## HARRIS TO RUN FOR GOVERNOR

Polk County Friends Say He is a Probable Candidate and are Pleased.

Cedartown, April 19.—The home folks, in Polk county, of Hon. W. J. Harris, of Cedartown, were made happy over his appointment last year by President Wilson as director of the census, and they are now enthusiastic over the probability that he will enter the race for governor. His own destination is well earned, and he comes from a useful and honored family. His brother Prof. J. C. Harris, is superintendent of the Rome public schools; another brother, Major P. C. Harris, of the United States army, was recommended by President McKinley for promotion for gallantry at the battle of Santiago; another brother, Dr. Seals Harris, of Mobile, Ala., is the editor of the Southern Medical Journal. His wife is the daughter of the great southern hero, General Joe Wheeler. Mr. Harris was elected to the state senate from the 38th district without opposition and has served acceptably as chairman of the state Democratic executive committee. He is president of the Georgia Fire Insurance Company and has the business experience and judgment well calculated to make him a really great chief executive of Georgia. His home county of Polk will be solidly and enthusiastically for him.

Leon Hagins came near losing his life on Sunday afternoon under an overturned automobile. In trying to make a quick turn the auto turned over and caught the young man under it. Fortunately assistance was at hand and he was released from where he was pinned under the machine. He is able to be out again and seemed to suffer only from some bruises.

## Arden Gets Letter from Hell

Mr. D. D. Arden, master mechanic of the Savannah and Statesboro railway, at this place, had about half the wind knocked out of him one day this week when he fished a rather peculiar looking letter out of the postoffice, and, being curious to know from whence it came, noticed the postmark "Hell" on the envelope. Mr. Arden dropped the missile, but on further examination it seemed to be rather harmless, and wasn't sizzling with the odor of brimstone. He ventured to open it, and found it to be a letter from an old friend from whom he had not heard from in many years.

The letter started out by saying, "I am in hell, and strange to say, I like it first rate. There is not near as much fire and brimstone here as you might suppose." Going further, the departed friend goes on to say that the place is not anything like it has been painted; that they have a delightful climate there and the folks are all nice and clever, and living in Hell is very nice, at that particular point.

The town referred to is Hell, a small town in the northern part of Norway and the friend is over there building railroads. Strange that any town would want to carry such a name, but this one has it, and is perhaps the only one bearing that name this side of the great terminus, where the wicked all leap into everlasting fire and brimstone.

## Negroes Will Hold Fair.

The negroes of Statesboro and vicinity held a meeting one day last week and have decided to hold an agricultural fair during the coming fall. We understand that officers of the fair association have been selected and the work of putting on the fair has been started.

Bulloch has some successful colored farmers and a showing made by them would not only interest members of their own race but the white people would turn out and see what the colored brethren could show.

## School Contest at Metter.

On Saturday, one of the largest crowds ever seen at Metter gathered in our sister city to witness the exercises of the contest between the members of the First Congressional District Accredited High School Association.

A special train went up, carrying most of the crowds from Statesboro and intermediate points. The train was loaded down when it left Statesboro, making it necessary to cut out all other stops between Statesboro and Metter. The special doubled back to Register, however, making an extra trip for accommodation of the people along the line of road.

Assumptious dinner and barbecue was spread by the people of Metter and vicinity, and everybody who attended report a very large time. The following is the result of the award of the medals:

Ready writing, first prize, Miss Lewis, of Millen; second, Miss Annie Blitch Parrish, of Statesboro. Piano, Miss Eva Boykin, of Savannah; spelling, George S. Kimball, of Statesboro; declamation, Lester Jenkins, of Sardis; running broad jump, Levy Newton, of Claxton, 17 feet, 2 inches; running high jump, George Schrenk, of F. D. A. S., 4 feet, 10 inches; standing broad jump, Keller Sands, of Claxton, 8 feet, 11 inches; chinning the pole, Albert Quattlebaum, of Statesboro, 25 times; potato race, Charlie Weatherbee, of F. D. A. S., 100-yard dash, Pat Smith, of F. D. A. S., 11 seconds; 220-yard dash, Levy Newton, of Claxton, 34 seconds; 440-yard dash, Ewell Atkins, of Statesboro, 61 seconds; half mile relay race, Clark Sims, of Statesboro, 1:51, with Algie Collins a close second.

Good order prevailed and the best of feeling was manifested throughout the contest.

