Horses, Mules

A car load of desirable Horses and Mules. Some splendid drivers, priced very low. Also, some young breeding fillies at about on half their grown value.

OUTLANDS

The Arab Steed.

An Arab steed of pure breed would probably be outpacing in a race by an English thoroughbred, but in other respects it outshines its western rival. It is so docile that it is treated by its owner as one of the family, and it is an iron constitution, for it sleeps out at night without covering or shelter. Nature protects the Arab horse with a thick furry coat, which is never touched by brush or comb and which falls off at the approach of spring, when the body and legs, which had been shaggy as those of a bear, again resume their graceful beauty and gladden in the sun like polished marble—London Chronicle.

Drums.

A well made drum consists of 245 pounds, not including the sticks, books and belt.

GEORGE M. BRINSON, President.

ALL DEMOCRATS FOLLOW WILSON

Lauded For Manner In Which They Take Their Medicine.

SOME OPPOSE THE PROGRAM

But For Party Harmony They Keep Quiet and Obey Orders, Showing That There Are Some Good Democrats in Their Ranks—Marshall Almost Sure to Be on Ticket.

By ARTHUR W. DUNN.

Washington. (Special.)—The Democrats are to be congratulated for the manner in which they are taking their medicine and doing the thing they do not like because they are told to support the president.

Or course it is well known that a large number of the Democrats in both houses do not agree with the president's plan for preparedness and would like to vote against it, but they are well disciplined—they obey orders. The Democrats of the senate do not like to confirm Brandeis for associate justice of the supreme court, but they are going to do it.

Democrats in both houses are not over postal conditions, but they are going to try to enact the postal legislation which the postmaster general has requested. And so it goes down the line.

Must Take Marshall. Left to a vote of the senate only a few Democratic senators would want Tom Marshall for a second term in the vice president's chair, but it is said that a hint has gone forth from the White House that Marshall is to be renominated. The president thinks that the old ticket will be about the right combination.

More especially in this true blue he has learned something about the situation in Indiana, which convinces him that to throw Marshall over at this time would be most unsatisfactory to the Hoosiers. There are a lot of Democrats in Indiana who do not share the aversion which some of the Democratic leaders in other parts of the country seem to feel for Marshall. It is a good sign that the old ticket will be nominated at St. Louis.

Irrigation Not Failure. Champ Clark radically differs with those who say the federal irrigation law is a failure. "I am one of the men that put up that irrigation scheme," the speaker told the house.

Not at This Time. Senator Clapp introduced and the committee has reported a number of bills which would greatly curtail the political activity of men in public life. One is for the publication of campaign expenses; another makes it unlawful for a member of congress to solicit campaign funds and prohibits a member of congress from serving on a campaign committee; and another limits the amount to be contributed to a presidential campaign. These are all reform bills; but, although they have been favorably considered by the committee, it is doubtful whether they will become laws before the coming election.

Not Kitchen's Cue. There were two big things in the day relating to preparedness under discussion in the house, and yet the leader of the house took no part in the proceedings. Leader Kitchin did not seem to think it was his cue. In fact, the probabilities are that he will not go much further than to make one general speech against the preparedness program and let his opposition rest.

Education Versus Roads. There was a discussion in the senate about land grants to states for schools and roads. Mark Smith of Arizona broke in, saying:

"I would rather have an educated man walking through mud than an uneducated man riding in an automobile."

Must Have Been Fierce. During recent ceremonies in the old hall of the house of representatives the men who strained their ears with the vilification of the representatives were ever able to transact business. That hall has the record of being the worst public place for speakers that ever existed.

Terrible Croup Attack Quickly Repulsed By Old Reliable Remedy

Well known Georgia store keeper has minor croup and colds for his family of ten with *Poley's Honey and Tar Compound*.

The minute that hoarse, terrifying croup cough is heard in the house, out comes *Poley's Honey and Tar Compound*.—There's always a bottle ready.

Here's what he says: "I have a girl, aged eight, and six years respectively. I completely cured them with *Poley's Honey and Tar Compound*. I have ten in family and for years I've used *Poley's Honey and Tar Compound* and the last does it all at 60c as the first. Get the genuine."

Keep *Poley's Honey and Tar Compound* always on hand in your home. Don't lose a long time—It's reliable and safe—and the last does it all at 60c as the first. Get the genuine.

Education Versus Roads. There was a discussion in the senate about land grants to states for schools and roads. Mark Smith of Arizona broke in, saying:

"I would rather have an educated man walking through mud than an uneducated man riding in an automobile."

Get a Fresh Start!

For men who got away to a false start on a pipe or home-made cigarettes Prince Albert has a word or two for what ails their smokeappetites!

