When You're Candy Hungry

no other candies taste so good as Nunnally's.

Pure, cleanly made, and delicious to the utmost degree, these candies are famous throughout the South.

Nunnally's

Candies are the very highest grade money can buy. They're shipped to us almost daily by fast express. Hence, always fresh.

For Sale by FRANKLIN DRUG COMPANY.

THE LIMOUSINE.

(The Somerville Journal.)

Life doesn't seem the same to us since father bought a limousine.

Our thoughts, our dreams, our talk—yes, all—

Are flavored now with gasoline. We realize what we in years of limousineless life have lost.

What joy to see the neighbors stare

And know they're wondering what it cost!

On cushioned air we glide along—

The tires haven't busted yet—

With not a single thing to show

How deeply father is in debt.

We look as rich as Carnegie.

And ma's especially elate.

Although, of course, she had to sign

The mortgage on pa's real estate.

We go out riding every day.

And you can bet we eat a dash.

Although we must admit we are

Extremely short of ready cash.

What though the sordid tradesmen wear

A look that's not at all serene?

Our life is so much broader now.

Since father bought a limousine.

Lost.

Half moon shape pin with 14 pearls around edge, and has three ovals in center, between my boss and S. & S. D. post. Finder will please return and receive reward.

MRS. W. H. DeLOACH.

For Sale.

NOTICE.

There will be a picnic at W. A. Akins' mill, known as the Barnes' Old Mill, next Saturday, 27th inst. Will have a good string band engaged for the day. Also refreshments served. Come one and all.

BARNES & AKINS

May 22-24.

Card of Thanks.

We take this method of extending our gratification to the good people of Statesboro who so generously assisted us during the illness, death and burial of our dear husband and father. God alone knows how much we do appreciate such kindness.

Mrs. J. E. Deriso and children.

Notice—Shingle Mill for Sale.

One Trevor No. 1 shingle machine, one bolter, with two 48-inch inserted tooth saws, 48-inch butting saw outfit, two presses, rip machines, 30 h. p. Ames engine and boiler. Capacity 25,000 to 30,000 daily. Reason for selling, no suitable timber near. Price, \$1,100, one-third cash, one-third in 2 months, one-third in 4 months. (Including also belts complete and counter shafting, ready for business.)

J. D. STRICKLAND.

Stillson, Ga.

DEATH OF S. R. McELVEEN.

On yesterday afternoon, after a long and painful illness with typhoid fever, Mr. Stephen R. McElveen died at his home about seven miles from town. The deceased leaves a wife and several small children. The funeral was held this afternoon at Middleground church, where the interment was made. A large number of sorrowing friends and relatives were out to pay him their last tribute of respect.

SCHOOL WILL CLOSE AT PRETORIA

The spring term of the school at Pretoria Academy will close next Wednesday. One of the most successful terms in the history of this prosperous and wide-awake community will terminate when the exercises have been concluded on Wednesday. Misses Ora Franklin and Jessie Mikell have conducted the school there during the current term.

CARD OF THANKS.

I take this method of thanking many friends for the kindness shown me during the sickness and burial of my wife.

J. C. MOCK.

Cow Estray.

Strayed from my place near Enal, about one month ago, one large yellow, dehorned cow, about seven years old. Suitable reward will be paid for information as to her whereabouts.

Mr. and Mrs. F. C. Parker left this week for Marietta, where they will make their future home.

Mrs. J. S. McElmore is expected in Statesboro on Monday to spend several days.

Oh! Two little wrinkles before your ears peep.

They crept there and lingered while you were asleep.

Two little wrinkles and what do they say?

Go to the Beauty Parlor right away!

Mr. and Mrs. W. M. Oliver, of Valdosta, are visiting relative in Statesboro. They came through in their automobile.

Misses Hortense and Kathleen Mulloy returned from school at Rome on Monday. They were accompanied home by their father, Prof. Mulloy, who went up to be present at the commencement exercises at Shorter College.

We have full stock Pictorial Review Patterns. Mail your orders to

ALDRED & COLLINS.

Mrs. A. E. Lee is spending some time with relatives at Swainsboro.

Did you know it is essential that you have your nails manicured every day? "So hurry," call at the Beauty Parlor right away!

Large crowds from Statesboro have been attending the commencement exercises at Brooklet during the week.

The hot wave struck us broadly side the early part of the week. The light shower which fell early in the week has melted away and rain is again badly needed.

Ladies' White Canvas Oxford.

ALDRED & COLLINS.

Nearly all of the people who went to the reunion at Little Rock have returned home safe and sound.

