is a well known fact that the large majority of High School students never attend college. Their education, so far as schools are concerned, ends with the High School. This being the case, it seems to me that the High School course of study should be planned more with reference to the needs of the great body of students who end their school days with the High School. The few students who receive their High School diplomas, that is, the few who are exceptional and favored few who are permitted to go to the university or the college, are the exception. It is not the case. The men who are the curricula of our High Schools are planned with reference to the preparation for entrance to college. Our High Schools are thus treated entirely as if they were mere "feeders" to higher

From a packing house will flow ready returns throughout the twelve months of the calendar. It will furnish the farmer with a ready market. It will provide him, furthermore, with a means of breaking the shackles imposed by cotton farming. If the boll weevil destroys his crop, if his farm is devastated by this pest, there will still be his corn, and it has been well and profitably said that pigs and corn go ear-and-ear. And where here is hog-and-pigging there is also a well fed, prosperous farmer—a prosperous, progressive community overall.

This is a matter that is of vital concern to every person earning a livelihood in Macon, just as much as it in-

Football Notes

F. D. A. S.

Breaks Even With Richmond Academy at Augusta

The Richmond Academy aggregation put up a great fight against odds yesterday at Warren Park, holding the heavy First District Aggies to a 0-0 score. The Statesboro bunch outwitted the local prep approximately fifteen pounds to the man. In spite of this, Hitecock's charges held them for down time and again and came dangerously near scoring on more than one occasion.

From the standpoint of the football expert there were many things to criticize in the play of both teams. The Aggies played straight football throughout, never mixing it up with anything that looked like open play. With their superior weight, which enabled them to make huge gains thru the line, they would have had little difficulty in securing the victory had they cut loose with a more varied assortment of plays. It was "back the line" with them all the way thru with an occasional end run that did not have in it any of the elements of the unusual.

In the first half, after the teams had scuffled back and forth down the field, the Aggies by a series of line rushes, carried the ball to Richmond's fifth yard line, losing it on a fumble. Baynes hit right tackle for four yards. Benton went around right end for four, Sherman went off right tackle for three and first down.

After Lamar had made two through left tackle Benton, on a trick play, swept around left end for twenty yards. Baynes, on a fake over the line, smashed through right tackle for nine yards. Sherman failed to gain thru the same spot. Lamar made two thru left guard. Benton fumbled the ball behind the line on an end run, the Aggies recovering it. The Aggies made one first down, but failed on the second, the ball going over. Baynes went through right tackle for three, Sherman recovered the ball on a missed signal, but failed to gain, but a forward pass from Baynes to Armentrout making fifteen after catching the ball. Lamar hit right tackle for seven and Benton made three off right tackle. Sherman again recovered on a missed signal and gained two. Baynes hit right tackle for two, a forward pass to Armentrout over the goal line was incomplete and the half was over.

For the visitors Mann and Brinson were the stars. Mann is one of the best broken field runners that has been seen in Augusta in many a day—he is almost as good as "White" Davis, which is recommendation enough for any prep player. Brinson made many large gains thru the line. Both were strong on the defensive.

THE LINE-UP

CIVIL SERVICE EXAMINATION
The United States Civil Service Commission announces that on Oct. 28th there will be held an examination for the positions of clerk and city carrier at Statesboro, Ga. For application blanks, apply at the postoffice to F. R. Hardisty, Secretary of the Local Board.

HAVE YOU WEAK LUNGS?

Do colds settle on your chest or is your bronchial tubes? Do coughs hang on, or are you subject to throat troubles? Such troubles should have immediate treatment with the strengthening powers of Scott's Emulsion to guard against consumption which so easily follows. Scott's Emulsion contains pure cod liver oil which peculiarly strengthens the respiratory tract and improves the quality of the blood; the glycerine it contains and the tender membranes of the throat. Scott's is prescribed by the best specialists. You can get it at any drug store. Scott & Bown, Bloomfield, N. J.