Forget you ever tried to smoke, for Prince Albert is so different, such a fine flavor, so cool and cheerful and friendly, you'll get a new idea of smoke joy! The patented process fixes that—and cuts out bite and parch!

And this little preachment is also for men who think they're on the right track. All to be said is that the sooner you lay out a nickel or a dime for a supply of Prince Albert, the sooner you'll make a discovery that'll be worth a lot to your peace of mind and tongue!

Get the idea of smoking all you want without a comeback—that's P. A.!

R. J. REYNOLDS TOBACCO CO., Winston-Salem, N. C.

Cotton. PEARCE & BATEY, the reliable and substantial Cotton Factors, of Savannah, are in position to finance, in accordance with good policy, practically any quantity of cotton placed with them—whether for prompt sale or on hold. 9-23-4m

Saving the Carpet. Mistake! Good heavens, Jane, why is this bucket hanging on the gas bracket? Jane—Well, mum, you told me this morning the gas was leaking, and so I've hung up the bucket to catch it. London Answers.

Rank Foolishness. You occasionally see it stated that colds do not result from cold weather. That is rank foolishness. Were it true, colds would be as prevalent in midsummer as in midwinter. The microbes that cause colds flourish in damp, cold weather. To get rid of a cold take Chamberlain's Cough Remedy. It is effective and highly recommended by people who have used it for many years, as occasion required, and know its real value. Obtainable everywhere.—Adv.

Cause For Gladness. The pessimist was suffering from rheumatism. "Every bone in my body aches," he complained. "You ought to be glad you are not a herring," said the optimist.—Life.

For a mild, easy action of the bowels try Doan's Regulents, a modern laxative. 25c, at all stores.—Adv.

Piling It On. "Tough luck. I could hardly find work enough to keep myself occupied." "And now?" "Now they have given me an assistant."—Detroit News.

OPEN NOSTRI! END A COLD OR CATARRH

How To Get Relief When Head and Nose are Stuffed Up.

Count! Your cold is head or catarrh disappears. Your clogged nostrils will open, the air passages of your head will clear and you can breathe freely. No more sneezing, hawking, mucous discharge, dryness or headache; no struggling for breath at night.

Get a small bottle of Ely's Cream Balm from your druggist and apply a little of this fragrant antiseptic cream to your nostrils. It penetrates through every air passage of the head, soothing and healing the swollen or inflamed mucous membrane, giving you instant relief. Head colds and catarrh yield the same. Don't stay sick and miserable. Relief is sure.

Must Have Been Fierce. During recent ceremonies in the old hall of the house of representatives the men who strained their ears with the vilification of the representatives were ever able to transact business. That hall has the record of being the worst public place for speakers that ever existed.

Education Versus Roads. There was a discussion in the senate about land grants to states for schools and roads. Mark Smith of Arizona broke in, saying:

"I would rather have an educated man walking through mud than an uneducated man riding in an automobile."

Farm and Garden

GARDEN STRAWBERRIES. Well Prepared Soil and Early Planting. Two things are essential for success with strawberries—well prepared soil and early planting. The earlier that strawberry plants can be got into the ground in spring the better. But give them an early start by the preparation of the beds should not be neglected. If that is slighted early planting and subsequent cultivation will both produce but small returns. It is best, then, to get to work on the strawberry bed at the earliest possible moment. As soon as the ground is in workable condition the soil should be deeply spaded and richly manured. Ordinarily the home strawberry bed is not large, and preparation accordingly can be to all the more thorough. It cannot, however, be too thorough. Two spadings, therefore, are better than one, as the bed through this double working will be more finely pulverized, while the manure will be more evenly distributed and more thoroughly incorporated with the soil. Fresh manure is to be avoided; its use is fatal. The best manure for the purpose is well rotted cow manure, and this should be used liberally. And finally the surface of the bed should be left in such condition so finely pul-

verized—that it could be used without further cultivation as a bed for the most exact, delicate or vegetable. Two methods of growing the berries present themselves for the gardener's choice. Either the hill or the narrow bed method may be employed. From the former the larger berries will be obtained, but at the sacrifice of runners for new stock, which are obtainable from the latter method. If the plants are set in hills plant them a foot apart and the row of hills two feet apart. In the hedge row system the plants are set a foot apart and the rows two feet apart, but two or three of the runners from each plant—the first to form—are allowed to root in the space between the rows. Close cultivation is essential from first to last, and if the plants demand more food than was incorporated in the beds before they were planted, a little nitrate of soda may be applied—at the rate of an ounce to the square yard—when the plants show signs of having taken on too bold a growth, and subsequently light dressings of bonemeal and wood ashes. At blossoming time again another dressing of nitrate of soda, applied in solution rather than in salt form, will increase the quantity of fruit and improve the quality.