Next Tuesday will be a big day in Statesboro. With Gov. Hoke Smith at the Agricultural School at the noon hour and Hon. P. A. Stovall at the Statesboro Institute at night, there will be something doing.

Wanted—Men and boys to learn the Automobile business, and secure a good position. Demand greater than supply. Special offer to those enrolling now. Come and see us. Savannah Auto School, 203 Real Estate Bank Bldg., Savannah, Ga.

Col. A. M. Deal went down to Waycross last night to attend the good roads meeting held there in behalf of the automobile highway between Augusta and Florida via Statesboro, Claxton, Reidsville, Baxley and Waycross.

Mrs. W. B. Martin returned home from Savannah yesterday with her little daughter, who was taken there to have an operation performed for throat trouble.

SCHOOL CLOSING NEAR BROOKLET.

The school at Brannen Academy closed on yesterday. There was a large crowd of patrons and friends gathered to witness the closing exercises. Miss Annie Waters has had charge of the school during the term which closed on yesterday. A sumptuous spread was laid before the large crowd. Prof. E. C. J. Dickens, of the First District Agricultural School, was the orator of the day. A number went down from Statesboro, all of whom report a fine trip.

Master Robert Sample returned home this week from Mt. Vernon, where he has been attending school at the Union Baptist Institute.

A Surprise Reunion at Mr. Joshua Ellis'

Last Sunday the children and grand-children of Mr. and Mrs. Joshua Ellis near Metter, met and had a surprise family reunion. It was Mr. Ellis' 60th birthday, and the children had planned a reunion for six weeks or more to take him by surprise. It was arranged for Misses Ruth and Dell Ellis to carry their father over to Salem, a distance of three miles, to preaching, and while they were there the remainder of the children and grand-children arrived.

Those present were Mr. and Mrs. Jake Ellis and children, of Halcynodale; Mr. and Mrs. W. H. Ellis and children, of Statesboro; Mrs. Lizzie Kammit and children, of Statesboro; Mr. and Mrs. Ben Ellis and little girl, of Pulaski; Mr. and Mrs. John Everett and children, of Pulaski; Mr. and Mrs. J. C. Wright, of Metter; Mr. and Mrs. John Ellis and children, of Metter; Mr. and Mrs. John W. Giddens, of Swainsboro, and Misses Ruth, Dell and Eliza Ellis at home.

There were thirty-nine children and grand-children present. Only one member of the family absent, Mr. W. H. Ellis, of Statesboro, who is away from home.

After a regular old-time Bulloch county dinner was served the children assembled on the front porch, where they had brought forth from its hiding place a most beautiful surrey, which was presented to the father and grandfather by Mr. O. B. Ruston for the children.

The day was quite a surprise for the aged father, and will ever be remembered by the children and grand-children.

Lost Note.

All parties are forewarned from trading for the following notes which were lost from my office on the 26th day of May:

G. M. Martin, two hundred and forty-three dollars and sixty-three cents. One on M. Joiner for thirty dollars and two cents. One on Moses Roe for twenty dollars and one cent. One on J. B. Kennedy for one hundred and forty-two dollars and twenty-one cents.

Any information as to their whereabouts will be rewarded.

Tuesday and Friday.

J. R. MILLER, Editor.
Entered at the post office at Statesboro as 2nd class mail matter.

HE BELIEVES IN ADVERTISING.

Among the party of Dubliners here on Friday evening last was Mr. Arnau, manager of the Four Seasons store at Dublin. Mr. Arnau was asked if he believed in advertising as a paying proposition. He stated yes, when intelligently done. He stated that his firm expended about three thousand dollars per annum in advertising.

Now this is about twice as much as the entire city of Statesboro expends with all the newspapers printed here.

The business men of Statesboro are so scared they will spend a dollar in printer's ink, that will not return the next minute, until it frightens them in an inch of their lives when a penny happens to slip through their fingers.

With all the proud boasts of this city we suspect that it is within the range of probability that this one Dublin firm not only spends twice as much money as does in advertising, but does about twice as much business as does this town. This firm probably draws its business further than does this entire town. Therefore it is a great incentive to others to do likewise, and tells in a measure why it is that Dublin and Laurens county are forging so far ahead of Statesboro and Bulloch county. They have left us so far until they can't even look back and see us.

But Statesboro grows some in spite of the folks. Occasionally we see a building go up, but the fellow who puts it up generally has his mind pitched on the fact that the interest from it must come back double fold and that forthwith.

There is absolutely no disposition to stretch out here.

There is not a public enterprise here that is self-sustaining outside of the banks and the stores; there may be some exceptions, but they are few and far between. The biggest business in this town is the business of money lending, and the stock of these concerns pay more dividends and sell for more on the market than anything else.