One feature of the meet was the number of candidates present. Col. J. W. Overstreet, of Savannah, was present, telling the voters why he should go to Congress from the First district.

## Mad at Paint

25c a gallon for paint is about \$2.50 on the average job, and lots of men waited last year for that, but they didn't reckon; they got mad; wouldn't pay it.

There are times to get mad and refuse to pay; but when one's property needs protecting is no time to get mad and not paint.

Besides, it costs more to get mad and wait than to paint.

Getting mad doesn't do any good to your property; paint does it good by keeping out water; no water no rot; no paint, some water and rot; and a little rot is more than enough to make a man liberal towards his painter and paint.

Paint costs not a cent. All the paint in the world, so long as it keeps out water, costs not a cent.

Ship your Chickens and Eggs to the undersigned; we will pay the highest market price for them. Enterprise Grocery Co., Price and Henry streets, Savannah, Ga.

## School Closing at Bradwell

Saturday, May 9th.

## PROGRAM.

Educational Address—By Hon. J. W. Overstreet, at 1:30 p. m.

Field exercises will begin at 3 o'clock, prizes will be awarded and all public schools may enter contests.

Ice cream supper from 4:30 till 10:00 p. m. C. D. HARTY, OLIVE DENMARK, Principal.

## Card of Thanks.

Mr. and Mrs. Harlie L. Trappell wish to thank their many friends for their kindness during Mrs. Trappell's illness at the sanitarium and feel under many obligations to them. We also thank Drs. Patrick Floyd and Williams for their faithful and prompt services, and in our feeble way pray God's blessings upon them all.

Yours truly, MR. AND MRS. HARLIE L. TRAPPELL.

## NATIONAL DRAINAGE CONGRESS IMPORTANT TO THE NATION

Fourth Annual Sessions at Savannah, Ga., April 22-25, Will Attract Wide Attention. Vice President Delivers Opening Address.

WITH the vice president of the United States delivering the opening address on Wednesday morning, April 22, with two or three members of President Wilson's cabinet in attendance and participating in its discussions, with

VICE PRESIDENT MARSHALL, who delivers opening address at National Drainage congress, Savannah, April 22.

gorgeously and artistically decorated in formal designs, will pass through the main streets of the city that afternoon. At night the business section, one of

TORPEDO BOAT DESTROYER AT SAVANNAH, APRIL 20-25.

the most brilliantly illuminated in the country, will be given up to a masquerade carnival, with prizes for the most beautiful and most grotesque costumes worn by masqueraders. The night will be surrendered to general jollification, a veritable Mardi Gras event without limitation to innocent fun.

The following day, Friday, April 24

ONE OF THE UNITED STATES SCOUT CRUISERS AT SAVANNAH, APRIL 20-25.

The south Atlantic states are expected to be especially strongly represented. Among world noted speakers from abroad is Sir William Willocks, builder of the great Aswan dam in Egypt, who sailed from Cairo for this special purpose in March.

In appreciation of the importance of the congress to the material and health interests of the country the railroads have granted very low rates to Savannah from all points south of the Ohio and east of the Mississippi rivers.

For their entertainment an attractive program has been prepared. Profes-

sion has been designated as Tybee (see Shero) day, with an excellent schedule to Tybee Island, one of the south's notable beaches, where there will be dancing on the great pavilions, military dress parade and concert and other features.

There is no more delightful place on a warm spring day than Tybee beach.

During the week there will be other features of the program of entertainment that will be a source of pleasure.

The rates on the railroads are good for ten days, not expiring until mid-

night on April 30. As the climate of Savannah at this period of the year is unsurpassed in the world for out of door enjoyment and Savannah, the south's "Forest City," is then most beautiful in its fresh dress of verdure, the expectations of a large attendance on the congress and of visitors in general are not apt to be disappointed.