HO! FOR THE DUBLIN FAIR

Everything will be ready for the Big Twelfth District Fair at Dublin when the gates are thrown open to the public Monday morning at 9 o'clock, Oct. 23. A week of exhibition, instruction and amusement awaits the visitor to the Fair grounds. The Fair in Dublin this year will be the biggest fair ever held in the district, and the people from one end of the district to the other are looking forward to the gala week to begin.

The livestock display, the agricultural products, the poultry show, and the amusement department will be by far the largest ever assembled on one fair ground in the Twelfth District. Amusements galore will be in evidence. A midway longer than the distance from Dublin to Statesboro will be filled from one end to the other with shows of a clean, up-to-date, and interesting nature. The "Spirit of the Fair" will drive away all cares and troubles while on the Midway, where Confetti will reign as Queen of the Midway.

Great display of fireworks each night, together with other free attractions will make it worth going miles to see.

The Fair grounds are equipped with rest room for ladies, and a spacious rest room for the automobiles. The Fair Association takes care of all cars that are driven within the Fair Grounds.

All railroads have agreed to stop all passenger trains at the Fair grounds entrance for that week. The main entrance to the Fair grounds is within fifty yards of the station. No chance to miss the big show.

Hold the hand you drive the program for the entire week of fun, frolic and amusement:

Monday, Oct. 23 Opening Day
Fair gates open at 9 a. m. Afternoon 3 p. m. free attraction by the Harrissons. 7 p. m. grand display of fireworks and other free attractions.

Tuesday, Oct. 24 Automobile Day
Dinner and parties for prizes at 10 a. m. 8 a. m. gates open to the public. 10:30 a. m. free attraction. 3 p. m. free attraction. 7:30 p. m. grand display of fireworks and free attraction by the Harrissons, the Delmore Trio.

Wednesday, Laurens County and Woman's Day
8 a. m. gates open to the public. 11 a. m. free attraction by the Delmore Trio. 3 p. m. free attraction by the Harrissons. 3:30 Basket Ball game between Laurens County and Hawkinsville. 7:30 p. m. free attractions by the Delmores and the Harrissons, and fireworks.

Thursday, Farmers Union Day and Livestock Day
8 a. m. gates open. 11 a. m. free attraction by the Harrissons. 3 p. m. free attraction by the Harrissons. 3:30 Basket Ball game between Farmers Union and Statesboro. 7:30 p. m. grand display of fireworks and free attractions.

Friday, Oct. 27, School and Educational Day
8 a. m. gates open. 11 a. m. free attraction by the Delmore Trio. 3 p. m. free attraction by the Harrissons. 3:30 Basket Ball game between Statesboro and Dublin. 7:30 p. m. grand display of fireworks and free attractions.

Saturday, Oct. 28, Gates Open
11 a. m. Free attractions, Harrissons. 3 p. m. Free attraction. 4 p. m. Free attraction. 7:30 free attractions.

Automobile Contest Prizes:
Open to cars of all makes. First Prize \$25.00 Most artistically decorated automobile. Second Prize \$15.00 Best Agricultural decorated car. Third Prize \$10.00 Most artistically decorated automobile. Gates close at 11 p. m.

Peach Tree Borer—Fall Time To Fight It

J. W. FIORO, Field Agt. Horticulture, Georgia State College of Agri., says the peach tree borer lives most of its life as a worm embedded beneath the bark of the tree, usually just below the surface of the soil. Here it starts as a very small worm, settles away the life of the tree, getting larger and larger until it undergoes a change into a pupa and then a moth, which lays eggs for more worms to carry on their destructive work on the peach trees. The moths lay the eggs on the trunk and branches of the trees during the summer months. The eggs are laid during July, August and September. The eggs hatch in from 10 to 15 days and enter the tree. By frost all the eggs have hatched that will hatch. At frost time the worms are small, and all that will enter until another summer, have hatched into the trees. This is the best time to fight them.