No plant is more exacting than the strawberry when it comes to the matter of depth of planting. It is practically stemless, and there is danger therefore of its being set so deep that the terminal bud will be under ground. And there is the danger again, in avoiding this, of permitting the upper portions of the roots to emerge from the soil.

Rations For Laying Fowls. Give plenty of grain in the rations of the laying fowls. Mash in limited quantities may be fed also, but the layers will need grain. Wheat is an excellent grain for the layers. Caffin, milo and sorghum are also good. Not much corn should be fed, as this has a tendency to produce fat at the expense of laying.

NOTES ABOUT CORN. The average per acre yield of corn in the United States is about twenty-six bushels, not half a crop. Poor seed is the greatest cause of the poor yield of corn. Just one small cause of one acre of corn added to each hill will raise the average in the United States to fifty-two bushels per acre, double the yield and value of the crop and add about \$1,000,000,000 to its total value.

Corn from a standpoint of acreage yield and value exceeds every other crop. An abundant yield of Model 8 may be had for the dollar. Drop a card now to

Why pay Tire Bills for Others—i. e., for RECKLESS Drivers

AMERICANS who want their money's worth—who dislike to pay for the reckless-driving extravagance of Others—in the price of their own tires, should sit up and take notice of following FACTS:—

The current Goodrich "Fair-List" price on tires, is based upon what it costs the largest, and best equipped, Rubber Factory in America to produce them.

No "Insurance" Premium added to the NORMAL retail price of Goodrich Tires, in order to protect the Reckless Driver at the expense of the Careful Driver, through a fancy List Price which is high enough to absorb that Premium.

The excess Mileage each Goodrich Tire is reasonably certain to deliver, when given reasonable care in driving, thus becomes clear "Value" to the Owner of GOODRICH Tires.

Money can't make, and can't buy, better Tires of fabric construction, than Goodrich Safety-Tread Tires, as that will prove.

And, money can't buy this B. F. Goodrich Co. to produce Tires which would dissipate the 260 other lines of Rubber Goods made by the B. F. Goodrich Co., for which its name stands Sponsor.

COMPARE prices on Goodrich "Fair-List" Tires with present prices on any other responsible Tires in the field, bearing in mind that NO "LARGER SIZED" Tires (type for type and size for size) than Goodrich Black-Treads, are made in America.

Then, Test out at least ONE pair of Goodrich Black-Tread Tires, on their non-DELIVERED-Mile cost to you, against any other Tires in the field, at any price, and—able by the Result.

Why (if YOU are not a Reckless Driver) should YOU pay MORE than the "BUSINESS" price of the Goodrich Tire, for ANY Fabric Tire in the field?

Get a silver of the new Goodrich "Barefoot" Rubber from your nearest Goodrich Dealer or Branch.

THE B. F. GOODRICH CO. Akron, Ohio.

NOTICE. "No Concern in America made, or sold, during the time of year, really or many Motorists of the B. F. Goodrich Co."

Words Often Misspelled. Here are twenty-one common words frequently misspelled. Get some one to dictate the following paragraph to you and see how many of them you can spell correctly:

"The privilege" of "separating ninety miscellaneous letters" arranged in two "parallel" lines was against the "principles" of the "superintendent," so his "deeds" not to "disappoint" the "governments" or cause it to "lose business" removed the "principal" elements and thus "relieved" his uncle of a strain which might have brought on an "ailment." Then she "believed" had become "truly necessary" for her to "receive" her instruction in "gram mar."—American Boy.

How to Prevent Croup. When the child is subject to attacks of croup, see to it that he eats a light evening meal, as an overloaded stomach may cause an attack; also watch for the first symptom—hoarseness, and give Chamberlain's Cough Remedy as soon as the child becomes hoarse. Obtainable every where.—Adv.

Why Chilly Weather BRINGS RHEUMATISM

Says skin pores are closed and uric acid remains in blood.

Rheumatism is no respecter of age, sex, color or rank. It is the most dangerous of human afflictions. It is one of the most painful. Those subject to rheumatism should eat less meat, dress as warmly as possible, avoid undue exposure and, above all, drink lots of pure water.

Rheumatism is caused by uric acid which is generated in the bowels and absorbed into the blood. It is the function of the kidneys to filter this acid from the blood and cast it out in the urine; the pores of the skin are also a means of removing the blood of this acid. In damp and chilly, cold weather the skin pores are closed thus forcing the uric acid to do damage through the system, causing inflammation, soreness and muscle cramps, stiffness, and finally, in severe cases, paralysis.

At the first signs of rheumatism get from any pharmacy about four ounces of Jad Salts; put a tablespoonful in a glass of water and drink before breakfast each morning for a week. This is said to eliminate uric acid by stimulating the kidneys to normal action, thus ridding the blood of these impurities.