SIR WILLIAM WILLOCKS OF CAIRO, EGYPT, Designer and builder of great Aswan dam across Nile, who will deliver his illustrated lecture at National Drainage congress at Savannah.

about baseball will mark every day of the week, Savannah versus Columbus the first three and Savannah versus Charleston the last three days. The navy department has ordered an imposing array of war vessels to Savannah for the week, including cruisers, torpedo boats and torpedo boat destroyers. These will be open for public inspection every day, and an opportunity will be afforded to visitors to study life on these interesting fighting craft. The jacks from the ships, the garrison from Fort Screven, with its famous military band; the local military, consisting of ten companies of infantry, two batteries of artillery and a company of cavalry, and other local organizations, will participate in a great military and civic demonstration on Thursday afternoon, April 23, in a sense escorting the floral parade at that time, which has been organized by Captain McIntosh, commander, D. A. R. Hundreds of automobiles and their

## Pierson Farm Land Plaster Makes Peanuts

PEANUTS MAKE MONEY

The Logical Result is That

Pierson Farm Land Plaster

will make you money. This is not only correct logic, but it has been demonstrated in the fields and barns throughout Bulloch county. Plant Peanuts and top-dress them with Pierson Farm Land Plaster, about 300 pounds to the acre, and you will get well filled pods and plenty of them, and you can't get them in any other way. PIERSON FARM LAND PLASTER will be sold throughout this territory by

## TEAMS TO HANDLE HEAVY FARM MACHINERY

Work to Keep Working Horses in Good Condition.

(By W. M. JENSEN, New York.)

One thing which has greatly improved me during my past few years is the poor tillage and cultivation practices on farms where light work teams are compelled to handle modern heavy farm machinery.

I have always been in favor of keeping horses that could be utilized for farm work and yet be suitable for family road horses, but conditions constantly changing, and the farm team that will best meet the demands of the present-day conditions must have sufficient size and strength to enable them to walk up promptly with heavy farm machinery.

## SELECTION OF COTTON SEED

So-called "Running Out" is Largely Due to Neglect of Grower—Simple Methods Developed.

(Prepared by the United States Department of Agriculture.)

The so-called "running out" of varieties of cotton is largely due to the neglect of the grower in selecting his seed. Continued selection is necessary to maintain the uniformity and productivity of any variety of cotton, but the methods of selection used in the past were such as to require so much time and technical skill as to be impracticable for the farmer.

Simpler and more effective methods have been developed and explained in a circular entitled "Cotton Selection on the Farm by the Character of the Stalks, Leaves and Bolls." This is supplied free of charge by the bureau of plant industry to interested growers.

Farmers who will limit themselves to the growing of one kind of cotton will find it necessary to select seed to preserve the stock and avoid admixture with other varieties, can produce better seed than they can buy through any of the existing commercial channels. They can not only increase their own crops but gain additional profits by selling seed to their neighbors.

Farmers who will limit themselves to the growing of one kind of cotton will find it necessary to select seed to preserve the stock and avoid admixture with other varieties, can produce better seed than they can buy through any of the existing commercial channels. They can not only increase their own crops but gain additional profits by selling seed to their neighbors.

## TO PREVENT DOORS SAGGING

Convenient Contrivance, as Shown in the Illustration Herewith, is Easy to Make.

Iron Rod Holds Door.

To prevent heavy doors from sagging on their hinges an iron rod is used as a brace. Take a piece of

Treatment for Diphtheria.

Grain sorghums respond to good treatment the same as corn. Don't expect to make big yields of these crops by letting them grow wild.

Working Wet Soils.

Don't bother your fields until they are dry enough to work well. You will injure your soil and crop too by working too wet.

## WIDE USE OF ALFALFA

SHOWS REMARKABLE ADAPTABILITY TO VARIOUS CLIMATES.

New One of Staple Forage Crops of Old World and Ranks Among Most Important Legumes of Western Hemisphere.

The original home of alfalfa appears to have been southwest of central Asia, but from there it has been carried to practically every part of the world where agricultural pursuits are important. It is now one of the staple forage crops of every continent of the old world and easily takes front rank as the most important leguminous forage crop of the western hemisphere. The name "alfalfa" is of Arabic origin and means "the best fodder." The southern European name of "lucerne" was formerly applied to the plant in the eastern part of the United States and in Utah, but this name has practically given way to the name "alfalfa," under which it was introduced by the Spaniards.

The Spaniards were apparently the first nation which grew this plant. They took it with them when they invaded Greece about 490 B. C. The introduction of alfalfa into Spain was probably during the Moorish invasion in the eighth century A. D. The Spaniards introduced it into Mexico and South America during the sixteenth century. It is reported to have

been carried northward from Old Mexico into what is now the southern portion of the United States, but it was not until 1854, when it was taken to San Francisco from Chile, that its rapid extension over the irrigated sections of the western states commenced. Its culture has since been extended to many of the nonirrigated sections of the West.

