to her home Tuesday after spending several days with her parents Mr. and Mrs. Jesse Dean.

Mrs. D. M. Rogers was called to Canoe to see her sister-in-law Mrs. H. A. Trapnell, who has been very sick for several weeks.

Mr. M. J. Rushing was in town Tuesday visiting his son Prof. K. D. Rushing, whose condition seems to be improving some.

Quite a number attended City Court Wednesday at Statesboro.

Mr. Eli Kennedy who was stricken with paralysis last week is improving slowly.

Sour stomach makes sour people. It makes your disposition sour—you become disliked because of your sour nature. Every bit of it can be stopped if you take something to digest the food you eat. Sour stomach is caused by too much acid arising from undigested food. Kodol for dyspepsia and indigestion will digest any kind of food in any combination at any and all times. Keep your stomach well by taking a little Kodol now and then. Sold by W. H. Ellis Co.

J. E. BOWEN

STATESBORO, GA.

Death of Mr. McLemore.

Thursday morning at nine o'clock the spirit of Mr. H. T. McLemore went to its maker. The deceased was in his seventy-second year at the time of his death, had been a citizen of Statesboro for several years coming here from Smith Grove, Ky. He was a member of the Baptist church and a good and highly respected citizen. The funeral was conducted from the Baptist church yesterday morning by Rev. M. H. Massey the pastor and the interment was made in East Side cemetery.

A clever 25 cent silver "No-Drip" Coffee Strainer Coupon is now put in each 25c package of Dr. Shoop's Health Coffee. Look for it! Ninety large cups of the very finest coffee imitation ever made, from one 25c package. This besides the satisfaction and flavor is perfect. Sold by Olliff & Smith.

Oliver Finch Convicted

In the City Court Thursday Mr. Oliver Finch was given trial for retailing whiskey, after an exhaustive hearing the jury returned a verdict of guilty, being out only a few minutes. This is one of the cases which have been hanging fire for some time. Mr. Finch's bond having been forfeited one or two times. The evidence was similar to that brought out in the cases of his two brothers, Messrs. W. S. and D. C. Finch some weeks ago, whose cases have attracted so much attention. A sentence of \$300.00 and six months in jail was imposed on the defendant. It is not known whether the case will be appealed along with those of his two brothers or not. Several other indictments showed up against the defendant on the same charge but on motion of Solicitor Lanier, the cases went over to the next term of the City Court.

C. B. DeLoach Convicted.

In the City court Thursday, after a hearing before a jury of eight men, Mr. C. B. DeLoach was convicted of assault and battery on the person of Mr. Rad Mitchell some time ago.

It seems that the trouble between DeLoach and Mitchell came about over the fact that DeLoach had taken the privilege to shoot some birds on the farm of Mitchell in the 1340th district, where they both lived at that time. DeLoach denies that he slapped Mitchell as the latter alleged, saying that he only layed his hand on his shoulder in a friendly manner.

The jury took Mitchell's version of the matter and returned a verdict of guilty. The judgment of the court was a fine of \$35.00 or four months.

City Court in Session.

State vs. Lawson Williams, vagrancy. Entered a plea of guilty, \$50.00 or six months on the chain-gang.

State vs. C. B. DeLoach, assault and battery, guilty, \$35.00 or four months on the chain-gang.

State vs. Dan Smoke, concealed weapon, entered plea of guilty, \$25.00 or six months on the chain-gang.

Statesboro, Ga.

Confused by Questions

Put by the State.

Criminal Court Room, Nashville, Tenn., March 4.—Witness S. J. Bennings was excused from the witness stand at noon and court adjourned until 2 o'clock.

The state will not cross-examine Governor Patterson, but announced that the only witnesses who would be cross-examined were T. Leigh Thompson and Charles Hayden. The former is the man who picked up the bullet where Senator Carmack fell, and Hayden is the man who waited at Bradford's office while the conference was on there.

Following these cross-examinations the state will begin its proof in rebuttal proper this afternoon. Mrs. Carmack and her little son, Ned, were in the court room again today, after an absence of several days. Mrs. Carmack, as usual, was dressed in heavy mourning. She was again ushered to the big leather chair and made comfortable by friends.

Dr. McPheeters Glasgow was the first witness put on the stand. His cross-examination by the state was begun at 10 o'clock. He testified that the two body wounds received by Senator Carmack ranged downward and to the front. The defense objected to the state's reading to the physician out of law books, but Judge Hart ruled that such procedure was competent; that the state could either read from the works and ask if the things were true, or the witness himself might do the reading and then say what he thought of it.

It developed shortly after the cross-examination of Dr. Glasgow began that Judge Hart would not allow him to testify regarding wounds to the heart for the reason that the witness said his views were only the result of reading, or from performing autopsies. Dr. Glasgow was allowed to testify as to the effect the severance of the spinal cord would have. He said it would produce almost immediate paralysis of the nerves and muscles fed from the point of severance. He thought there was a physical spasm, a convulsion first, however, before the paralysis and that this accounted for the fact that Senator Carmack's cigar stump was between his fingers in death. Dr. Glasgow said that the range of the bullet wounds in the chest were downward and to the front.

Witness S. J. Bennings was next called for cross-examination by the state. General J. B. Garner took the witness in hand and soon had him tangled up. The witness said that during the past year he had been engaged in the partnership of getting logs on the river. When asked how much money he contributed, he was unable to tell. Later he said it was about \$25. He said his son bought the logs and he never knew where his son got them or from whom.

Card of Thanks.

For the many acts of kindness rendered during the illness and death of our mother, Mrs. Nannie Miller, we wish to extend our heartfelt thanks to all who so generously and willingly assisted us. Their kindness is greatly appreciated and will ever be remembered.

Mrs. C. H. Hamilton

Mrs. J. O. Martin.

Nothing in the way of a cough is quite so annoying as a tickling, tearing, wheezing, bronchial cough. The quickest relief comes perhaps from a prescription known to Druggists everywhere as Dr. Shoop's Cough Remedy. And besides it is so thoroughly harmless that mothers give it with perfect safety even to the youngest babies. The tender leaves of a simple mountain shrub give to Dr. Shoop's Cough Remedy its remarkable curative effect. A few days' test will tell. Sold by W. H. Ellis Co.