Statesboro has no board of trade, or any other organization organized for the purpose of boosting things—in fact one couldn't live here long enough to get started.

Here is a town situated fifty percent better than Dublin is, with a better country backing it than Dublin has and yet lumbering to everything that means get up and go ahead.

Swainsboro slept thirty years, but her folks have wakened up and got busy. They have seen the interest fade away and the tide of prosperity turn towards other towns, and now Swainsboro is sitting up and taking notice. But Statesboro has gone to sleep.

Sylvania is taking on new airs and bidding for public enterprises, but Statesboro has gone to sleep.

Millen is waking up and reaching out for trade, that once belonged to this town yet the old town hasn't heard about it and continues to snooze.

Graymont is forging ahead, and the wagon trains of Bulloch county farmers who have turned their faces towards the young metropolis of Emanuel would make the average Statesborian business man turn heart sick if he was to happen ever to open his eyes long enough to look around and see the procession move by.

Statesboro is sitting idly by and looking on at a magnificent piece of railroad property traversing the heart of the best section of her territory, with one end pointing north and the other south—both ends pointing away from us, yet no one here has ever thought about it.

There is not a single citizen of this great little city that is building some in spite of the folks, who is turning his hand over to do a single thing in the interest of his town.

The above are unpleasant things to put in print but there is more truth than poetry in them just the same.

BULLOCH AND GOOD ROADS.

Certain automobile enthusiasts and newspapers who have it in for Bulloch county are beginning to criticize this county for her failure to pledge the entire road working forces of the county to the building of highways for the use and benefit of passing automobiles and the encouragement of automobile highways.

Bulloch county people are in favor of good roads and at great expense is now engaged in building roads that will be good for many years to come. With few exceptions our people would like to have as many strangers come our way as they can reasonably induce to come. In other words the latest thing is on the outside of the door and the door stands ajar as far as that is concerned.

But first of all the authorities have to keep in mind the interest and welfare of that great tax paying class of our citizens who contribute the sinews of war that makes it possible for these roads to be built.

Under the system now in vogue the roads have been worked out as far as possible from the centers of trade, wherein the greatest amount of travel is done and the greatest amount of good is accomplished.

While we appreciate the passing of our friends who drive automobiles for business and pleasure through our midst, yet we are frank to say, that if they cannot drive over our roads as they find them, roads on which have been spent the hard earnings of our tax payers, they will have to go elsewhere.

In the meeting on Friday night our Dublin friends were cordially invited to build their highway from Atlanta to the sea through this county, yet there was nothing we could promise them except that which we already had, and that which our well defined and perfectly understood plan would bring.

The automobile roads will be worked when their turn comes, and not before. The Board of County Commissioners that undertakes to build roads for automobiles at the expense of all other vehicles will be doing their duty a great injustice.

We regret very much the fact that with all of our road building we haven't as yet been able to satisfy the Savannah Automobile Club and the Savannah Morning News. There is a marked difference in the tone of the dope issued on the two highways now being planned between the Press and the News, of Savannah. The News, it seems, can find nothing commendable in Bulloch's roads, while the Press accounts have been more liberal toward us. The News paints from day to day an all paved highway through Screven county, when it knows that it will take years of hard work and an expenditure of large sums of money to bring the Effingham-Screven Highway up to the standard of the Bulloch county roads as they now are. The News sees in the condition of Bulloch's roads the only barrier standing in the way of the Dublin route coming this way.

Now this is all right, the people of Bulloch are not worrying over the fact whether either of these routes come this way or not. As

stated in the foregoing, we have nothing to promise except that which we already have, and if the Savannah News and the Savannah Automobile Club want better they will have to go elsewhere and get it.

AGRICULTURAL SCHOOL HAS FINE CLOSING.

The commencement exercises of the first District Agricultural School have been on since Friday night and have been well attended from day to day. On Sunday Dr. O. P. Gilbert, pastor of the Second Baptist church of Augusta, delivered the commencement sermon to a large congregation of students and friends. The sermon, like all other commencement sermons, was more of an address than a sermon. His remarks were directed to the young manhood and young womanhood of the country, as represented by the large number of young folks who were present. The talk was one of the best we have heard in many years, and those who missed it were the losers by their absence.

On Monday afternoon the display of Domestic Science and Domestic Art was viewed by hundreds of people who went out to look at it. The larger portion of the visitors on this occasion were ladies, this department appealing more strongly to the ladies than any other. Refreshments were served from the Model Home and a magnificent display of domestic art was admired by every lady present. Hundreds of garments made by the girls of the school with their own hands were displayed, and the neatness with which they were made up made some of the mothers wish they had had these opportunities while they were growing up. The exhibition in the Domestic Science Department also met with hearty approval.