The history of alfalfa in the eastern states runs back for at least two centuries, as the colonists made repeated attempts to establish it. The attempts on the part of the American colonists to establish it were unsuccessful. The limestone region of central New York probably constituted the area of its longest continued culture in any section of the East. In South Carolina there is a field reported to be 75 years old. Alfalfa has also been grown locally in most of the eastern states for many years. The black prairie soils of Alabama and Mississippi are proving especially adapted to alfalfa. The successful districts have usually been the somewhat limited area of limestone soils, where the conditions are especially suited to the plant.

The recent efforts looking to its further extension throughout the East and South indicate that the chances of success increase greatly as the special requirements for its production are understood and provided for.

So far as climate is concerned alfalfa can be grown in every state in the Union. It is, however, very exacting in the humid sections as to soil and treatment. The hardy strains are able to withstand the severe winters of the North Central states. It is raised without irrigation in semi-arid sections where the rainfall is only 14 inches a year, and also in the Gulf states where the annual rainfall may amount to 65 inches. A rainfall of 36 inches a year is ample for this crop, and an amount in excess of this is usually a detriment. In moist climates the soil is frequently sour, and the clay soils especially are not so well drained. In such a climate weeds and fungus diseases prove much more injurious than under less humid conditions. Although the adaptability of alfalfa is great, yet in the areas not perfectly suited to its successful production care is necessary to provide the very favorable conditions required by the young plants in order to overcome the natural drawbacks.

Millions Rust Out.

Barnyards and dooryards filled with farm machinery, corn cultivators and harrows stacked up against the walls, and fence where last used are familiar sights around many farms at the present time. Here's one of the greatest losses on the American farm.

Not Good for Pastures.

With feed scarce and high priced, there is a great temptation to turn the live stock on pasture at the earliest possible time, but this is not good for the pastures. Pasture plants grow through the agency of their leaves or green parts, as well as through their roots, and if the leaves or green parts are kept eaten off as to the ground all the time, less growth—less feed—is made.

Decaying Apple Trees.

The old decaying apple trees in the orchard are veritable breeding places for all sorts of fruit pests. Keep them all chopped out, using them for firewood and replacing them with new, healthy trees.

Hold the Moisture.

Get busy now with the surface cultivation. Don't now deep tillage. Keep the surface stirred and hold that moisture for the crops.

Stacking Alfalfa—The Upright Place Is Made to Turn Freely and the Pulley at the Base Is So Placed That the Arm Around So That the Hay Is Deposited in the Center of the Stack.

Practical experience has shown that disking alfalfa under certain conditions is beneficial to the crop, yet many farmers will not cultivate their alfalfa plants in any way for fear of killing them.

As with other crops, the cultivation of alfalfa must be done with judgment. The main object in cultivating alfalfa plants, which usually consists in disking, is to kill summer grasses.

The time to disk alfalfa is just before or at the time summer annual grasses begin to grow. This time may be in July in one section and June in another section. It may be after the first cutting, or after the second cutting. Each man must know when summer grasses begin to grow in his locality, and set his disk to working accordingly.

There is no danger whatever to well established alfalfa plants in disking. The plants are deep rooted and will not be pulled out if they are not cut. Splitting the crowns will do no damage. Some of the best alfalfa growers give their alfalfa fields a weeding disk and cross-disking every year. Some claim that it is impossible to injure the plants, no matter how the implement is set or run. The disk cuts up the surface and kills grasses by the roots.

Soil for Growing Legumes.

Starting Point in Improvement of Sandy Land and Important in Maintenance of Fertility.

When legumes, such as clovers, alfalfa, peas, beans, etc., are well supplied with the necessary moisture, phosphorus, potassium, calcium and other necessary elements, they are able to grow on soils extremely low in fertility. They are able to grow on soils extremely low in fertility. They are able to grow on soils extremely low in fertility.

## GARDEN FOR THE HOUSEWIFE

Quick Growing Is Secret of Tender Crispness of Salad Plants—Keep the Soil Moist.

(By L. E. CHAPIN.)

Among less common sorts asparagus-beets are very desirable, as the entire plant may be cooked for greens when young, or the large ribs and veins from the older leaves may be cooked and served as asparagus.

Brussels sprouts belong to the cabbage family and the tiny heads that form on the stalks are more delicate in flavor than most cabbage.