Ed Craig, who carried notes of Col. Cooper to Senator Carmack, is in Nashville. He will likely go on the stand today. Mr. Craig had started to Washington to attend the inauguration ceremonies, when a message caught him at Bristol, Tenn., summoning him back to the trial. It is rumored that the state will attack the testimony of the eye witness, Bennings, of the defense.

A falling tiny nerve—no larger than the finest silken thread—takes from the heart its impulse, its power, its regularity. The stomach also has its hidden, or inside nerve. It was Dr. Shoop who first told us it was wrong to drug a week or failing stomach. Heart or kidneys. His prescription—Dr. Shoop's Restorative—is directed straight for the cause of these ailments—these weak and faltering inside nerves. This no doubt clearly explains why the Restorative has of late grown so rapidly in popularity. Druggists say that those who test the Restorative even for a few days soon become fully convinced of its wonderful merit. Anyway, don't drug the organ. Treating the cause of sickness is the only sensible and successful way. Sold by W. H. Ellis Co.

Cecil Brannen Fined

\$100 and Cost.

The jury in the case of the State vs. C. W. Brannen returned a verdict of guilty late Wednesday night.

Mr. Brannen had been charged with assault and battery on the person of Mr. G. Jaekel at the hotel last summer a year ago. The case has been pending in court ever since. Owing to the fact that Judge Brannen was disqualified to preside Judge Boykin came over and presided and the case went to trial.

The circumstances of this case are well remembered, being the case Messrs. Brannen and Blitch went to the hotel and a row arose about wearing a coat in the dining room.

Judge Boykin imposed a fine of \$100 and cost or six months on Mr. Brannen. The fine was promptly paid.

Between Baltimore and Washington hundreds of telegraph poles were carried down by the weight of snow and ice and the wind.

North and east of the city trains are merely creeping along without aid of telegraphic orders. It may be a week before normal conditions are restored.

At no previous time in the city's history has the street car service been dealt so heavy a blow. The financial loss is incalculable. Thousands of people who expected to attend the inaugural ceremonies in Washington were unable to obtain transportation there.

Misses Ruby Herald and Belle Bennett of Garfield are the guest of Miss Sallie Parker this week.

Miss Lizzie Louis of Garfield is the guest of Mr. C. W. Porter.

Mr. S. W. Smith of Metter was in town yesterday.

Importance of Soil Surveys.

In an admirable, analytical speech delivered recently in the lower house of congress, when the agricultural appropriation bill was under consideration, Congressman Charles G. Edwards, of the first Georgia district, stressed the great importance to the agricultural interests of the United States of scientific soil surveys, to which just sufficient attention has been given to demonstrate their valuable results.

For instance, as Congressman Edwards pointed out, it was through these government soil surveys that the rich tobacco lands of Florida and South Georgia were discovered and thereby so greatly enhanced in value.

Few farmers know anything about the chemistry of the land with which they are dealing. They may know from experience what one of two or three different crops thrive best upon it, but generally they are ignorant of the particular growth to which it is best adapted.

When scientific investigation develops the fact that land which has been valued at no more than \$5 an acre is worth, as the result of discovery of its peculiar adaptability, from \$100 to \$200, the importance of this work cannot be overestimated.

There are now on file with the bureau of soils in the national department of agriculture more than five hundred requests for soil surveys, affecting an area of more than 500,000 square miles of territory, but with the present force and appropriation at the bureau's disposal it would require more than ten years to make these investigations.

Congressman Edwards has made determined effort to secure a soil survey for Bulloch county, particularly because of the location there of the agricultural school for the first congressional district, but has been met at every turn with the answer, "not sufficient funds."

Opposing the policy of niggardly dealing with the great agricultural interests of the nation, while spending millions upon army and navy, Congressman Edwards said: "The people not only want these soil maps of their lands, but they are clamoring for them. We can get a great deal better make appropriations for a productive and important interest of this kind than for huge battleships costing into the millions, in the building and maintenance of which we are literally wasting the people's money. I am opposed to all such extravagant and wasteful appropriations, and think it is high time that the government, which is now at peace with the rest of the world, should cease to increase its already unreasonable appropriations for a larger navy. These large and extravagant appropriations should and could be applied with better advantage and with better grace to the payment of the public debt and to purposes that will be productive instead of destructive to the nation's wealth."

It is an argument which applies with equal force to any one and all of several lines of internal development and improvement whose neglect by the general government becomes more marked and reprehensible as the apparent necessity for their increases.—Atlanta Constitution.

Without hesitation that Dr. Wills' Kidney and Bladder Pills are unequalled for weak kidneys, backache, inflammation of the bladder and all urinary disorders. They are antiseptic and prompt. We sell and recommend them. W. H. Ellis.

Farm and Garden

THE COUNTRY ICEHOUSE.

An Important Adjunct to the Up-to-Date Farm.
By PROFESSOR OSCAR ERF, Ohio Agricultural College.

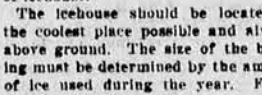

In this age of advanced farming the icehouse is an important adjunct. The economical building is the one so constructed that it will preserve the greatest amount of ice in proportion to the amount of ice stored. Waste in an icehouse is largely caused by leakage from the top, sides and bottom. In a properly constructed icehouse and when the ice is properly packed and cared for no waste should take place from the inside of the pile of ice. The melting from the sides, bottom and top is caused by insufficient insulation.

To insulate to such an extent that no leakage would take place would be impracticable, but with a thorough understanding of the construction of an icehouse a minimum amount of leakage can be obtained. The waste from the bottom is generally considered to be the greatest. The amount of ice melted in the bottom of the icehouse varies from one to six feet during the year, depending upon the construction of the floor. If the icehouse is provided with an air tight floor, the ice laid on at least eighteen inches of dry sawdust, the bottom waste rarely exceeds twelve inches during the year. On the other hand, if the ice is piled in the icehouse on the bare ground without any insulation under it or any provision made for drainage the leakage frequently is six feet. The waste from the sides is not so great, but it frequently ranges from one to three feet, depending upon the insulation. The manner of insulation is shown in the cut of cross section of icehouse.