On Monday night the graduating class had charge of the exercises, nine in number, following each other in the order of the printed program, they delivered a number of essays and musical selections. A large crowd was out to witness this.

Berkshire Pigs for Sale.
The short nose kind, and all subject to registry; no better blood in the South. Price, \$10.00 and \$15.00 each. Send your order and I will have pig registered if wanted.

F. E. FIELD,
Statesboro, Ga.

FINALLY CATCHES RUNAWAY WIFE.

Boatright's Chase Ends, Finds His Children After Search of Three States.

Albany, Ga., May 25.—W. E. Boatright, the Alabama farmer who followed his wife and the man with whom he alleges she had run away, back and forth through parts of three states for five months, has at last overhauled them and taken possession of his two little children. These he has taken back to his home, leaving the wife with the man with whom she ran away.

The case is a remarkable one and has attracted a good deal of attention. Purser and pursued traveled in buggies, camping out at night and zigzagging back and forth through Alabama, Georgia and Florida.

Boatright carried a rifle wherever he went, but declared he would use it only in case of necessity. What he wanted was his children, who had left him, he could go where she pleased.

Boatright passed through Albany four or five times during his five months' chase, and each time he was but a day or two behind those whom he was following. Several times he missed them by but a few hours. Sometimes the trail was entirely lost, but he always managed to take it up again.

Now this is all right, the people of Bulloch are not worrying over the fact whether either of these routes come this way or not. As

SELL THE PHILIPPINES.

(Savannah Press.)
Colonel Waterston's suggestion that the United States should sell the Philippine Islands to Japan is a pointed one, though it is rather doubtful if Japan would consent to purchase them unless they were put on the bargain counter for her benefit.

There is a great deal of silence on the subject of the Philippines and the public generally hears so little about them and regards them as so distant and vague that our policy in the East receives very little attention. The Republican party appears to desire to keep the grey matter of the public free from all unpleasant agitation on the subject and the Democratic party seems equally reluctant to tackle the matter and thresh it out. The anti-imperialists, apparently, are sleeping peacefully and everything is rocking along to the satisfaction of those who are having their own way. Occasionally the national joke of Hobson and the Japs is lugged out, when times are dull with the paragraphs, and more than occasionally we hear of how dearly the Japs love us.

Considering that the Philippine Islands are the logical expanding ground for the Japanese, who have outgrown their own lands and are bound to get possession of others, it is very pleasant to hear of how much they love and admire the United States. Meantime, sure of their kindly intentions, we are spending enormous amounts of money in fortification and modern improvements in the Philippines. The islands are overrun with Japanese spies and there are practically no secrets from them. Many of the natives of the Philippine Islands are so close to the Japanese in appearance and characteristics that it takes an ethnological expert to trace the different racial strains in them, consequently there is no doubt, either of the army or the civil government, into which the spies of Japan find the slightest difficulty in pursuing their investigations.

Insufficiently guarded, and at great distance from our base, surrounded by natives whose nature is essentially intriguing, treacherous and easily moved to antagonism, who are ripe for insurrection and rebellion at any time that a powerful nation shall call them to war against us, our position in the East is, to say the least, one which invites trouble, if not from Japan, then from other nations to whom our presence in the Orient and our influence upon the Orientals is troublesome and abhorred.

The great wealth of our country and the confidence it engenders that in the ultimate reckoning, no matter what our unpopularity may be, the United States will win out, is our great protection. But the situation in the East is complex and our policy here is one of harmony with the policy of other nations. Nor is our position in the East in harmony with our own principles of government. We are ourselves violating the spirit of the Monroe doctrine in extending our domain to Asia, while assuming the complete guardianship of this hemisphere.

Happening as though by accident upon this rich find, way around on the other side of the world, we have pursued random and haphazard colonization policies of a highly theoretical character. Little or no general discussion of our policy was even put before the people, and no definite policy seems to be understood. News from our Eastern possessions is scanty, although it could not fail to be interesting, and the great American public, the supposed sovereign ruler of this country, is comfortably ignorant even that there is a question. The sooner the matter is threshed out and understood and a definite course is agreed upon the better.

Meanwhile let us consider Colonel Waterston's suggestion carefully—that is, if Japan feels that she can buy them as cheaply with money as she may with blood.

GREAT STRIDES BY SOUTH IN IMPROVING HER ROADS.

(Atlanta Constitution.)
But not less than 25,000 miles of road were improved throughout the South in the short period from 1904 to 1909, was asserted by Logan Waller Page, director of the United States office of public roads in an interesting address before the National Good Roads Association at the convention held at Birmingham, Ala., May 23-26, 1911.