Draw the soil away from the trunk of the tree to a depth of four inches or until the roots are exposed. Search for the presence of a thick sap, which follows these holes until the worms are found, and then kill them. The borer holes can be found by observing the presence of a thick sap, which follows these holes until the worms are found, and then kill them. This sap has come from the tree because of the borer's injury. There may be a number of borers in a single tree. The worker should get them all before leaving the tree. A small white worm is often found in the sap. This is not the peach tree borer and it does no damage to the tree, but lives on the sap.

Peach tree borers do a great deal of damage and many people have lost heart in the growing of fruit because of them. The question may be asked, "Why let such a little thing as a peach tree borer get the best of one?"

VELVET BEANS

Wheat Growing In Ga.

Tests Made With Different Varieties And Their Results.

ANDREW M. BOULE, President Ga. State College of Agriculture, realizing the importance of encouraging the cultivation of winter wheat, the College of Agriculture has been conducting for several years past variety tests at Athens, Ashburn and Quitman. It is certain that much remains to be ascertained with reference to the best method of cultivation and the proper rotation of crops. Of course, the fertilizer side of the problem also needs to be carefully investigated. There is only one serious drawback to the cultivation of wheat in the Southeastern states, and that is that while there is an abundant rainfall, it is often not well distributed, hence the crop sometimes suffers from drought when approaching maturity. This difficulty can be overcome to a considerable degree by the development, through selection, of early maturing strains and the management of the land in such a manner as to increase its supply of vegetable matter, and thus enable it to absorb and hold a greater amount of water.

Rust is among the most destructive of the diseases to which this cereal is subject. The success which has been attained in developing rust proof oats, however, leads to the belief that through persistent efforts strains of wheat as strongly resistant can also be obtained.

Essentially the same method of management were used at all of the places indicated, the soil being broken to a good depth and a fine seed bed prepared. At all places the intention is to practice a three-year rotation in which cotton, corn and small grain is followed by cow peas. By this plan small grain occupies the land only once in three years, and as it follows corn the ground is generally in such condition that a good seed bed can be prepared. In this rotation the plan is to turn under the cow peas as green manure, and as far as possible, a cover crop of rye or hairy vetch is usually seeded in the cotton as well as a soil builder.

It is the plan to use 400 pounds of acid phosphate and 100 pounds of muriate of potash per acre. In the spring of the year 100 pounds of sulphate of ammonia has been applied per acre. The yield of some of the more important varieties tested in Athens is recorded below. It appears that as a result of two years' work Deltz Amber made an average yield of 28.7 bushels per acre; Georgia Red, 28.3 bushels; Fulcrum 27.4 bushels; Australian Red, 27.1 bushels; Red May, 26.7 bushels; Blue Stem, 26.6 bushels; Mammoth Red, 26.6 bushels; Fultz, 25.9 bushels; Klondike, 25.7 bushels; Fishhead, 25.4 bushels; and Bearded Purple, 24.3 bushels. These may be regarded as good yields and wherever they can be approximated the cultivation of wheat as a winter cover crop and the production of grain for bread can be practiced to advantage.

The yields obtained from some of the leading varieties at Ashburn are as follows: Blue Stem, 18.6 bushels; Georgia Red, 19.6 bushels; Red May, 18.3 bushels; Australian Red, 18.3 bushels; Deltz Amber, 14.9 bushels; Fultz, 13.7 bushels; Fishhead, 13.3 bushels; Klondike, 13.3 bushels; Mammoth Red, 13.3 bushels; Fulcrum, 12.7 bushels; Blue Stem, 12.7 bushels; and Bearded Purple, 12.7 bushels.

These yields are not nearly so good as those obtained on the Cecil clay typical of the Piedmont area, and yet a number of these varieties could be grown to advantage on the Tifton sandy loam under seasonal and soil conditions similar to those obtaining at Ashburn with good advantage.