CROSS SECTION OF ICEHOUSE.

The icehouse should be located in the coolest place possible and always above ground. The size of the building must be determined by the amount of ice used during the year. For a man who keeps about twenty cows and sells the milk an icehouse 14 by 12 feet high is of sufficient size. However, in case about an acre of land is available, the icehouse should be smaller than 12 by 12 by 10 feet high, because the outside surface is too great compared with the volume, and therefore too much ice is wasted in proportion to the amount used. In the plans submitted the framework is made by laying a 2 by 4 sill on the concrete foundation. Fasten this to the foundation by concrete. A few bolts into the concrete and allowing them to extend through the 2 by 4 sill. Two by four studs are then placed upon this sill sixteen inches apart from center to center. The rafters for the roof are likewise made of 2 by 4, placed the same distance apart as the studs, but the purlin placed upon the 2 by 4 studs should be at least six inches wide. The outside of standing may be boarded either with common sheathing and paper, upon which paper is laid, or with putty siding, or with shingle siding, the latter being the cheapest and requiring only a single thickness of board.

ICE AND MILK HOUSE COMBINED.

The Nebraska state experiment station has conducted some valuable feeding experiments with corn and alfalfa and on two other cereals. It was found that with a ration consisting of 64 pounds of corn, 4 pounds of alfalfa and four pounds of clover the cost per pound of gain was 4 cents, while the profit per animal was \$3.76. In a third test 33 pounds of corn and 49 pounds of alfalfa were required to give a pound of gain costing 8.5 cents, while the average loss in feeding the steers was 27 cents a head. With a fourth lot of steers a pound of gain cost 16 cents. The loss was incurred from a ration of 68 pounds of corn and 6.6 pounds of alfalfa. In this case the average profit was \$6.02 per head.

A bright south central Nebraska farmer with whom we talked the other day cited a fact which is of interest to farmers of that section. He took into account more than they do—namely, that while the application of manure to the Nebraska soil, twenty-five years ago was without doubt a positive detriment, especially in the growing of wheat, so much humus and fertility have been added to the soil that the supply of fertilizer available for the land. The trend he speaks of is significant and will mean much for the farmers of his own state and others similarly situated.

The Nebraska state experiment station has conducted some valuable feeding experiments with corn and alfalfa and on two other cereals. It was found that with a ration consisting of 64 pounds of corn, 4 pounds of alfalfa and four pounds of clover the cost per pound of gain was 4 cents, while the profit per animal was \$3.76. In a third test 33 pounds of corn and 49 pounds of alfalfa were required to give a pound of gain costing 8.5 cents, while the average loss in feeding the steers was 27 cents a head. With a fourth lot of steers a pound of gain cost 16 cents. The loss was incurred from a ration of 68 pounds of corn and 6.6 pounds of alfalfa. In this case the average profit was \$6.02 per head.

A continuous floor should be built in the icehouse to allow for the removal of the warm air from the top of the ice. The ventilator may be placed in the ice chute end instead of the cupola and when so placed acts for the same purpose. A continuous floor should be built in the icehouse to allow for the removal of the warm air from the top of the ice. The ventilator may be placed in the ice chute end instead of the cupola and when so placed acts for the same purpose.

COLIC IN HORSES.

Causes, Symptoms and the Common Method of Treatment.
It is more or less common for horses to have colic. It is a disease of the digestive tract. It is a disease of the digestive tract. It is a disease of the digestive tract.

One of the interesting exhibits of the Nebraska experiment station at the national corn show was a three month old alfalfa plant seven inches in height whose roots, exposed to view in glass, contained earth extended down into the soil a distance of thirty inches. This explained in a very plain way the ability of alfalfa to withstand drought and its ability to flourish in a soil which many other plants would find poor and inhospitable.

An almost inevitable drawback with the raising of dual purpose breeds of cattle is that the attention as well as the interest of the owner is divided between the two objects in view, with the result that he is not likely to give that degree of attention to the necessary conditions which must exist if he is to achieve the largest measure of success with either. It is simply an illustration of the principle that one cannot do as well if he devotes his energies to but one.

An interesting achievement which has been recently effected in the Cornell university plant breeding station and in the biological laboratory of Chicago university is a wheat eye cross. The experiment can hardly be more than a purely scientific interest, as here, as in the animal kingdom, nature seems to have erected an impassable barrier to further propagation, due to the sterility of hybrid crosses. While seed from this cross has not been sterile in every instance, it has possessed this little vitality that the plants died a short time after germination.

The Illinois experiment station has conducted an interesting series of corn breeding experiments covering the past eleven years, having been able to increase the protein content of a given type of corn from 10.32 per cent to 13.80 per cent and as low as 7.32 per cent. The old corn test by a like process of breeding and selection it has been able to increase from 4.70 per cent to 7.43 and to reduce to 2.50. The experiments show further that the old content tends to vary with the protein. In view of these figures it would seem a wise move for commission men and feeders to buy corn not only by weight, but to rate the market value on the basis of the per cent of food elements contained.

The members of a western state board of health, realizing the fearful aid which ill ventilated sleeping rooms and impure air are in the contraction of colds and the aggravation of minor pulmonary complaints and the dread tuberculosis, have issued a warning to the residents of their state against the all too prevalent practice of placing light warm mattresses on the windows of sleeping rooms. The circular they have issued states that at least one window in each sleeping room should be left open part way at night, so that when the body is at rest it may be recuperated by the breathing of pure and life sustaining fresh air. The point made by this board of health is well taken and should be pondered thoughtfully by folks everywhere.

A bright south central Nebraska farmer with whom we talked the other day cited a fact which is of interest to farmers of that section. He took into account more than they do—namely, that while the application of manure to the Nebraska soil, twenty-five years ago was without doubt a positive detriment, especially in the growing of wheat, so much humus and fertility have been added to the soil that the supply of fertilizer available for the land. The trend he speaks of is significant and will mean much for the farmers of his own state and others similarly situated.