The additional miles of road that have been improved make a total of improved mileage of 42,280, or 6.67 per cent of all roads in the South.

"From this," said Mr. Page in his address, "it will be seen that during the brief period of five years the South has increased the mileage of its improved roads by practically 100 per cent, and this during what might be termed a transition period in the administration of its road affairs."

"One of the potent results of these reforms, and one which gives promise of greater progress in the future, is the interest and enthusiasm which has been aroused in the subject of road improvement in the South. That this enthusiasm is of a substantial character is evidenced by the fact that more funds have been raised by taxation and bond issues for expenditure during 1911 than ever before."

"At the present date, there is available for expenditure in the sixteen Southern states the sum of \$40,625,000, or \$59 per mile, which is practically double the expenditure of 1904. There will be, however, other large funds available during the year, as many counties are agitating, and will, no doubt, vote large bond issues for road improvement. It is further shown that the South is keeping pace with other sections of the country in the matter of road improvement, by the fact that practically one-third of all funds available for expenditure on roads during 1911 are available in the sixteen Southern states, while in 1904 the other states of the Union expended practically four times as much as was expended in the South."

"Conditions in the South require road improvement more urgently than in any other section of the country, for the reason that the roads are subjected to more continuous heavy traffic as they are nearly always up and this season, they are up and running during this period, if they are properly graded, that they be improved more cheaply than those of the North. In the South, labor is cheaper, and convict labor can be utilized and the road-building season is longer. Also, a cheaper type of road, in most cases, can be built in the South, as sand-clay roads can be constructed, these answering all the ordinary traffic requirements, and costing only about one-tenth as much as macadam or other roads suitable to Northern conditions."

"Moreover, the roads of the South are not subjected to as severe frosts and freezes in the spring and fall as those of the North, and consequently the injury from this source, necessarily makes the cost of maintenance less. So while the South stands in the greatest need of road improvement, its conditions are most favorable for meeting that need."

Mr. Page illustrated how much more cheaply the South can improve its roads, and gave statistics to show how counties with improved roads have greatly increased their population, while those without good roads have lost in population. He also showed how millions of dollars have been saved by the improvement of public highways throughout the South.

"Once the South has a complete system of public roads," he predicted, "it will become the most prosperous section of the United States. Good roads mean more to the South than to any other part of the country, because it is here that the cost of moving crops has been so high. The South today is enjoying an era of prosperity and expansion. Improvements are in progress all along the line. Its population is increasing each year; its railroad mileage is being extended; its manufactures are enlarged; its agriculture is each year opening up to new possibilities and bringing new areas under cultivation. In order, however, for this growth to continue, it will be necessary that the roads of the South be improved, population, impede its railroad development, hamper the enlargement of its manufactures, and restrict its agriculture."

DRAWING A CLEAN LINE.

(Savannah Press.)
To offer applause to the President for the stand he has taken in refusing to pardon two very prominent and influential convicts, would savor of reflection rather than praise since he has simply followed the only course open to an honest and honorable executive, to whom the respect for law and the preservation of honest ideals in our citizenry naturally weigh in the balance against personal sympathy for the shamed and the suffering of the criminals.

Mr. Taft, however, in using this occasion to give full emphasis to the lesson which the conviction of these two gentlemen of high finance should teach, showed a keen and true appreciation of the evils of our times and his words will do much to bring a higher tone to public sentiment.

"The truth is," said the President, "that in the mad rush for wealth in the last few decades, lines between profit and legitimacy have been profit and legitimacy have been dimmed, and the interest of society requires that whenever opportunity offers those charged with the enforcement of the law should emphasize the distinction between honest business and dishonest branches of trade."

It has been remarked by historians that the inordinate love for wealth has sounded the death knell of all civilizations. Certainly it is one of the most insidious evils of the United States today.

Walsh and Morse are no more dishonest than many others who now enjoy the prestige and honor which great possessions give—no matter how they have been acquired—but Walsh and Morse have fallen into the clutches of the law and for the sake of society they must not be spared. The very spectacle of them, painful and appealing as it is, is a necessary example of the logical ending of devious and undefined notions as to the use of other people's money.

Had the President pardoned these two criminals his action would have had a widespread influence for evil, but it is unnecessary to say that the idea of doing such a thing has never been seriously considered. In so clearly and unequivocally sound a note for clean and honest business, however, he has made the most of a good opportunity to tone up the financial and social ideals of the entire country.

Meanwhile let us consider Colonel Waterston's suggestion carefully—that is, if Japan feels that she can buy them as cheaply with money as she may with blood.