Kohlrabi seems like a cross between a cabbage and a turnip, but if cooked when young and tender has a flavor like cauliflower.

Fetticus (corn salad) may be sown and treated the same as spinach and furnishes one of the very early spring salads.

Endive is another very fine salad plant, and the seeds may be sown as late as August for plants to use during the fall.

Endive of the improved, large-leaved sorts are among the finest salad plants, and if cut freely for use there is no danger of their becoming a nuisance.

Celeriac (turnip rooted celery) is finer for flavoring soups than the stalk-celery, and may be served in various ways.

Lettuces are as easily grown as onions and being less in favor are more desirable for some purposes.

Winter onions are very desirable because of the fact that when once planted they come up year after year as soon as the frost is out of the ground, and are ready for use in two or three weeks.

The Egyptian winter onion, or the perpetual tree onion are among the best of type because they are more hardy than those.

Okra is less well known than it should be. It is fine for use in soups, stews and salads.

Most gardens have rhubarb plants, but it is worth while to start a few roots of the "ever-ready" sort that furnishes fine stalks during the entire summer and fall, if given water during very dry periods.

With all these (and other salad plants), quick growing is the secret of tender crispness and to secure it, the soil must be rich, and have plenty of moisture.

Catalogues and seed packets furnish cultural directions and are explicit and easily followed.

TAKING THE HORSE'S PULSE

Valuable Means of Assistance in Ascertaining the Nature and Progress of Disease.

The pulse is due to an automatic expansion and relaxation in the wall of an elastic tube—the artery—caused by the jets of blood pumped into these vessels by means of a force pump—the heart.

Each stroke of the heart is equal to one pulsation, viz: a rising and falling of the arterial wall.

In health the average number of pulsations per minute is about 66 to 70. The larger the horse, the slower or fewer the number of beats per minute.

A very good situation to take the pulse is at the underside of the jaw. By rolling the tips of the fingers about a little they can be brought on to the blood vessels.

Don't press too firmly, nor yet too lightly. The animal must be kept still and quiet. In point of importance, the "character" of the pulse must be the best guide. That is to say, the blood vessel may impress us as feeling hard, soft, full, quick, small, wiry, regular or irregular.

Pulmonary apoplexy it may be beating 120 times per minute.

When properly taken it forms a valuable means of assistance in ascertaining the nature and progress of disease.

No. SIX-SIXTY-SIX

This is a prescription prepared especially for Malaria or Chills and Fever. Five or six doses will break any case, and if taken then as a tonic the fever will not return. 25c—Adv.

A healthy horse acts nine times its weight in food a year; a healthy sheep six times.

Use Roman Eye Balsam for scaling sensation in eyes and inflammation of eyes or eyelids. Adv.

WAGON SHED IS CONVENIENT

Constructed So That Teams May Be Driven Through and Vehicles Left in Proper Places.

All farm buildings should be constructed with a view to economy in expense and convenience in use. A most excellent wagon shed is so constructed that the teams may be driven

through the shed and the wagons left standing in their proper places. No time and labor are consumed in unloading or parking the wagons into place, extra early Vegetables.

Beans, beets, cabbages, lettuce, radishes. Start in window garden and transplant outdoors.

Peas and corn. "Sprouts" in moist sand in one culture. Start in window garden and transplant outdoors.

Tomatoes. Start in the end of February and keep potted till the end of May.

Hold the Moisture.

Get busy now with the surface cultivation. Don't now deep tillage. Keep the surface stirred and hold that moisture for the crops.

Working Wet Soils.

Don't bother your fields until they are dry enough to work well. You will injure your soil and crop too by working too wet.

Stacking Alfalfa—The Upright Place Is Made to Turn Freely and the Pulley at the Base Is So Placed That the Arm Around So That the Hay Is Deposited in the Center of the Stack.

Practical experience has shown that disking alfalfa under certain conditions is beneficial to the crop, yet many farmers will not cultivate their alfalfa plants in any way for fear of killing them.

As with other crops, the cultivation of alfalfa must be done with judgment. The main object in cultivating alfalfa plants, which usually consists in disking, is to kill summer grasses.

## None "Just as Good!" Nothing "Just the Same!"

Look for the name French Market Coffee and the picture of the old market that is on every package of French Market Coffee, roasted by the French Market Mills if you want the genuine.