The Nebraska state experiment station has conducted some valuable feeding experiments with corn and alfalfa and on two other cereals. It was found that with a ration consisting of 64 pounds of corn, 4 pounds of alfalfa and four pounds of clover the cost per pound of gain was 4 cents, while the profit per animal was \$3.76. In a third test 33 pounds of corn and 49 pounds of alfalfa were required to give a pound of gain costing 8.5 cents, while the average loss in feeding the steers was 27 cents a head. With a fourth lot of steers a pound of gain cost 16 cents. The loss was incurred from a ration of 68 pounds of corn and 6.6 pounds of alfalfa. In this case the average profit was \$6.02 per head.

KEEP YOUR EYE ON THIS SPACE

Since January, 1909, I am located in Dr. Cone's building next door to Porter, Franklin & Co., with a new and up-to-date line of

LADIES' & GENTS' FURNISHINGS, CLOTHING, SHOES, HATS, SHIRTS, UNDERWEAR, HOSIERY, GLOVES, ETC., ETC.

A call will convince you of our low prices and square dealings.

FRIEDMAN'S BARGAIN STORE
Statesboro, Georgia.

BOWEN'S Guano Distributor

Is the most successful machine of its kind ever used for distributing Commercial Fertilizers.

In covering the fertilizer it makes a bed any width from 9 to 25 inches, and any height desired. The machine is low in price; Simple; Strong; Convenient.

Read these Testimonials from those who have used it.
The Adabelle Trading Co., of Adabelle, Ga., used one of the Distributors in 1904; the year following they used 14, and last year (1907) they used 25 on their various farms. This should sufficiently express their opinion of the Distributor.
Statesboro, Ga., November 18, 1907.
This is to certify that for several years I was employed by the E. E. Foy Mfg. Co., in this county, as their superintendent, and that they were exclusive users of farm machinery, and that they used a good many makes of guano distributors, and that the Bowen Distributor, used with a Planter F. cultivator was the best they used and gave better satisfaction for general use, and did cost as much less.

MANUFACTURED BY
G. W. BOWEN,
REGISTER, GA., R. F. D. NO. 1.

Buy Your Fertilizers From Bulloch Oil Mills

We will make the following standard brands of fertilizers this season and offer them to the trade on as good terms and at as low prices as the same grade goods can be bought.

| | |
|---------------------------------|--------|
| Bulloch Plant Food | 8-2-2 |
| Bulloch Special Truck Grower | 6-3-3 |
| Bulloch Best Guano | 10-2-2 |
| Bulloch Sandy Land Guano | 9-2-3 |
| Bulloch Acid Phosphate | 16% |
| Bulloch Acid & Phosphate | 10-4 |
| Bulloch Acid Phosphate & Potash | 12-4 |

The Bulloch Brands are all home made goods and made by home people with home money. We request all users of fertilizers or others interested to come to our mills and see just what goes into the goods sold by us and see us before you place your orders.

Yours respectfully,
BULLOCH OIL MILLS

Lumber For Sale
I am now located near Statesboro and prepared to furnish on short notice, lumber of all kinds for further particulars prices etc. apply to.

POULTRY NOTES BY C. M. BARNETT, NORTON, N. H.

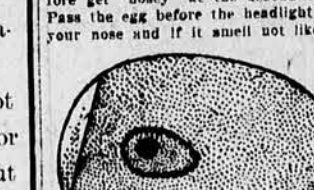

EGGS UNDER THE X RAY.

Don't let your money be worn out by buying a lot of eggs that are not good. The X-ray is a new method of testing eggs. It is a new method of testing eggs. It is a new method of testing eggs.

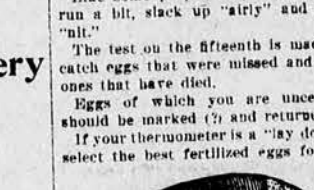

THE OVEN AT FIVE DAYS.

A spider which five days' more heat will change into a frisky chick with downy feathers.
A clear egg is infertile and should be boiled for the chickens or thrown to the pigs.
The red attack across an egg is an early sign of infertile eggs. It is caused by rough handling.

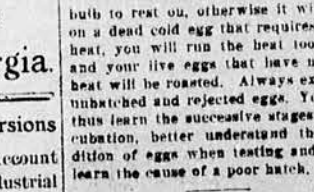

A DEAD BIRD.

Red, red rose "take it up gently, handle with care" or it may shoot you fair and square.
The black spot is a dead germ.
Perhaps it was chilled before setting, come from weakly old stock, was laid by an immature pullet, fostered by a sickly male or was killed by overheat.

A HAND-MADE BARREL HEADER.

A hand-made barrel header. Its utility in other respects will be recognized at a glance. The barrel header is so simple in its construction that any directions as to how to make it would be superfluous.

A HAND-MADE BARREL HEADER.

It is well for one who has been brought up on farms living east of longitude 90 and has become used to agricultural methods that prevailing to remember, in case he contemplates a move to western localities where dry farming methods have to be followed, that since the land is in actual use only every other year, twice or three times as many acres will have to be owned and operated to secure the same crop returns. Another point to keep in mind is that dry farming is a more expensive enterprise; hence to embark in it a considerably larger capital is needed than in those sections where the rainfall is ample to meet annual needs. Expert use of station officials of several western states have taken pains to point out some of these features on which the ambitious real estate agent has too often failed to consider. A further feature that is being pointed out is that continuous grain raising will exhaust the fertility of the soil under dry farming conditions. Therefore the fertility stock must be raised in other sections. If any readers have contemplated a move to the west, dry farming would follow they would do well to look these points up thoroughly.

MONEY IN OLD ORCHARDS.

Profitable Fruit Crops From Run Down Farms.
A woman who owns and manages large orchards in the central part of New York has submitted some interesting information which will be of interest to all states where fruit is raised. She says:

"Within the last two months I've had as many as twenty letters from women asking for advice about investing in fruit orchards. Most of them are thinking of investing in farms or small country places where there are already what they term old run down orchards. They come to me to find out if they can ever make those old trees bear."