GREAT STRIDES BY SOUTH IN IMPROVING HER ROADS.

(Atlanta Constitution.)
But not less than 25,000 miles of road were improved throughout the South in the short period from 1904 to 1909, was asserted by Logan Waller Page, director of the United States office of public roads in an interesting address before the National Good Roads Association at the convention held at Birmingham, Ala., May 23-26, 1911.

The additional miles of road that have been improved make a total of improved mileage of 42,280, or 6.67 per cent of all roads in the South.

"From this," said Mr. Page in his address, "it will be seen that during the brief period of five years the South has increased the mileage of its improved roads by practically 100 per cent, and this during what might be termed a transition period in the administration of its road affairs."

"One of the potent results of these reforms, and one which gives promise of greater progress in the future, is the interest and enthusiasm which has been aroused in the subject of road improvement in the South. That this enthusiasm is of a substantial character is evidenced by the fact that more funds have been raised by taxation and bond issues for expenditure during 1911 than ever before."

"At the present date, there is available for expenditure in the sixteen Southern states the sum of \$40,625,000, or \$59 per mile, which is practically double the expenditure of 1904. CONEY ISLAND

SWEEP BY FIRE

Damage Is Estimated Between Two and Three Million Dollars.

"DREAMLAND" A MASS OF SMOKING RUINS

Fire Started at Two O'clock in the Morning and Lasted Over Three Hours. About Two Hundred Buildings Were Burned Down.

New York, May 27.—Coney Island, the playgrounds of New York, suffered the worst fire disaster of its history today. Dreamland, the largest of the amusement parks, was wiped out and about four blocks adjoining, covered with booths, restaurant hotels, moving picture theaters and resorts of varied types, were destroyed.

The fire broke out at two o'clock in the morning and was not under control until 3 hours and a half later. The loss was amount to between two and three million dollars.

In all about two hundred buildings were burned, and perhaps two thousand persons—cessionaries and employees—were turned into the streets, homeless and penniless. No lives were lost. The burned area represents nearly a third of the entire amusement city, all of which undoubtedly have gone in the teeth of a strong wind but for the fact that Coney Island, with its high pressure water system, specially designed for fire protection, guarded against a disaster of this kind. The fire was started, a tiny blaze, in the tatterfolding of "Hell Gate," the scenic railway close to the entrance to Dreamland.

lion made his way across the avenue into the dark wooden tunnels of "The Rocky Road to Dublin." In a black corner beneath a painted scenery of equatorial Africa he made his last stand. Three final volleys were required to finish him and he sank to the ground riddled like a sieve. To make sure that he was dead one of the policemen pulled down the fire axe from behind the scenery and knocked the skull in two. As soon as the crowd was assured that the lion was no more they rushed in and literally tore the carcass to bits for souvenirs. The first man on the scene tore the tasseled tail, the three next divided the long mane, and fifteen men fought among themselves for the honor of possessing one of his teeth.

Meanwhile the escape of the big lion had cut short the work of the animal men and fire was already in the menageries before their work was completed. Sixteen of the one hundred and five animals were left to die by fire.

The cause of the fire probably will never be determined. In "Hell Gate" scenic railway workmen with tar pails had been smearing the causeway to protect the seafooding against the weather. It is supposed the fire somehow had its origin from a hot tar. Dreamland was worth \$2,500,000 and there was \$1,000,000 insurance.

Saved Child From Death.

"After our child had suffered from severe bronchial trouble for a year," wrote G. T. Richardson of Richardson's Mills, "we feared it had committed. It had a bad cough all the time. We tried many remedies without avail, and doctor's medicine was used as useless. Finally we met Dr. King's New Discovery, and are pleased to say that one bottle effected a complete cure, and the child is again strong."

SELLS FOR \$128,000.

H. C. Bagley Sells 2,100 Tract at \$60 an Acre, a New Record Price.

Atlanta, Ga., May 27.—When a Georgia plantation sells for \$125,000, or \$60 an acre, it sets a new record for the state. This, what H. C. Bagley, the Atlanta insurance man, has received for his 2,100-acre plantation near Americus. He still retains his other big Sumter county plantation and his tract in Macon county, aggregating 4,000 acres, and he says he will hold on to them.

J. D. Whitwell, a wealthy planter of Whitwell, S. C., is the purchaser of the property, and will devote it entirely to farming, preferring this to peach growing.

The price paid is by far the highest ever given for a Georgia tract of this size, and Mr. Bagley attributes it to the recent advance in development of Sumter Georgia and to the improvement in the roads of that section. The plantation was his old home place and he parted with it reluctantly, though he made a handsome profit. It has advanced in value from \$15 to \$60 an acre since his time, besides an almost sure profit from its products in the years he has owned it.