Jad Salts is inexpensive, harmless and is made from the acid of grapes and lemon juice, combined with lithia and used with excellent results by thousands of folks who are subject to rheumatism. Here you have a quantity of pure water which overcomes uric acid and is beneficial to your kidneys as well.

DR. LYMAN ABBOTT ON PATRIOTISM

A nation is made great, not by its fruitful acres, but by the men who cultivate them; not by its great forest, but by the men who use them; not by its railways, but by the men who build and run them. America was a great land when Columbus discovered it; Americans have made of it a great Nation.

In 1776 our fathers had a vision of a new Nation "conceived in liberty and dedicated to the position that all men are created equal." Without an army they fought the greatest of existing world empires that they might realize this vision. A third of a century later, without a navy they fought the greatest navy in the world that they might win for their Nation the freedom of the seas. Half a century later they fought through an unparalleled Civil War that they might establish for all time on this continent the inalienable right of life, liberty, and the pursuit of happiness. A third of a century later they fought to emancipate an oppressed neighbor, and, victory won, gave back Cuba and the Cubans, sent an army of schoolmasters to educate for liberty the Filipinos, asked no war indemnity from their vanquished enemy, but paid him liberally for his property. Meanwhile they offered land freely to any farmer who would live upon and cultivate it, open to foreign immigrants on equal terms the door of industrial opportunity, shared with them political equality, and provided by universal taxation for universal education.

The cynic who can see in this history only a theme for his egotistical satire is no true American, whatever his parentage, whatever his birthplace. He who looks with pride upon this history which his fathers have written by their heroic deeds, who accepts with gratitude the inheritance which they have bequeathed to him, and who highly resolves to preserve this inheritance unimpaired and to pass it on to his descendants enlarge and enrich, is a true American, be his birthplace or his parentage what it may.

LYMAN ABBOTT.

Take This for Lagrippe Coughs.

The danger of lagrippe lies in its danger to develop pneumonia, and the March death record from pneumonia is appalling. Stop your cold before it reaches the danger point, and take Foley's Honey and Tar Compound. Mr. W. P. Bowen, Jims, Ga., writes: "I had a terrible attack of lagrippe, aches and pains all over my body, and a dry, hacking lagrippe cough. I began taking Foley's Honey and Tar and when I had taken one bottle my cough was cured, my cold was well." Bullock Drug Co.

Pineapples.

Pineapples first reached England in the latter part of the seventeenth century. The fruit was thus a novelty to Sir Christopher Wren's generation, but he soon recognized its value as an architectural ornament, and copper pineapple about five feet high figure prominently on the towers of St. Paul's. So highly did Wren esteem the fine proportions and enriched surface of this fruit that his original design for St. Paul's shows an enormous pineapple in the place of the dome. Happily his matured thoughts saved us from that appalling spectacle. Since Wren the pineapple has been as much at home in our architecture as on our dinner tables.—London Mail.

Sign of Good Digestion.

When you see a cheerful and happy old lady you may know that she has a good digestion. If your digestion is impaired or if you do not relish your meals take a dose of Chamberlain's Tablets. They strengthen the stomach, improve the digestion and cause a gentle movement of the bowels. Obtainable everywhere.—Adv.

WORLD'S LEADING TOBACCO TOWN.

Winston-Salem, N. C. Now Manufactures More Tobacco Products Than Any Other City in the World.

Following are extracts from an address delivered by Col. A. D. Watts, Collector of Internal Revenue for the Fifth District of North Carolina, at a smoker given at The Twin City Club, Winston-Salem, February 4th, 1916.

Some Comparisons

Winston-Salem is supplying one-fourth of all the chewing and smoking tobacco consumed in the United States besides exporting vast quantities to foreign lands. This statement is taken from the report of the Commissioner of Internal Revenue for the first quarter of the present fiscal year and from private advices from Washington, as to the second quarter, which end on December 31st, last.

Your City is making one-seventh of all tobacco products—chewing and smoking tobacco, cigars, cigarettes and snuff,—manufactured in the United States. Your manufacturers are paying on an average about \$37,000 a day revenue taxes to the government and the amount is increasing from month to month. When your government building, much the handsomest in the State was completed last July at the cost of \$250,000 your city to Uncle Sam for the first eight days of its occupancy would pay for it. Since September, it has taken only a fraction over seven average days collections here to equal its cost. So far this week Mr. Cranford has taken in \$206, 428.50. I predict that before 1916 shall have ended your average weekly payments to the government on tobacco will more than pay for this magnificent building, leaving the collections for the other fifty-one weeks as clear profit to the government.

Tobacco Shipment.

Winston-Salem is shipping on an average each week day to all parts of this country and to foreign lands at least \$150,000 of tobacco products.