The yields obtained at Quitman, where this work has only been carried on one year, were not satisfactory, but it would not be fair to draw any conclusion from a test covering only one year. Blue Stem made the highest yield of any variety, namely 6.7 bushels. Cultivating wheat on this basis would, of course, not be profitable. Possibly when these soils are better watered and a better season occurred, the yields will be considerably increased. It is important to remember that through selection and breeding it will more than likely be possible to develop strains much better adapted for cultivation in the southern part of the territory than now.

Why Not Build Farm Water Works
L. C. HART, Prof. Agr. Engineering, Ga. State College of Agri., says why not figure some on helping (or good) use of water which has stood by you so well and done a great deal of home drudgery; for instance, why not install some form of water works? If you go off and buy a thick sap of equipment for saving labor on the farm or for the convenience of taking care of the cows, why let the wife continue to carry water from a well that is located nearer to the cows, than to the kitchen?

Water works systems for 1500 homes can be installed for a cost all the way from \$20 to \$200. Water works mean not only saving of labor for the farm wife, but affords means for better sanitation for washing flower beds and kitchen gardens, washing the buggy or automobile and many other such uses.

The College of Agriculture through its Department of Agricultural Engineering will furnish plans and work out a water works proposition for farm homes upon application as soon as such requests can be disposed of.

DAY LETTER

Bloomington, Ill., 10-18-16.

Statesboro News,

Statesboro, Ga.

Have bought for our customers at Statesboro and vicinity one full car load of the best Hampshires to be found. This lot consists of a few sows with litters, both bred and open sows, and gilts, and fifteen young boars.

We are also shipping at same time one hundred Hampshires to one of our customers in Middle south Georgia. This is, we believe, the largest single order of registered hogs ever shipped into Georgia.

They are for sale by us. Place orders early. We will arrive early next week and will be located at Anderson's Stables for one week only.

BREATHES AIR OF HYOMEI THROUGH POCKET INHALER TO CURE CATARRH

Catarrh Sufferers Should Try This New Method. Often Succeeds Where all Else Fails and Costs Nothing Unless it Succeeds.

Leading druggists are rapidly securing local agencies for a clever pocket inhaler device that is being widely and successfully used in the treatment of catarrh of the nose and throat, asthma, hay-fever, bronchitis, croup, etc.

This little inhaler, which is made of hard black rubber, is packed with antiseptic gauze into which is poured a few drops of the pure oil of Hyomei which the gauze quickly absorbs. Then by placing the inhaler in the mouth as shown in the illustration and just breathing naturally or by using the other end of the inhaler and snuffing up the nose, the user draws into his throat, lungs, sinuses and head the full force of one of the most powerful antiseptic and germ killing liquids ever discovered.

This powerful but pleasant medicated air penetrates into every nook and corner of the raw, sore, inflamed surfaces, destroys all the catarrh germ life, soothes and heals the swollen membranes and quickly opens the clogged and stuffed up passages. Catarrh goes quickly never to return where this inhaler is used with Hyomei for a few minutes four or five times daily and the local

druggists are so certain of the results that they are furnishing the complete treatment—the inhaler and a bottle of oil of Hyomei to their customers with the distinct guarantee that unless it gives prompt and certain relief the money paid for it will be refunded.

Logical Way to Treat Catarrh.
This treatment has been endorsed and used by physicians, is absolutely safe to use and is not at all expensive as a bottle will last a long time. Those who have catarrh in any form should give it a trial.

Society Out of Town

PORTAL

Messrs. W. E. Scarboro and Roy Smith were business visitors to Statesboro the latter part of last week.

Mrs. R. J. H. DeLoach and children of Experiment are the guests of Mr. and Mrs. Taylor DeLoach for some time.

Mr. and Mrs. H. R. Riggs and children spent Sunday with their parents near Register.