Mr. Bagley, who is a member of the insurance firm of Bagley & Willet, is a good example of the business man-farmer. He took the last two days of the week to his plantations, spending the rest of his time in his office and has made a success of both interests. He organized the Georgia Fruit Exchange several years ago, a body which has made it possible for peach growers to market their fruit with a profit.

Do Ghosts Hunt Swamp?

FOR AN AERIAL NAVY.

Washington, May 6.—The foundation of Uncle Sam's aerial navy was laid today when Assistant Secretary Winthrop signed contracts aggregating \$130,000 for the delivery at the navy academy by July 1 next of three aeroplanes. These will represent the very latest developments in aeronautics, being capable of rising from and alighting upon the water or the deck of a ship, of carrying at least one passenger in addition to the aviator, and of being equipped with a 500-pound wireless outfit.

Two of the machines will be of the Curtiss type, one with cylinders and the other four, and the other aeroplane will be furnished by the Wright brothers. Prices range from \$27,700 to \$50,000. Immediately upon the delivery of the machines a new school of instruction for aviators will be established at Annapolis under the care of Captain Chambers, who has made a specialty of aeronautics.

OPENING OF HOTELS, ETC., AT TYBEE BEACH, SEASON 1916.

We take pleasure in announcing to the opening of hotels, cottages, bath-houses, dancing pavilions, etc., at Tybee Beach, for the forthcoming season, as follows:

NEW HOTEL TYBEE. COTTAGES AND BATH-HOUSES.
Struble & Cubbedge, proprietors. A. R. Walty, manager; fireproof reinforced concrete buildings, porches, running water or private bath in every room. Light throughout by electricity. A. R. Walty, also Restaurant and Canteen. Rates \$2.00 to \$5.00 per day. Will open June 1, 1916.

SEABREEZE HOTEL, R. F. McFadden, Proprietor. 50 rooms. American Plan; rates \$2.00 per day. Will open May 15, 1916.

CHILEANS BURN FLAG OF PERU

Iquique, Chile, May 28. — A mob today attacked the Peruvian Club and burned the flag of Peru. Troops were summoned to quell the rioting and several persons were wounded. The Peruvian consul has resigned and has asked the United States consul to protect Peruvian interests in this place.

The organization of the mob and the rioting that followed were the outcome of a publication in the newspapers that the Chilean con-

sulate in Callao, Peru, attacked and burned the consular building.

Diplomatic relations between Peru and Chile were severed more than a year ago. The Peruvian government withdrew from Lima and the Peruvian army withdrew from Santiago. This brought about by the Peruvian priests from the provinces of Tacna and Arica a bitter and actual dispute between Peru rests on the ownership with regard to Arica province, which a plebiscite of the inhabitants of these provinces suggested.

Decades.**

(Atlanta Georgian.)

It is written that the metropolis of the new world is to wrest from London, the metropolis of the old, the distinction of being the largest city on the globe. Not right away, nor soon, perhaps, but statisticians who have in hand the figures of the 1910 British census, issued Thursday, can convince even the most unbelieving that within the next two decades this very thing will come about.

The figures announced Thursday give the British city a population of 2,522,992, an increase of ten years of 11 per cent.

The 1910 census gives New York a population of 4,766,837, an increase over the 1900 census of 38 per cent.

Figuring that both cities maintain the same ratio of increase for another ten years London will have a population of 1,650,788 in 1920 and New York will have 5,578,298. By the method the statistician puts London in second place in 1930 gives New York the pre-eminence of being the largest city in this whirling ball of fire.

The figures show London have 8,236,375 and give New York 9,078,051.

If New York's present population be added to that of adjacent cities as Jersey City, Newark, Hoboken, West Hoboken, Elizabeth, Orange, East Orange, N. J., Yonkers, New Rochelle, Mt. Vernon—all practical parts of New York city, each of which has a population of 100,000 or more, the American city would jump 5,764,860. With a 38 per cent in ten years to come would jump to 7,955,298 in 1920, eight at London's, and in 1930 New York claim 10,978,598 souls.

And if you don't help just wait until 1930 and years, if.

In the Wake of the Measles.
The little son of Mrs. Palmer, Little Rock, Ark., the measles. The result, severe cough which grew and he could not sleep. S. "One bottle of Foley's and Tar Compound cured him and he has not bothered since." Croup, yield to Foley's Honey Compound. The genuine yellow package allows substitutes. W. H. Ellis

SHALL KEEP UP FIGHT SAYS MRS. C. W.
New York. May Charles W. Morse, former banker whose pardon was denied last President Taft, left tonight for Atlanta. S. to stay there for some ing up her residence in borhood of the federal and consulting as her possible with her h regarding her next action.
"I shall keep up the out fighting," she the midst of her pre departure.
"I have not decided get up another per course, I am in a po now the application for don't clemency i 1913."