In conclusion, Winston-Salem manufactures more tobacco, all tobacco products are taken into this statement, than any other city on earth, little or big. Industrially, she is easily first in North Carolina, population considered, first in America and I believe, in the world; socially, a never failing delight to her friends."

Hopes Women Will Adopt This Habit As Well As Men

Glass of hot water each morning helps us look and feel clean, sweet, fresh.

Happy, bright, alert—vigorous and vivacious—a good clear skin, a natural, rosy complexion and freedom from illness are assured only by clean, healthy blood. If only every woman and likewise every man could realize the wonders of the morning inside bath, what a gratifying change would take place.

Instead of the thousands of sickly, anaemic-looking men, women and girls with pasty or muddy complexions; instead of the multitudes of "nervous wrecks," "run-downs," "brain fags" and pessimists who should see a little, optimistic throng of rosy-cheeked people everywhere.

An inside bath is had by drinking, each morning before breakfast, a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver, kidneys and ten yards of bowels the poisons and tenacious waste, sour, fermentations and poisons, thus putting more food into the stomach. Those subject to sick headache, biliousness, constipation and who have colds, and particularly those who have a rapid, shallow complexion and who are constituted very often, are urged to obtain a quarter point of limestone phosphate at the drug store which will cost but a trifle but is sufficient to demonstrate the quick and remarkable change in both health and appearance awaiting those who practice internal sanitation. We must remember that inside cleanliness is more important than outside, because the skin does not absorb impurities to contaminate the blood, while the pores in the thirty feet of bowels do.

SIX OLD LADIES REGAIN HEALTH

Famous Medicine Accomplishes Much in Treating Infirmities of Old Age

For the past year or so, several of the more elderly ladies of the Old Ladies' Home on Rutledge Pike, Knoxville, Tenn., have been in very feeble, delicate state of health, bordering at times on what might be termed a general decline. Their failing health was due, no doubt, in a large measure to the general infirmities of advanced age, and although they received every possible care and attention, they seemed to be beyond the treatment ordinarily administered in such cases.

At the suggestion of Mrs. Cul-ton, the matron of the institution, they concluded to try Tanlac and it was a happy decision indeed when they did so. The reconstructive powers of the medicine were at once in evidence. They began almost immediately to feel better, eat better and rest better. Since that time the treatment has been continued with the most astonishing and gratifying results, but let them tell their own stories in their own way. Their statements are profoundly interesting.

Mrs. Houser was one of the first to use the medicine, and, being at a very advanced age, her trouble had been more persistent and difficult to treat, perhaps, than any of the others. Mrs. Houser said: "I have been in a very weak, nervous state for several years and have suffered principally from stomach trouble. I would go for months at a time without eating any solid food and, up to a short time ago, spent most of my time in my room, as I was too weak to come downstairs. I ate some corn bread and spare ribs for dinner to-day and they seemed to agree with me perfectly, as I have suffered no bad after-effects whatever. The horrible headaches and nervousness are gone and I am feeling so much better in every way."

Mrs. Martin, who was the next to testify, said:

"I have suffered a great deal from hard, darting pains in my head and ever have a pain now, the stomach no longer troubles me and my appetite is much better."

Mrs. Fink said:

"I was sick all last summer and I now feel stronger and better than in months. I no longer suffer from the headaches I had so much."

Mrs. Wallis seemed to be especially delicate and had a very weak constitution and weak stomach. Mrs. Wallis said:

"In only one week after taking your medicine I began to feel greatly improved. I feel very much stronger, enjoy my meals more and seem to rest better at night. I expect to continue taking Tanlac."

In referring to the above statements, Mr. G. F. Willis, who is now personally directing the introduction of Tanlac throughout the South, said:

"I consider the statements of these old ladies the most remarkable that have ever come under my observation. I do not hesitate to say that I believe these endorsements to be the strongest that have ever been received by a proprietary medicine of any character."

Quoting from one of Mr. Cooper's lectures, Mr. Willis said:

"When people grow to a ripe old age, their digestive organs lack vitality, and begin to act more slowly and less effectively than in youth. The circulation becomes poor, the blood gets thin, the appetite fails and the digestion weak."

"Tanlac, the powerful reconstructive tonic, is the ideal strengthener and body builder for old folks, because it creates a good healthy appetite, strengthens digestion, enriches the blood and in this natural manner builds up, strengthens and invigorates feeble,

Luke McLuke Says:
When a man goes out to dinner at the house of a friend where he has to put on a lot of dog at the table the first thing he does when he gets back to his own house is to risk the kitchen for something to eat.
Try to live so that your conscience will be a cheerful companion and you will be a pretty good citizen.
Once in awhile the great American jury tries of sitting in judgment on the war in Europe. But the business of deciding how John D. Rockefeller ought to spend his money is always in order.
A man can be a good neighbor and yet do a lot of robbing when the people next door happen to break their phonograph.
Caution people are not such a bad lot. Lots of our governors have been men who couldn't even govern their wives.
Once upon a time there was a man who never forgot to mail a letter that his wife gave him. But he never lived with.