Messrs. Robt. DeLoach and George Grovenstein and Mrs. Alex Woods motored to Statesboro last Thursday.

The enrollment of the Portal school has grown so rapidly that the trustees find it necessary to employ another teacher. A good many applications have been submitted but a decision has not been made.

Mrs. John Parrish and Mrs. W. E. Parsons spent the first of last week in Statesboro visiting their daughters who are attending the A. and M. college.

Messrs. Bird, Arthur and Taylor DeLoach and Dr. Oscar Johnson combed a fishing and hunting party to Ogeechee river last week.

The local lodge W. O. W. entertained their members and friends at a social supper at McKittick's restaurant last Tuesday evening. A good crowd attended and all report an enjoyable time. Out of town friends attending were Mr. and Mrs. Messrs. Womack, Lanier and Benton from Aaron. The location of the Woodman Hall has been changed from over the postoffice to the K. of P. Hall over the Portal bank.

Mr. Jim Brantley accompanied by his uncle, Messrs. J. L. Bragg and L. B. Smith of Siltson motored to Atlanta the latter part of last week to attend the Southeastern Fair.

Rev. and Mrs. J. A. Scarboro celebrated their forty-first wedding anniversary Sunday, Oct. 15th at their home near Aaron. Eight of their twelve children were present. An excellent dinner was served and all report a very pleasant time.

CLITO

Miss Margaret Johnson of Millen spent Sunday with her sister, Mrs. W. C. Thomas.

Misses Una Clifton, Ethel Drigger, Messrs. John Lee and Ezra Clifton were the charming guests of Miss Susie Lindsey Sunday afternoon.

Miss Susie and Mrs. Walter Lindsey spent Monday in Statesboro.

Mrs. W. C. Thomas was hostess of a dinner given in honor of her brother and sister. Those present were Misses Margaret Johnson, Susie Lindsey, Annie Waters, Bessie Newton, Messrs. Jesse and Ben Johnson, Carl Martin, Frank Oliff, Isaac Lindsey, Mr. and Mrs. W. C. Thomas, Mr. and Mrs. W. M. Lindsey.

Mr. J. H. Herrington spent Sunday at home with his parents.

Mr. B. B. White of Brooklet spent Sunday with his mother, Mrs. S. H. Strouse.

SOCIETY

Miss Eva Kingery was a Mettior visitor during the week.

Mr. Leon Scarboro of Savannah was in Statesboro Tuesday.

Mrs. A. G. Ricker of Aaron was a visitor in the city Wednesday.

Mrs. H. Clark and daughter spent the week-end in Savannah.

Mrs. Doctor Strickland of Pembroke is visiting her parents, Mr. and Mrs. D. P. Averitt.

Mrs. Horace Wood and daughter of Savannah are guests of Mrs. Wood's mother, Mrs. D. W. Davis.

Mr. and Mrs. F. D. Thackston are doing the Southeastern Fair at Atlanta for a week's vacation.

Mr. R. L. Colson of Pineora, with his wife were auto tourists stopping in Statesboro Tuesday.

Mrs. D. D. Arden, Mrs. Julian C. Lane, and Mrs. J. O. Martin are delegates attending the U. D. C. convention in Dublin this week.

Mrs. Leona Roberts who has been in Hendersonville and other North Carolina and South Carolina points for four months has returned home for the winter.

Miss Polly Woods is superintending the canning club contest under the home economics department of which she is the head in Bulloch county.

Mr. and Mrs. W. D. Henderson and children accompanied by Miss Eva Martin motored to Savannah spending the week-end with Mrs. Anderson's mother, Mrs. W. F. Crawford.

Mr. and Mrs. F. L. Parrish and two children returned to their home near Aaron Monday afternoon after a pleasant week's visit with friends and relatives in Statesboro.