If you can be satisfied with an imitation take the brand as near like it as the law allows, for both in name and appearance of package French Market Coffee has been imitated for over a century. But it won't be just as good, and it isn't just the same! There is only one FRENCH MARKET COFFEE.

Ask for FRENCH MARKET by name. See that you are given FRENCH MARKET and not ordinary coffee or inferior substitutes sold at the same price.

You'll know—after you try it—why this rarely delicious old French roast and blend has been famous for over a hundred years. Why there can be no other like it.

Roasted by our unique hygienic process.

FRENCH MARKET MILLS  
(New Orleans Coffee Co., Ltd., Proprietors)  
NEW ORLEANS

DIRECTIONS: We recommend that you make French Market Coffee in your usual way. If you find too strong, reduce quantity and strength and flavor are satisfactory. French Market makes more cups of good coffee to the pound than other brands, thereby reducing your coffee bill.

One night the shop burned down and Vance Peters disappeared. Within twenty-four hours it was known that he had been embezzling money and making false returns to his benefactor. He had juggled the books and it was believed had fired his plant to destroy the evidences of fraud.

The day after the fire Mr. Ross sat at home gloomily immersed in thought. He had been fairly stunned by the revelations of the faithlessness of the young man he had trusted and benefited. His adopted daughter, Elsa, watched his mood pining away. "Father," she spoke finally, "do not let this trouble distress you."

"If I had followed your advice I should have been better off," he replied. "You never liked Vance, you believed that he was deceiving me, and you were right. I shall be chary of trusting my fellow man again. For one thing I am sincerely thankful that is that I did not urge the wish of my heart that you and Vance should make a match of it."

Heartfree Elsa said nothing. She only regretted now that she had not repeated to the generous old man many evil rumors she had met with time and time concerning his business manager.

"I find that Vance had little or no system in the business," Mr. Ross said. "He had a bookkeeper, and under manager and a traveling man. They

## THE MAN WHO WON

By MILDRED CAROLINE GOOD, RIDGE.

David Ross had received a heavy blow financially and to his affections as well. He was an odd, silent old fellow, but when an impulse assailed him he carried it to the full limit.

Thus he had done with the son of an old-time friend now dead—Vance Peters. Mr. Ross had formerly operated a little shop in Virden, given to the manufacture of hardware specialties. He took a fancy to young Peters and retired from the business in his favor. He still retained ownership of the business, but gave Peters full sway, asking only a monthly statement of the business.

One night the shop burned down and Vance Peters disappeared. Within twenty-four hours it was known that he had been embezzling money and making false returns to his benefactor. He had juggled the books and it

The field is now open for entries for the race of Representative in Bulloch County. It is getting time to get in the race and get into the running. Don't hesitate boys, come right along, it's an open field and a free fight, and the devil will catch the hind out most.

"Little Joe Brown" is threatening to jump into the Senatorial race to succeed the late Augustus O. Bacon. Thousands of people in Georgia are wondering why that "Little Joe" is trying to butt into a race that is already crowded with entrants. Is he afraid to tackle Old Hoke?

Some of the papers are after J. Randolph Anderson demanding that he cease the Savannah saloons. If Mr. Anderson was able to put the lid on Savannah's whiskey saloons he would be entitled to have his picture hung in the hall of fame. The election to the office of Governor would be too small a reward for such an achievement.

"Census Bill Harris" has entered

the race for Governor and his platform seems to consist of two planks, one is to preserve the state road, and the other is to put the lid on Tom Watson. Mr. Harris announces that he will tender his resignation as director of the census. Bill better keep the job you've got, one bird in the hand is worth two in the bush.

#### Edwards' Military Road to Pass Through Statesboro.

Hon. Charles G. Edwards, representative from the First Georgia district in congress, has introduced a bill appropriating one million dollars for the construction of a "military highway" from Augusta, Ga., to Tybee island. The road referred to is proposed to run through the counties of Richmond, Burke, Jenkins, Screven, Bulloch, Effingham and Chatham, and will run through the city of Statesboro.

Mr. Edwards believes that it is the duty of the federal government to render financial assistance to the building of public roads. The proposed highway would be open for use to the general public, and if constructed would be a great stride for this section. The News would like to see this road built.

**Watson indicted Again.**  
We are again face to face with the fact that all fools are not dead yet. Not satisfied with their failure to make out a case against the Hon. Thomas E. Watson on a charge of sending obscene matter through the mails, another indictment has been sought and obtained based on the same transaction.  
There is no jury that could possibly be empaneled on an impartial selection in any county in Georgia that would consider for a moment a conviction on this charge. It only serves to give Mr. Watson more advertising and keep him in the public eye.