It isn't a nice thing to say. But on the level, things have come to a point where a girl seems to fear that she will be regarded as old fashioned if she acts effeminate.
The fellow who is always telling you that he would share his last dollar with you never seems to have a dollar when you are around.
A girl always believes that she will be sure to scream when a man kisses her for the first time. But when the occasion arrives the best she can do is to scream inwardly.

Wise Planning Cuts Cost

The question is not, Can we afford plumbing? You must have it, if you have come to the front and joined the class of clean, alert, alive and up-to-date.

The question is, How to get modern plumbing at the right price?

By our experience we know how to plan plumbing so as to cut out unnecessary material and labor of installing and this in connection with a suitable choice of "Standard" plumbing fixtures means

A Good Job at its Lowest Cost.

Judge for yourself from our estimate.

7. Monologue—How Jacob Sot a Hen.
8. Song—By the "Rag Bag" Choir.

Don't forget the date March the 11th and there is no admission charged.

BERTHA DOWELL, Teacher.

NOT ENOUGH CHILDREN

ever receive the proper balance of food to sufficiently nourish both body and brain during the growing period when nature's demands are greater than in mature life. This is shown in so many pale faces, lean bodies, frequent colds, and lack of ambition.

For all such children we say with unmitigated earnestness: They need Scott's Emulsion, and need it now. It possesses in concentrated form the very food elements to enrich their blood. It changes weakness to strength; it makes them sturdy and strong. No alcohol.

Scott & Bowne, Bloomfield, N. J.

A Card From Mr. McElveen.

To the Public:
I desire thru the columns of the News to thank those friends who supported me so loyally in my race for tax collector. I know, if I should have been elected, I could not feel more appreciative. Indeed, I feel greatly complimented that I made so creditable a showing along with the concededly strong men who were my opponents.

I congratulate my opponents and the public generally for a campaign pitched upon a high plane, without out whiskey or money.

I congratulate Mr. Hodges, my winning opponent, upon his success, and I feel that the county is to be congratulated upon his selection. The vote he received might properly be termed a vote of confidence in a sober, clean and competent young man. May all our sons be such.

To all my fellow citizens, including the stranger, I am home at Areola, with the late spring on the outside; if I can serve you command me.

With best wishes for all and malice toward none, I beg to remain, Gratefully yours,
—Adv. P. R. McELVEEN.

To the Citizens of Bulloch County:
I am most grateful to you I desire to thank every man who stood by me in my recent election of March 9th. I shall ever deeply appreciate your interest and consideration in me and the cause that I am most interested in.

To those who saw fit to cast their ballots against me, I have no criticism or unkind feeling. I have always realized that you selected good men to oppose me. But in my future work I shall endeavor to be just to all in every particular, all things taken into consideration.

I want to see every school in this county a standard school, and if we get the co-operation of the several communities, we are going to have every school a standard school during the time you have seen fit to grant me. Again I thank you. Respectfully,
B. R. OLLIFF.

I wish to thank the teachers of this county for their tribute of appreciation in the form of the beautiful present presented by Prof. Langston last Saturday. I shall keep this token as a relic so long as I live. Teachers, I certainly do thank you for your kindly consideration and for your hearty co-operation. It is through you largely that we are to accomplish all good in the future as well as in the past.

What we have been able to do in the past. Your friend,
B. R. OLLIFF.

To the People of Bulloch County:
Since it is impossible for me to see each voter personally, I have taken this method of trying to express my appreciation for the support given me in my race for tax collector by the people of this county in the primary just held. All the people have treated me very kindly during my canvass of the county including those who could not support me as well as those who did.

It is my desire to so attend to the duties of the office of tax collector that words to show my appreciation of your support will be unnecessary. If I can discharge the duties of the office in a way that will fully satisfy the tax payers of Bulloch county, I will feel that I have shown my appreciation in a way that will mean more to you than any mere words that I might use. Very respectfully,
FRED W. HODGES.

HON. RAFFA SIMMONS BAY DISTRICT ADDRESS

Urges People To Support The Building of The Packing Plant
SAYS WILL BENEFIT EVERYBODY

In a talk to the citizens of the Bay District, at Donaldson school last Friday, March 17, Mr. Raffa Simmons urged the farmers to join in the effort that is being made to build a packing house in the county.

Mr. Simmons began his talk by telling of the difficulties that were encountered in building the first railroad to Statesboro some years ago. He said that only a few were interested in the project at first, and many were opposed to it, while he and those who wanted it had just taken the advice of the others the road would never have been built. But finally, the few who did want it put some money into and encouraged it in other ways, and the railroad was built and proved to be a great help to everybody—merchants, farmers and everybody.