Mrs. Nita Kowen, Mrs. J. T. Brown, Mrs. J. M. Morris, Mrs. W. W. Williams, Mrs. R. Lee Moore, Miss Sadie Lee and several others left Wednesday for Waynesboro where they will attend the W. C. T. U. Convention.

Mrs. Ennis and daughter, Miss Mollie, who have been home guests of Mr. and Mrs. J. W. Williams on Savannah Avenue left Wednesday for Savannah where they will spend a few days and return from there to their home in Jacksonville, Fla.

ENGAGEMENT ANNOUNCED

Mr. and Mrs. E. C. Prosser announce the engagement of their daughter, Hattie, to Mr. George A. Tucker of Little Rock, Ark., the wedding to take place in Little Rock October 28.

PARRISH—DAVIS

Miss Pearl Parrish, daughter of Barrow Parrish, and Mr. Dedrick Davis, son of Dag Davis, were united in marriage last Sunday at the home of the bride's parents. It was a very quiet home wedding attended by only the immediate members of the families. Mr. and Mrs. Davis will be at home to their friends at the home of Mr. Jim Matthews on East Main.

GOULD—WATERS

Miss Mamie Gould and Jesse Waters, two well-known young people of Statesboro, were married Wednesday afternoon by Rev. T. J. Cobb at his residence. Both of the contracting parties are employees of the Statesboro Telephone Co., and are exceedingly well liked by their associates.

Many of whom joined in hearty felicitations for the success and happiness of the young couple. Immediately following the ceremony the bride couple departed for a wedding trip to Atlanta and other Georgia places of interest which they will visit before returning to their home at College street.

REVIVAL MEETING METHODIST CHURCH

The Revival Meeting at the Methodist church will continue through Sunday night. The interest is growing, congregations good. Souls are being converted to God. Hours 3:30 to 7 p. m. every day except Sunday. Sunday hours 11 a. m. and 7 p. m.

THE MENACING MARCH OF THE BOLL WEEVIL

Losses of From 70 to 80 Per Cent in Louisiana and South Mississippi—What Alabama, Georgia and South Carolina May Expect from This Destructive Pest.

By B. L. Moss

In 1904 the boll weevil invaded a half dozen parishes or counties in western Louisiana; by 1910 every part of the state was infested. In 1904 Louisiana produced 1,089,526 bales of cotton; in 1910 the state produced 246,648 bales. In 1904 Mississippi's biggest cotton year, the state produced 1,789,000 bales; in 1910, with the weevil in every county, the state produced only 953,965 bales. From 1904, the worst year after the arrival of the weevil, we have a loss of 845,000 bales, or 77.5 per cent.

the northern boundary of Louisiana, and, as the writer has previously pointed out, it is south of this line in Texas, Louisiana and Mississippi that boll weevil damage has been heaviest. In the counties of Mississippi lying south of the thirty-third parallel of latitude, cotton production in 1904 was 749,849 bales; by 1910 this had fallen to 170,572 bales, or a loss of 77.3 per cent—almost exactly the percentage of decrease shown in Louisiana.

Alabama and Georgia south of parallel 33 possess climatic conditions practically the same as those of Louisiana and Mississippi—summer rainfall is about the same and winter temperatures are about the same. Moreover, differences in soils, land, and methods of farming are very slight. Hence it would not seem unreasonable or illogical to assume that the history of the boll weevil in Louisiana and Mississippi south of parallel 33 may be accepted as an index as to what may be expected in Alabama and Georgia in the near future. Now let us apply the average percentage (77.4) of decrease in Louisiana and Mississippi to Alabama and Georgia south of parallel 33 and see what the results are.