#### War With Mexico By no Means Improbable

And you would of course want to know all about the Mexicans, and their manner of fighting. The Star Theatre will show a four reel feature picture of the war now going in Mexico, showing how they fight, how they are armed and their manner of moving their soldiers.

One of the greatest war pictures ever made; full of action and excitement. Not a dull moment. Prices of admission ten and

twenty cents. This picture will be shown Thursday night, May 21st, for one night only.

#### Georgia Has 2,423 Baptist Churches

Nashville, Tenn., May 15.—The hearing and adoption of reports was the chief feature of this morning's session of the Southern Baptist Convention. In the statistical report, read by Dr. Lansing Burrows, it was shown that Georgia has 2,423 churches, with a total membership of 297,079 and church property valued at \$6,127,167. Atlanta alone has 52 Baptist churches with a membership of 4,112.

The question of a forward step in denominational education came up and the general tenor of the convention was for a forward and definite move on the question. An educational board probably will be formed to look after this phase of denominational life.

#### Recital at Auditorium

The voice class of Miss Irene Arden will give a recital at the auditorium on Thursday evening (May 21st) at eight o'clock. The public is cordially invited to attend for there is no charge for admission.

### A Helping Hand

There are times when a helping hand would pull you through. We have helped many in times past. We hope to be able to help many more in the future. Are you in need of help? If so, come to us and let's talk it over. If it is anything within the limit of safe, reliable banking business, we can depend upon our hearty encouragement.

### The Peoples Bank

Oscar H. Marsh, Cashier.

### There Will Be Some Rainy Days for All

Your money is your best friend. Take care of it now while you are able to work, and when you are sick it will take care of you.

**Our Bank is a Safe Place to Keep It**  
Ships carry lifeboats. Why? To be on the safe side should anything happen. So this is why you should carry a bank account with us. Things happen very suddenly sometimes, and things you are not expecting, and if you have a bank account you are always ready. Now is the time to save your money while you are able to work. Make our BANK your BANK, and increase your balance each month. We pay interest on TIME DEPOSITS. Come to see us. NO ACCOUNT TOO SMALL OR TOO LARGE.

Mrs. E. J. Foss and little Ruby returned last Friday evening after a ten days visit in Jacksonville with her daughter, Mrs. Bloys DeLoach.

#### Cow Strayed

About April 22nd last, a white spotted, medium sized cow, marked with a white star on her forehead, was seen in the neighborhood of Statesboro.

Mr. Chance, Government Postal Inspector was in town this week looking into the matter of installing the free mail delivery for the city of Statesboro. Mr. Chance stated that he found the houses numbered and the streets named as required by law, and expressed the opinion that the service would be put on in a short time.

We receive each month a paper, "The Right Way," printed by the Central of Georgia Railway, which is highly interesting and of great value to the employees of the road.

### "The Spy of Gettysburg"

"The Spy of Gettysburg" is being staged for the commencement play. It is a drama full of bright fun and soul stirring incidents. The incidents of this play cluster about the tremendous struggle at Gettysburg, and despite the adventure of the hero while acting as a scout for General Meade.

The cast of characters is as follows.

General Meade, commanding the Army of the Potomac—Grady A. Miller.

Harry Lenox, a Federal Scout—George Parrish.

Major Timothy Tapley, an eccentric member of Lee's army—Barney Anderson.

Uncle Mose Mulvey, a relic of the Mexican war—John T. Brannen.

Cyril Blackburn, the blacksheep of a noble Virginia family—Clifton Fordham.

Soloman, an independent "coon"—Beverly Moore.

Jenson, a willing tool of Blackburn—Roscoe Deal.

Mabel Meredith, a true-hearted girl—Marion Foy.

Lottie Evans, her cousin, full of humor—William Franklin.

Mrs. Mose Mulvey, with a mind of her own—Elsie Belle Trapnell.

Time of playing, two hours and thirty minutes. Costumes of the period will be provided.

The public should look forward to this historical play with great pleasure. The synopsis will appear in a later issue.

### Digging the Panama Canal By Dynamite

The Dupont Powder Company will show at the Star Theatre Friday and Saturday nights, May 22 and 23rd, a one-thousand-foot picture showing now and where dynamite, stumping, ditch digging and every known use dynamite is put in use for.