"According to my experience, an apple tree in its old state has to be pretty far gone to be ready for the ax. I mean, of course, when it is a good variety. The trouble with the apple trees which we see on these old places is that they need care and attention."

"They have been allowed to stand year after year with their roots covered by grass and weeds. They are actually dying of thirst and starvation. If one will only study the difference in the color of the leaves of trees growing in a well cared orchard and in one allowed to go to grass in midsummer he will see the signs of starvation and thirst."

"The first thing to do with such an orchard is to plow it up. If it has been in sod for a number of years there will be many roots near the surface. Do not be afraid of hurting the trees by cutting these roots with the plow."

"This plowing should be done early in the spring and should be repeated several times during the first season. If the roots are so thick that you cannot plow, then chop up the sod with a disk harrow. If the land is too rough even for that, turn in hogs. Drop a few grains of corn here and there in clamber holes and leave the rest for the hogs."

"Trees in such neglected orchards always need pruning. This should be done when the trees are dormant. Pruning is something that should never be carelessly done. The prunings should all be burned and the ashes scattered about the roots of the trees."

"After this severe pruning you will get a big crop of water sprouts in the summer. If you don't cut them off promptly, they will grow and waste away. It is best to prune a little every season."

"As a rule, there is enough plant food in the soil if it is only put in shape so that the trees can use it. If, however, this should not be the case, then a fertilizer containing nitrogen is the best tool. A liberal dressing of barnyard manure is the very best way of supplying this nitrogen. Nitrogen is usually the best food."

"I have found it impossible to raise good fruit without a spray pump. If you have never sprayed, begin by willing to try your own experimental station for its spraying bullets. Don't spray freely, but do the job thoroughly."

"Trees may be healthy and blossom well after years and no fruit be formed. This condition can be remedied in two ways. One way is to graft about every third tree in every orchard with a pollen bearing variety. The other and sometimes the more convenient is to replace certain rows with pollen bearers. When setting out new orchards I always plant every fourth tree with pollen bearers."

"Fortunately it is only in isolated orchards of a single variety that such conditions prevail. In fruit growing districts where several varieties are raised and bees are kept a total failure is next to impossible. It is not always necessary to keep bees, but it will pay a fruit grower, especially in a new country, to be on the safe side."

A HAND-MADE BARREL HEADER.

It is well for one who has been brought up on farms living east of longitude 90 and has become used to agricultural methods that prevailing to remember, in case he contemplates a move to western localities where dry farming methods have to be followed, that since the land is in actual use only every other year, twice or three times as many acres will have to be owned and operated to secure the same crop returns. Another point to keep in mind is that dry farming is a more expensive enterprise; hence to embark in it a considerably larger capital is needed than in those sections where the rainfall is ample to meet annual needs. Expert use of station officials of several western states have taken pains to point out some of these features on which the ambitious real estate agent has too often failed to consider. Ten Burned to Death

By "Black Hand" Gang
New York, March 3.—Cut off from escape by a burning stairway, ten persons perished early today in a five-story tenement house at 372 Forty-seventh avenue. The victims, who were all Italians, with the exception of an unidentified Frenchman, ranged in age from 60 to an infant girl of five.

Five persons, including a policeman who was out by flying glass and a male child about a year old were injured and taken to hospitals.

It is believed the blaze was incendiary following a "Black Hand" blackmailing letter which an occupant of the building received several days ago. The dead: Rosalia Filbert, 60 years of age, sister of Rosalia Filiberti; Rose Placia, aged 7, Filiberti's niece.

Carolina Sansone, aged 80.
Mrs. Josephine Travassano, aged 50, daughter of Mrs. Sansone.
Joseph Travassano, 17, brother of Lena.

Lena Travassano, aged 20, daughter of Josephine.
Evelyn Pasifo, aged 4.
Unidentified man, about 30 years of age.

The injured:
Robert Sampson, a fireman was cut by glass about the head and taken to a hospital.

Hulada Monard and Nicholas Bardallo were overcome by smoke and suffered serious burns.

An unidentified girl four years of age was overcome by smoke.

Dominick Filiberti suffered the fracture of several ribs.

The only member of the Travassano family who survived was Marie, aged 15, who left home last night to visit.

There were about thirty families mostly Italians, in the tenement house and policemen and firemen rescued many of them by ladders and by swinging them across from windows to neighboring buildings.

Several babies were thrown from the windows and caught by fire men who were standing on the extension ladders.

The street floor of the building was occupied by the undertaking rooms of Patrick McDonald and the Lincoln restaurant, while Antonio Uria, a barber, occupied the basement. The fire started in the bottom of an air shaft and was discovered by Patrick Monka, a watchman. In the undertaking rooms, Monks ran upstairs and awakened the McDonald family.

The flames were blazing and filled with smoke. He rapped on the doors of the apartments up to the third floor, awakening the occupants and then turned in a fire alarm.

Most of the occupants of the tenement were asleep when the fire began and many of them were overcome before awakening. Policemen Riley and Gallagher obtained access to the upper floors by climbing to the roof of an adjoining structure and creeping along a cornice to the rooms of an apartment occupied by Attila Pasio with his wife and son, Louis, aged 7, were taken out of the window and carried along the cornice to the adjoining building whence the firemen took them to the street.

All but two of those who perished in the fire were occupants of tenements on the upper floor of the burned building. Apparently they were overcome by the smoke when they could escape to the windows and the firemen took them to the street.

The work of rescue was delayed by the falling of two and three floors from the second and third floors by the falling of the firemen.

The firemen were taken down on the fourth and fifth floors by the firemen. The firemen were taken down on the fourth and fifth floors by the firemen.

The firemen were taken down on the fourth and fifth floors by the firemen. The firemen were taken down on the fourth and fifth floors by the firemen.

Local and Personal

19 pounds of granulated sugar for \$1, cash, at W. W. Olliff & Co., Adabelle, Ga.