Heavy Damage Probable in South Carolina. But, because of the influence of the near-by ocean, that belt of South Carolina lying between parallels 33 and 34 has conditions that would lead us to expect decidedly heavier weevil damage than has occurred between the parallels in the states to the west. For instance, United States Weather Bureau reports show that the mean winter (December, January and February) temperatures in South Carolina south of parallel 34 average 47 degrees, while summer (June, July and August) rainfall averages 47.7 inches. In Mississippi between parallels 33 and 32, the mean winter temperature is 47.5 degrees, and the average summer rainfall 42.23 inches, and between parallels 32 and 31, 49.8 degrees and 16.60 inches. Thus, while mean winter temperatures in South Carolina south of parallel 33 are lower than in Mississippi, the summer rainfall is decidedly heavier in South Carolina. In view of these facts, the writer believes it fair to assume that in South Carolina south of parallel 34 the weevils will encounter conditions—favorable and unfavorable—that will average about the same as those found between parallels 33 and 31 in the Gulf states. If this be the case, then South Carolina south of parallel 34 may expect a loss of something like 75 per cent when the weevil is at its worst, this loss of cotton ranging higher in the South-east and lower in the northern part of the area.

In South Carolina in 1911 the counties south of parallel 34 made 624,500 bales of cotton, and if this when the weevil is worst is cut 75 per cent, which we believe, in view of the climatic conditions already referred to, may be expected, we will have a loss of 468,375 bales.

The reader in the northern half of the cotton belt is naturally curious to know what degree of weevil damage he may expect. The best answer we can give is that while damage in Louisiana and Mississippi south of parallel 33 has been about 77.5 per cent, average damage decreases steadily as we move northward from the Gulf coast. For instance, the decrease in production in Mississippi has been as follows: between 31 and 32, 91.8 per cent; between 31 and 31.2, 83.1 per cent; between 32 and 32.2, 77.4 per cent; between 32.2 and 33, 58 per cent; and between 33 and 34, 34.6 per cent. In Arkansas, the loss between 33 and 34, from the biggest cotton year before the weevil to the worst year after the coming of the weevil, amounts to 35.8 per cent. Above parallel 34 nowhere in Texas, Oklahoma, Arkansas or Mississippi had the weevil prior to 1910 occasioned crop decreases as heavy as had resulted from bad seasons before the weevil came. This year, with an extraordinarily wet season, the weevil has been severe in northeast Mississippi considerably north of parallel 34. However, excessive weevil damage has never before occurred so far north, and it is the writer's opinion that it may be a dozen years before it occurs again.

When may heavy weevil damage be expected in Georgia and South Carolina? The answer is that 1917 will find the weevil severe in southwest Georgia, there will probably be heavy damage in south central Georgia in 1918, and by 1919 all the southern half of the state will be hard hit. South Carolina's loss, roughly, may be expected to come about 1919 or 1920, with increasing damage for three or four years, when a maximum will be reached.

How Catarrh is Contracted

Mothers are sometimes so thoughtless as to neglect the colds which their children contract. The inflammation of the mucus membrane, at first acute, becomes chronic and the child has chronic catarrh, a disease that is seldom cured and that may prove a life's burden. Many persons who have this disease have no idea of the time it was contracted. A little forethought, a bottle of Chamberlain's Cough Remedy judiciously used, and all this trouble might have been avoided. Obtainable everywhere.

PAY YOUR DEBTS

At no time in the history of Bulloch County has there been as much money in the hands of the people as there is this fall. The high price of cotton has brought three million dollars to the people of the county. The proper thing to do now is for everybody to pay their debts first.

No man has the right to spend money for the luxuries of life, while he owes money. The wise man will now pay what he owes and what he has left he can do as he pleases with it. If he sees proper to invest his surplus cash in an automobile that is his business. However, this writer is of the opinion that many a man who is now buying automobiles and high priced land and mules will shed some bitter tears about three years from now, when he sees that the boll weevil has eaten up his cotton crop. Then he will wish he had saved his money for such a time of poverty and distress.

Of course you are going to read this and then go ahead with your extravagance, and say the writer is a fool. That is what they said when old Noah was getting his ark ready.