Don't miss this picture as it presents an opportunity that you may never have again to study and see the effects of this wonderful agency of destruction harnessed for commercial purposes.

### Bully for Him.

EDITOR NEWS:  
I notice in your last week's issue a card from Col. J. A. Brannen condemning the practice of candidates using whiskey during the campaign and I say, Bully for him.

Yes, I endorse every word of his protest. I have often said, and still say it, that any man who uses whiskey in order to gain his election should never be allowed to hold office during life, and any man that will sell his vote for whiskey should never be allowed to vote again.

He should be disfranchised. I always think it is our duty to vote and I never vote for one who uses whiskey, if I know it. I voted for one once that I thought to be above the low practice, but afterwards I was informed that he used whiskey during his campaign and I have always regretted doing so, but I have the consolation of knowing that he was defeated. There is one thing that I am proud of, and that is, during the forty years that I have been voting in Bulloch county not one has offered to buy my vote. They know that my vote is not for sale.

There is one thing, however, that I think Mr. Brannen is mistaken in. He says ALL the candidates in the last campaign used liquor. This may be true, but I really think at least one of them did not use it, though I may be mistaken. Yes, I hope the proposition will be carried into effect and the practice be ultimately stopped, for it demoralizes politics as its detriment to society, as it is a sin in the sight of God. Yes, put me down as one favoring the proposition.

Yours for reform,  
B. W. DARSEY.

To say that unionism is wrong for the white man because the negro organizes, is as reasonable as to say that churches are wrong because the negroes have their churches.

Georgia still retains one feature of the old Macon law, "an eye for an eye, a tooth for a tooth,"—that is the law for perjury. If a person is convicted on perjured testimony for murder, the one who commits perjury, if convicted, receives the same punishment as the murderer.

This law won't hold much encouragement to the many witnesses connected with the famous Leo M. Frank case in Atlanta.

The dry weather has killed the oat crop, but the crop of fishermen is the largest in many years.

### Death of M. A. Newton

On Friday night in the Statesboro Sanitarium after a short illness, having been brought to the sanitarium the afternoon before, Mr. M. A. Newton died. The deceased was a mail carrier on Stillson route No. 2 and made his home in the town of Stillson. He was taken sick with pneumonia about three weeks ago and an attack of pleurisy and other complications set in. The remains were carried away on the S. & S. train on Saturday morning, they were given an honorary escort from the sanitarium to the depot by the seven rail carriers living in Statesboro, together with postmaster E. M. Anderson and some of his assistants.

The remains were interred at Corinth cemetery on Sunday, where the funeral was conducted with Masonic honors.

A large number of sorrowing friends and relatives attended the funeral. The deceased leaves a wife and two children.

### Metter Organizes Chamber of Commerce

During the past week the citizens of Metter met and organized a working Chamber of Commerce, Mr. A. J. Bird was elected President, Mr. J. T. Trapnell, Vice President and Editor F. H. Sills, Secretary.

The Chamber is now fully organized and ready for business, having for its purpose the mutual benefit of the upbuilding of the City of Metter and its surrounding country.

One of the chief objects of the chamber will be the active pushing of the work incidental to the fight for the creation of the proposed county of Candler with Metter as its county seat. This movement has been on for several years and the people of this section are thoroughly familiar with it. Another achievement hoped for by the chamber is the building of a rail

road connecting the Seaboard with the Central.

### Portal Elects Town Officers

On last Tuesday the voters of the flourishing little town of Portal held an election for the purpose of electing a mayor and council. Hon. Elmer Daugherty was elected mayor, and the following board of council was named: A. A. Turner, A. H. Woods, J. W. P. Chambers, M. C. Hulse and Dr. J. A. Stewart.

On Friday night at her home on Institute street Mrs. Poole passed peacefully away, after an illness of several weeks. The deceased suffered an attack of paralysis about a month ago, from the effects of which she never recovered.

The funeral was held from the home on Saturday afternoon, the services being conducted by Rev. J. F. Singleton pastor of the Baptist church. The interment was in the East Side Cemetery. The family moved here from Stillmore several months ago. Having no relatives here, they were given an honorary escort from the sanitarium to the depot by the seven rail carriers living in Statesboro, together with postmaster E. M. Anderson and some of his assistants.