If it is a slick, dandy little buggy that is necessary to complete your sporting rage, you can get it from E. M. Anderson, "The Buggy Man."

Paint your House now. Pay for it next month or next fall.

Croup positively stopped in 20 minutes, with Dr. Shoop's Cough Remedy. One trial alone will surely prove this truth. No vomiting, no distress. A safe and pleasing syrup—50c. Sold by W. H. Ellis Co.

We expect to close down our mill soon—bring in your cotton seed and get \$20.00 per ton for them.

Mr. M. G. Hodges of the lower part of the county was in the city yesterday.

We will not buy any seed after the 10th inst.

Bulloch Oil Mills.

Teachers May Be Paid Up On Time.

Will the teachers of Georgia get a part of their 1909 earnings before the end of the year?

It seems to be indicated that they will, notwithstanding the \$938,000 warrant of February 1, which was used to pay all the state's pensioners in advance and which left the treasury at low water mark, and notwithstanding too, the depression among the teachers themselves growing out of their acceptance of the theory that none of them would get any 1909 pay before next December.

No authority at the state capital is willing to be quoted to this effect. No promise has been given out, and, in fact, it is said a general understanding prevails to the contrary. State School Commissioner Pound, whose office is daily besieged with letters on the subject, is said to have come practically to the conclusion that there was no hope for any advance of the 1909 appointment before May at the earliest, and that even then the amount the state could distribute would be small.

Nevertheless the prediction is safe, though authoritative, that an advance equally as large as that of 1907, which was 20 per cent, or \$400,000, will be seriously discussed some time soon.

Without this advance, so called, the teachers of the state school department would have to wait till the final date of tax payments, December 20, for their money. The only exceptions to this would be the teachers in those counties that have been provided and economized and now have 1908 balances to their credit sufficient to enable them to proceed several months during the present year without help from the state. Two or three counties, it is said, have even enough to run them through the whole year. But the great majority have nothing accumulated, and the advance of a part of their share in the apportionment relieves their teachers of a considerable deprivation.

Last year there was an advance of 25 per cent of the whole fund. This amount lasted till about July.

—Atlanta Journal.

Thousands Met

Brown at Lyons.

Lyons, Ga., March 3.—This has been a Joe Brown day in Lyons. The people came from far and near to meet Georgia's next Governor's next governor. A committee of citizens met the train on which the future governor came, at Collins, and at Lyons a thousand or more were at the depot to add to the welcome. Mr. James E. Smith, Mr. Brown's campaign manager, came down to be at the reception and he also was given an ovation.

From the train Mr. Brown went to the New Lyons Hotel and there he was taken to the court house. He found the building full and overflowing, and after an introduction by Col. Giles, he made a talk of an hour. A reception followed, everyone being anxious to shake the hand of the future governor.

During this time a barbecue was being prepared and at one o'clock dinner was announced and all invited. After a blessing by Rev. Mr. Cobb, the inner man was refreshed and there was plenty and to spare. The barbecue was conceded to be a great success. Many said it was the best they had ever attended. Over 2,000 people were here and after dinner there was plenty on the tables.

It has been a great day for Lyons and the Governor-elect expressed himself as having enjoyed every moment of his stay. He and Mr. Smith Lunched at the home of Mr. and Mrs. E. M. Smith in the evening and Mr. Brown left on the night train for Mt. Vernon, where he is to spend to-morrow.

There is more catarrh in this section of the country than all diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by E. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally and does not irritate the system. It acts directly on the blood and mucous surface of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

Address: E. J. Cheney & Co., Toledo, Ohio.

Sold by Druggist, 25c.

Take Hall's Family Pills for constipation.

President Gets \$75,000 Salary

Washington, D. C., March 3.—The salary of the President of the United States has been definitely fixed at \$75,000 per annum without any additional allowances for traveling expenses. This conclusion was arrived at during the day and night by two conference committees of the two Houses of Congress, on the legislative, executive and judicial appropriation bill and the other on the sundry civil appropriation bill.

Finally the Senate inserted an amendment in the legislative bill giving the President a salary of \$100,000 a year. The House reduced the amount to \$75,000 and the conference on that measure resulted in the retention of the House figures. Anticipating the possibility of this conclusion with reference to the salary, the Senate inserted in the sundry civil bill a provision appropriating \$25,000 for the payment of the President's traveling expenses. Late to-night the Senate also reduced from that salary of \$75,000 for the President, out of which he must pay his own way when traveling.

The Senate lost all of its other amendments for increases of salaries for high officials, such as the Vice President, the Speaker of the House, the Supreme Court judges, etc.

Taken From Jail

And Put To Death

Blakely, Ga., March 4.—The Early county jail was broken into last night by a band of men, who broke the outer lock and saved the two inner big jail locks, and John Fowler, the negro who killed Deputy Sheriff Dunk Murkinson Monday afternoon, was taken out and was put to death in the edge of the swamp about 200 yards from the jail.

Sheriff Black was at McRae, Ga., and his son, the deputy sheriff, was at Jakin, Ga., when the jail was stormed.

Mr. Will Lee of Brooklet was in town yesterday.

Mr. H. L. Alderman of Brooklet, was in town yesterday.

THE LURID GLOW OF DOOM

was seen in the red face, hands and body of the little son of H. M. Adams, of Henrietta, Pa. His awful plight from eczema had, for five years, defied all remedies and baffled the best doctors, who said the poisoned blood had effected his lungs and nothing could save him. "But," writes his mother, "seven bottles of Electric Bitters completely cured him." For Eruptions, Eczema, Salt Rheum, Sores and all Blood Disorders and Rheumatism Electric Bitters is supreme. Only 50c guaranteed by W. H. Ellis & Co.

KILL THE COUGH AND CURE THE LUNGS

WITH Dr. King's New Discovery FOR COUGHS, COLDS AND ALL THROAT AND LUNG TROUBLES. GUARANTEED SATISFACTORY OR A VERY REFUND.

How Roosevelt Spent Last Day in Office.