GENTLE—BUT SURE
A powerful cathartic sometimes does as much harm as good. Foley Cathartic Tablets are mild and gentle but sure in action. They are a wholesome physic that thoroughly cleans the bowels, sweetens the stomach and benefits the liver. For indigestion, biliousness, laxative, bloating, gas or constipation, no remedy is more highly recommended. They cause no pain, and are safe for all ages. Persons recommend them because of the light feeling they bring. Sold by the Bulloch Drug Co.

PLAN TO WIPE OUT ENGLISH SPARROW
League of American Sportsmen Urge Nation-Wide Campaign to Save Songbirds

WILL ENLIST ALL GOVERNORS AND MAYORS
San Diego, Cal., and Other Places Have Already Succeeded in Driving Out the Pests.

From The New York Times
The League of American Sportsmen, whose object is the preservation of wild life, is considering the question of instituting a nation-wide campaign for the destruction of the English sparrow. Its officers say this bird has made such headway here that it is driving out the smaller song and insectivorous birds, and that it has become a question of whether we shall have only the English sparrow to represent our bird life or destroy it and regain some 50 species of useful and beautiful birds that used to inhabit cities, farms and countryside over the land.

The league intends to ask the Governor of each state to issue a proclamation declaring war on the English sparrow and setting aside a week, possibly in April or May of next year, to be devoted especially to destroying nests of this pernicious pest. Printed instructions as to the plan of the campaign will be sent to the Mayors of all incorporated cities and villages, to the heads of the school systems in every county, to college presidents, to principals of preparatory schools, to the heads of the Boy Scouts in each state, and to other organizations which might be expected to extend sympathy and aid.

Four principal methods of action will be employed: Tearing down the nests, trapping the birds, shooting them under police supervision, and under licenses issued by the police authorities, and in cities where water pressure is available, turning the hose on the birds at night after they have gone to roost.

The president of the league, Col. G. O. Shields, of 1110 Simpson street, New York, says he would like to hear from persons interested in the matter both those who favor the plan and those who oppose it.

One of the statements that in the case of hundreds of thousands of bird boxes placed in this country in the last 10 years, fully 75 per cent have been appropriated by English sparrows. In cases where bluebirds, wrens or other birds that are desired by those who place the boxes have taken possession of boxes, the sparrows have driven them out, thrown the eggs of young to the ground, and taken possession themselves.

"I have traveled nearly 4000 miles this summer," says Col. Shields, have visited more than 50 towns in the Middle West and in the East, have walked more than 100 miles, and though I always took carefully for birds, have not seen a single bluebird this season. The bluebird is, perhaps, the most beautiful and useful of all our native songsters, and so it has retired more generally before the onslaughts of the British intruder than any other of our native birds, though all have been driven out to a greater or less extent.

Recently sent out 30 letters, inclosing self-addressed post cards, asking my correspondents whether they have seen any bluebirds, and, if so, how many. The cards have all been returned, and only six of the people have seen a single bluebird. Some of them report about usual numbers, but the experience and observation of the others agree with my own. These 24 persons say they have not seen a single bluebird.

There are several important precedents for our proposed action against the sparrows. San Diego, Cal., started a war of extermination against them a year ago. It has been vigorously conducted, on about the same lines as we propose, and as a result most of the sparrows in that city have been killed and the other birds have increased. The California State Game and Fish Commission has inaugurated a statewide war against the intruders.

If one of the cities of San Diego can kill the sparrows and drive them out, every town and city in the land can do so. I believe that at least 99 per cent of the people in this country will approve a war of extermination against this pestiferous nuisance, and that they will join heartily in it. But we must know first whether we are going to offend any considerable number of good people by such a crusade, before we begin it."

Ah! That's what I Call Coffee

Everybody that tries Luzianne votes it the best of all coffees. You try it—at our risk. If, after you have used the entire contents of one can according to directions, you are not satisfied with it in every way, throw your can away and ask your grocer to refund your money. He'll do it willingly. Write for premium catalog.