"Why, I could not do business without railroads," said Mr. Simmons. "We not only got one, but we got another and another, and now we have a network of roads that get goods from New York as cheap as it used to cost us to haul from Dover. Why, suppose we did not have a railroad in Bulloch county today. We could not do anything like the business we do now. Our business has increased our business immensely, and, as I understand it, this packing plant will do as much to increase our stock raising as the railroads did to increase our general business. And we need it now. We don't want to put it off and keep it away as we tried to keep the railroads away. Judge Cone says we need this packing plant to help our children. I tell you we need it for ourselves. We are losing money on cotton and tenants. We have bought guano to raise cotton with, and have fooled with negro tenants until we are all about broke. I have given up and now there are a thousand men in this county who can take a share in this plant; some of you can go in together and two of you take a share. There are a whole lot in this district who can take five shares in this plant, and there are ten men in the county who can take five thousand dollars apiece in this packing plant. It is a good investment. I am told on good authority that the packing plants are paying all over the country, and that the one at Moultrie is paying big dividends. The one in Atlanta has made the man rich who owns it."

"And now, everybody has got to help get this plant. We have just got to have it, and you people get four or five good men to go through this district and get subscriptions from everybody and I will be one of two hundred to make a subscription from this district. The payments are easy. I believe the farmers are to pay 25 per cent, when the plant is organized, and the balance next fall and winter some time. All of you can help on that kind of terms."

"Now, some of you will say you are mighty poor, but you won't be any better off than

people went to sleep and let New England spin all our cotton for years. All we had to do with it was to raise it, ship it up there and they shipped it back to us in cloth and charged us fifty cents a pound for the cloth. But we finally woke up, and now we are spinning our own cotton and shipping the cloth instead of the cotton. It will be the same with this meat. We can raise the hogs cheaper than they can in the West, and we will be shipping our meat away instead of buying it as we do now. We have the soil here in Bulloch county to raise the feed on, if we only can get a market for the hogs."

"I tell you, my friends, we have got to do something. We are going down as it is, but when the boll weevil comes, our land is gone, and I don't see any escape unless we build this plant. I have tried to ignore the boll weevil, but it is coming. A man from the boll weevil section told me the other day in Savannah that they had been cut down to 150 bales. It is up to us now, when that comes, it is all up with us. The boll weevil is already in South Georgia and will get to us soon, and we had better prepare for war in time of peace. The work you are doing now, don't amount to much. You can't get over six or eight cents a pound for it, and you can't sell much of it at that, but with the packing plant you can sell all you can raise, sell it any time, and get the standard market price for it. Judge Cone says you can then sell it in June, July or any other time, and that is easy and simple."

"Now, some of you say you are hard up and cannot take any stock in this packing plant. I notice this, that you are always able to raise money to buy your neighbor's land when the sheriff sells him out. You can always raise money or give a note for guano, as much as you want. Now there are a thousand men in this county who can take a share in this plant; some of you can go in together and two of you take a share. There are a whole lot in this district who can take five shares in this plant, and there are ten men in the county who can take five thousand dollars apiece in this packing plant. It is a good investment. I am told on good authority that the packing plants are paying all over the country, and that the one at Moultrie is paying big dividends. The one in Atlanta has made the man rich who owns it."

"And now, everybody has got to help get this plant. We have just got to have it, and you people get four or five good men to go through this district and get subscriptions from everybody and I will be one of two hundred to make a subscription from this district. The payments are easy. I believe the farmers are to pay 25 per cent, when the plant is organized, and the balance next fall and winter some time. All of you can help on that kind of terms."

"Now, some of you will say you are mighty poor, but you won't be any better off than

Now there are a thousand men in this county who can take a share in this plant; some of you can go in together and two of you take a share. There are a whole lot in this district who can take five shares in this plant, and there are ten men in the county who can take five thousand dollars apiece in this packing plant. It is a good investment. I am told on good authority that the packing plants are paying all over the country, and that the one at Moultrie is paying big dividends. The one in Atlanta has made the man rich who owns it."

"And now, everybody has got to help get this plant. We have just got to have it, and you people get four or five good men to go through this district and get subscriptions from everybody and I will be one of two hundred to make a subscription from this district. The payments are easy. I believe the farmers are to pay 25 per cent, when the plant is organized, and the balance next fall and winter some time. All of you can help on that kind of terms."

"Now, some of you will say you are mighty poor, but you won't be any better off than

people went to sleep and let New England spin all our cotton for years. All we had to do with it was to raise it, ship it up there and they shipped it back to us in cloth and charged us fifty cents a pound for the cloth. But we finally woke up, and now we are spinning our own cotton and shipping the cloth instead of the cotton. It will be the same with this meat. We can raise the hogs cheaper than they can in the West, and we will be shipping our meat away instead of buying it as we do now. We have the soil here in Bulloch county to raise the feed on, if we only can get a market for the hogs."