Washington, March 3.—Men who have been fifty years at the white house have no recollection or scenes such as those witnessed here today in the closing hours of President Roosevelt's administration. The latter's retirement was unprecedented in many ways, but chiefly in the hundreds of persons who called to exchange farewell words with the retiring chief executive. Although no exact count of the number of visitors was kept, it is estimated that between 10 a. m. and 2 p. m. there were at least 2,500.

The president stood the test with the hardihood and joyousness that made his greetings to every man or woman more pleasant than usual.

During all this time he stopped at intervals to sign bills coming in from congress or to attach his name to photographs brought to him.

The president signed the District of Columbia, the fortifications and the army and naval appropriations bills. The latter bill contained the provision designed to restore the marines to the ships of the navy, from which they were taken by order of President Roosevelt.

The Brownsville bill which permits the discharged negro soldiers of the Twenty-fifth infantry to reenlist in the army upon establishing their innocence, has not yet reached the president, but it was said today that he had decided to sign it.

Every cabinet officer in the city went to the white house during the day with the heads of the bureau and the principal officials of their departments.

President Roosevelt spent a busy afternoon.

Among those received by appointment were the members of the interstate commerce commission. The president exchanged with each member cordial personal greetings. Chairman Knapp, speaking for the commission, said that the country was indebted to the president's persistent efforts and commanding influence for notable measures of regulation.

In response the President said that "You have done the work, while I have seemed to get the credit for it. I have tried to be a decent president for a decent people."

At 6 o'clock this evening he received his old time friends from Oyster Bay, and at the same time he received the friends and neighbors of Vice President Ellet Sherman. After this he shook hands with the Hamilton Club of Chicago.

The last Roosevelt dinner in the white house was served at 8 o'clock tonight, with fourteen persons present, constituting members of the families of the retiring and incoming presidents. Mr. and Mrs. Taft were the principal guests. None of the Roosevelt children were present, and the Taft children spent the night at the Boardman residence.

Miss Ethel Roosevelt left Washington today for Oyster Bay. Quentin Roosevelt will remain in school at Alexandria, Va., until the close of the school year.

The most affecting of all the farewells at the white house was when the president called all the clerks, messengers and other attaches of his executive staff into his office late today. He told them how he appreciated the way they had assisted him in the seven years of his administration. Both he and themselves, he declared, had worked in a common cause for the welfare of the nation and both had done their best. He wished them all farewell and good luck. Then, with each of them, he shook hands and there were many to whose eyes tears came. A number of the white house attaches were remembered by the president with personal gifts.

At 5:45 o'clock the president left his office, for the last time. His work there is done and whatever work he may do tomorrow will be executed in the president's room at the capitol.

More Corn in the Crib

is the result of the vigorous, thrifty plant growth secured immediately upon the application (at planting time) of

Nitrate of Soda

Test it for Yourself Entirely Free

Let us send sufficient Nitrate of Soda for you to try, taking only that you use according to our directions, and for no fee. The result. To the twenty-five farmers who get the best results, we offer each a prize. First, "Vanderbilt" most valuable fertilizer, (this composition), and how to use for different crops. Secondly, a complete address on postcard.

Apply at once for Nitrate of Soda by postcard as this offer is immediately closed. "Nitrate Growing for Trade," another book of useful information, will be sent free to farmers while the present edition lasts. It is mentioned in which this advertisement is sent.

Send name and complete address on postcard.

To Improve Roads Along Mail Routes.

LaFayette, Ga., March 2.—The grand jury finished the business of the term of court last Thursday afternoon after a ten days' session. About fifty true bills were returned.

The jury recommended that the question of bonds for building good roads be placed before the voters of Walker county, and that the board of roads and revenue take such steps as are necessary to effect the election.

Another recommendation was that the board of roads and revenue appropriate from the county's funds \$2,000 to aid in the erection of a monument to the Confederate veterans of the Civil war who went from Walker county.

And one of the most important recommendations was one recommending the road commissioners and overseers of the county to give special attention to roads over which R. F. D. routes run and build up and improve such roads as fast as the means at hand make it possible to do so, and endeavor at all times to permanently improve such roads.

NEAR DEATH IN BIG POND.

It was a thrilling experience to Mrs. Ida Soper to face death. "For years a severe lung trouble gave me intense suffering," she writes, "and several times nearly caused my death. All remedies failed and doctors said I was incurable. Then Dr. King's New Discovery brought quick relief and a cure so permanent that I have not been troubled in twelve years." Mrs. Soper lives in Big Pond, Pa. It works wonders in Coughs and Colds, Sore Lungs, Hemorrhages, LaGrippe, Asthma, Croup, Whooping Cough and all Bronchial affections. 50c and \$1.00. Trial bottle free. Guaranteed by W. H. Ellis & Co.

25 pounds of good rice for \$1, cash, at W. W. Olliff & Co., Adabelle, Ga.

Painting and Repairing

Sea Island Bank, Statesboro, Ga.

Mr. Jaekel Has Left Us.

On Sunday morning Mr. Gustave Jaekel and family left for Savannah, where they will make their future home. Mr. Jaekel having been tendered the place as manager of the Severe house, one of the oldest and best hotels in the South.

The announcement of Mr. Jaekel's change created some surprise to those who were not conversant with the surroundings here. He has the reputation of being the best hotel man in this entire section of the country and the Jaekels, under his management, had had a successful career. The hotel was named after him and he was its main promoter. He held a large block of its stock and was elected president of the company. The traveling men for miles around would make it a point to come here on Sunday, in order to spend the day at "the Jaekel." Its proprietor seemed to have such a hold on the traveling public as did no other man in this section of the state. But there were other things connected with the hotel management that were not altogether pleasant. There were two factions holding stock. One faction was the friend of President Jaekel, while the other made no pretense to conceal their efforts to oust him. Mr. Jaekel and his faction held a majority of the stock until the death of Mr. J. W. Olliff. Then it was that a large block of stock changed to the other faction. While Mr. Jaekel held a lease for two more years, he saw the circumstances, and having a fine business offer he decided to take it up at this time.

Mr. C. R. Baggett, a brother-in-law of Mr. Jaekel, is at present in charge of the hotel, but this is understood to be only temporary. Mr. Jaekel has a number of offers for his furniture lease and will dispose of it soon.

Heavy Fighting at Stilson.

"Port Arthur" was again besieged Saturday night. This time the war broke out in the camps of the homefolks, so to speak. For years Messrs. H. C. Barnhill and J. E. Brown have been partners in the naval stores business at Stilson, the firm being known as Barnhill & Brown. Besides this the two members of the firm have been intimate friends for many years, but seeds of dissension fell among them and differences widened until Saturday afternoon, as report brings it, Mr. Barnhill and his son, one of whom was armed with a pistol, went over to Brown's headquarters, known in that section as "Port Arthur", and assailed him, beating him terribly. The fight lasted for some time, and threats of a renewal caused citizens to wire for the sheriff to come down. Sunday morning the trouble was renewed between Barnhill and Brown.

Mr. Brown has had the Barnhills arrested on a charge of assault and battery and attempt to murder.

KILLS WOULD-BE SLAYER

A merciless murderer is Appended with many victims. But Dr. King's New Life Pills kills it by prevention. They gently stimulate stomach, liver and bowels, preventing that clogging that invites appendicitis, curing Constipation, Biliousness, Chills, Malaria, Headache and Indigestion. 25c at W. H. If you want STYLE, QUALITY and FIT and wish to be a friend to your pocket-book you will surely look through our mammoth stock before buying. Our prices will do the rest.

Yours for low prices, E. C. Oliver.

A falling tiny nerve—no larger than the finest silk thread—takes from the heart its impulse, its power, its regularity. The stomach also has its hidden, or inside nerve. It was Dr. Shoop who first told us it was wrong to drug a weak or failing Stomach Heart or Kidney. His prescription—the Heart's impulse—is directed straight for the cause of these ailments—these weak and faltering inside nerves. This no doubt clearly explains why the Restorative has of late grown so rapidly in popularity. Druggists say that those who test the Restorative even for a few days: soon become fully convinced of its wonderful merit. Anyway, don't drug the organ. Treating the cause of sickness is the only sensible and successful way. Sold by W. H. Ellis Co.

WOMAN BURNED TO A CRISP

Sad Death of Mrs. Joe Woods, After Suffering Severe Burns, Pleads For Husband Who Was In Jail.

One of the saddest occurrences that has happened in this county in many a day was the burning of Mrs. Joe Woods at her home near Portal Saturday.

While there was no one present at the time except two small children, one of which was just beginning to walk, the circumstances show the following. The clothing of the unfortunate lady seemed to have caught from the open fire place, it seemed that when she became enveloped with the raging flames she ran out of the house into the yard where every vestige of clothing she wore burned off of her, even down to her shoes and there they were almost burned off. The ashes and scorched pieces of clothing lying around in the yard told the tale of the terrible struggle, which ended in her death five hours later. It seemed that after her clothing burned off she got back into the house where she was found by some of the neighbors about one hour after the accident was supposed to have occurred.

One of the children was large enough to run to a neighbors house a half mile away and let them know that something wrong had happened to its mother. The neighbors gathered in, a physician was summoned but the unfortunate woman was burned beyond any possibility of recovery, in addition to her clothing being burned off there were great cracks all over her body where the crisp skin had parted and the flesh burned to the bone.

When reached she was sufficiently conscious to plead to see her husband who was an inmate of the jail at this place under conviction for murder. She pleaded that he might be permitted to come to her bedside before she passed away. Some of the neighbors hurried to town and brought the message, unfortunately the sheriff was out of town for the day and the deputies could not take the responsibility to take out a man resting under so serious a charge without his consent, but had been here she would have breathed her last before her husband could have reached her.

Sheriff Kendrick arrived home on Saturday afternoon, and took the matter of getting her husband to her at once but learned she was already dead, so on Sunday morning he was taken out in a carriage along with him went Sheriff Kendrick, Deputies Albert Kendrick and C. E. Donaldson. The sheriff states that the scene when Woods met the burned corpse of his wife beggared description, the condemned man broke down and wept bitterly for the loss of the little woman who had been true to him for all these long months. Parties living on the road between Statesboro and her home became accustomed to see her pass regularly every Sunday coming to town to spend Sunday with her husband who was in jail here, she always prepared him something to eat and brought it along.

The remains were interred yesterday at Paynes Chapel church, a platform of the heart. Dignity what you eat.

Arrested for Assault.

Saturday morning Deputy Sheriff P. L. Anderson brought in Robert Williams, an aged white man and lodged him in jail on a charge of assault and intent to rape on the person of his step-daughter.

The outrage was committed, it is alleged, about a year ago and the old man had been in hiding over in Toombs county. He had been slipping back home from time to time, and this seems to be what brought about his arrest. There did not seem to be any special demand for his arrest, had he remained away.

He will be given trial at the next term of Superior court.

Six Months on Gang.

The News reporter got the sentence of Oliver Finch incorrect last week. Instead of \$300 and six months in jail, it should be \$300 and six months on the chaingang.

The defendant has made a motion for a new trial as stated in our last issue.

Kodol For Indigestion.

Relieves sour stomach, restores normal action of the bowels, digests what you eat.

Bank of Statesboro, Statesboro, Ga.

OFFICERS:
J. L. COLEMAN, Pres. W. C. PARKER, V. Pres.
S. C. GROOVER, Cashier.

Two White Men on Gang.

Superintendent Cox of the county chaingang took out with him Jesse Burkhalter and Den Smokes, two white men, who will serve terms of six months each.

Burkhalter is the young man who convicted of stealing a pair of shoes from the boarding house which had given him shelter, and Smokes is the man who got drunk on a pint of blind tiger whiskey alleged to have been bought from John E. Waters and got pulled with a pistol on him.

The county authorities extended every opportunity for these young men to pay out. They are a burden to the camp, for the authorities are not very well prepared to take care of white men and keep them separated from the negroes as they are compelled by law to do. But there was nothing doing in the way of paying out, and there was nothing left but to take them out.