"I tell you, my friends, we have got to do something. We are going down as it is, but when the boll weevil comes, our land is gone, and I don't see any escape unless we build this plant. I have tried to ignore the boll weevil, but it is coming. A man from the boll weevil section told me the other day in Savannah that they had been cut down to 150 bales. It is up to us now, when that comes, it is all up with us. The boll weevil is already in South Georgia and will get to us soon, and we had better prepare for war in time of peace. The work you are doing now, don't amount to much. You can't get over six or eight cents a pound for it, and you can't sell much of it at that, but with the packing plant you can sell all you can raise, sell it any time, and get the standard market price for it. Judge Cone says you can then sell it in June, July or any other time, and that is easy and simple."

"Now, some of you say you are hard up and cannot take any stock in this packing plant. I notice this, that you are always able to raise money to buy your neighbor's land when the sheriff sells him out. You can always raise money or give a note for guano, as much as you want. Now there are a thousand men in this county who can take a share in this plant; some of you can go in together and two of you take a share. There are a whole lot in this district who can take five shares in this plant, and there are ten men in the county who can take five thousand dollars apiece in this packing plant. It is a good investment. I am told on good authority that the packing plants are paying all over the country, and that the one at Moultrie is paying big dividends. Statesboro, Georgia, Thursday, March 23, 1916.

Vol. 16 No. 2

HON. RAFFA SIMMONS BAY DISTRICT ADDRESS

Urges People To Support The Building of The Packing Plant
SAYS WILL BENEFIT EVERYBODY

In a talk to the citizens of the Bay District, at Donaldson school last Friday, March 17, Mr. Raffa Simmons urged the farmers to join in the effort that is being made to build a packing house in the county.

Mr. Simmons began his talk by telling of the difficulties that were encountered in building the first railroad to Statesboro some years ago. He said that only a few were interested in the project at first, and many were opposed to it, while he and those who wanted it had just taken the advice of the others the road would never have been built. But finally, the few who did want it put some money into and encouraged it in other ways, and the railroad was built and proved to be a great help to everybody—merchants, farmers and everybody.

"Why, I could not do business without railroads," said Mr. Simmons. "We not only got one, but we got another and another, and now we have a network of roads that get goods from New York as cheap as it used to cost us to haul from Dover. Why, suppose we did not have a railroad in Bulloch county today. We could not do anything like the business we do now. Our business has increased our business immensely, and, as I understand it, this packing plant will do as much to increase our stock raising as the railroads did to increase our general business. And we need it now. We don't want to put it off and keep it away as we tried to keep the railroads away. Judge Cone says we need this packing plant to help our children. I tell you we need it for ourselves. We are losing money on cotton and tenants. We have bought guano to raise cotton with, and have fooled with negro tenants until we are all about broke. I have given up and now there are a thousand men in this county who can take a share in this plant; some of you can go in together and two of you take a share. There are a whole lot in this district who can take five shares in this plant, and there are ten men in the county who can take five thousand dollars apiece in this packing plant. It is a good investment. I am told on good authority that the packing plants are paying all over the country, and that the one at Moultrie is paying big dividends. The one in Atlanta has made the man rich who owns it."

"And now, everybody has got to help get this plant. We have just got to have it, and you people get four or five good men to go through this district and get subscriptions from everybody and I will be one of two hundred to make a subscription from this district. RAILROADS STILL HOPE FOR PAY.

Mail Carrying Increase Matter Now In Hands Of Congress.

Atlanta, Ga., March 22nd.—Leading railroad officials of this section are still looking without entire loss of hope toward some action by congress which will put the much discussed railway mail pay situation on a more enduring basis.

The entire subject of readjusting the compensation of the roads for carrying the mail is now in the hands of congress, and the railroad men express the earnest hope that until some adequate steps are taken by the legislative branch of the government to insure that hereafter the payment shall be upon a fair basis for service rendered, the executive department of the government will at least refrain from imposing additional burdens on the railroads.

The railroad men are counting much on the expression of Mr. Wilson in his letter to Secretary McAdoo on the opening of the federal reserve banks when he said, "No doubt in the light of the new day with its new understanding, the problems of the railroads will be met and dealt with in a spirit of candor and justice."

"And now, everybody has got to help get this plant. We have just got to have it, and you people get four or five good men to go through this district and get subscriptions from everybody and I will be one of two hundred to make a subscription from this district. The payments are easy. I believe the farmers are to pay 25 per cent, when the plant is organized, and the balance next fall and winter some time. All of you can help on that kind of terms."