Do You Have the Right Help.
Foley Kidney Pills the right kind of help and remove the cause backache, bladder, and other "vicious ailments." Co.

Admission Before Senate Committee.

Washington, May 26.—Under a cross-examination conducted by Senators Stone and Williams, Arthur C. Hastings, president of the American Paper and Publishing Association, admitted today before the senate finance committee at their hearing that the organization was formed for the purpose of fixing the price of print paper.

Mr. Hastings denied the statements made by John Norris, of the American Newspaper Publishers Association, and declared they were not according to fact.

Sick headache results from disordered condition of the stomach, and can be cured by the use of Chamberlain's Stomach and Liver Tablets. Try it. For sale at all dealers.

WANT AD RECOVERERS
\$500.00 OF JEWELRY

Detroit, Mich., May 26.—A hand-satchel containing jewelry valued at \$500.00, lost in Jefferson Ave. two weeks ago, was stored today to Waldo A. Avery, a well known business man.

Anthony A. Selsky, a big man, who owned it in the middle of the street on which it was found.

Despite the fact that expert private detectives from Chicago and New York were hired by Avery, the restoration brought about by a lost found advertisement.

A reward of \$1,000 was offered by Avery and Selsky who receive this.

A schoolboy's composition Patrick Henry contained the following gem: "Patrick was a very bright boy. He had eyes and light hair. He had a good mind and then said, 'Give me liberty or give me death.'"

(Rochester Herald.)
 Marie Dressler is as famous for her epigrams as she is for her generosity. An actor at the house was recalling one of her justly famous remarks reported:
 Miss Dressler was invited by friends to a birthday party.
 "There'll be a birthday cake," "Suppose" some one remarked.
 "Yes, there be a cake," said Marie, was the reply.
 "And candles, of course?"
 "Went on the alleged with me," "My friend," said Marie.
 "Oh, this is to be a birthday party, not a torchlight procession."
 —
 Foley Kidney Pills are a medicine. They are strengthening, antiseptic, tonic. They act quickly on the kidneys.
 —
 "I tell you," said "I have nobody's fool."
 "Oh, well, never mind," said Miss Cynthia, "I have seen you some nice girl along and take you." Weekly.
 —
 "I tell you, Maria, makes some of the best marks I ever heard of."
 "Yes; I always said take much after you!"
 —
 Foley's Kidney Pills
 Quickly
 —
 M. N. George, Jr. was bothered with a ble for many years. He was persuaded to try Foley's, and before ten days I could feel its effects. The pain left kidney action clearer as no much better I ate to recommend "Remedy." W. H. E.

CHOSE DEATH ON DESERT TO LIFE IN SAN FRANCISCO.

San Francisco, May 26.—After wandering in the Mojave desert for nearly two days without food or water, Maria Ferrari, an Italian immigrant girl, today is safe at the home of her brother here. Terrified by the malicious stories of Italians she met on the journey from New York, she jumped from a Santa Fe train near Barstow, preferring to chance death on the blazing sands of the Mojave rather than face the terrible fate she pictured awaiting her in San Francisco.

Taking advantage of her ignorance of the language and American customs, Italian passengers on the train told her lurid and terrifying stories of American laws and customs, making her believe her brother, whom she was traveling to join, was angry at her coming without his permission, and would kill her.

When her absence was discovered, hours after she had left the train, a message was sent to the station agent at Barstow to search for her. The agent succeeded in finding her trail, but did not overtake her for over 24 hours. When found she was suffering from thirst and hunger and was completely exhausted.

DEATH OF LESLIE RUSHING.

The friends of Mr. and Mrs. P. N. Rushing, of the 44th district, will regret to learn of their losing one day last week. The cause of his death was typhoid fever. He was about one and a half years old at the time of his little son, Leslie, the death of whom, it was about eight years old at the time of his death.

NEW TOPICS OLD STYLE

By the suggestion of a friend, who is a drummer and sells goods at Statesboro, I came here to fit glasses to such eyes as may be in need of them, and I ask the public not to class me with common traveling great eye-doctors who know very little about the eyes, their refractive errors, or corrections, but come and give me a trial on your case, no matter how long it has failed to improve your vision. I make a specialty of all the aristocratic shapes in glasses and mountings, do my own cementing for bifocals, drilling and everything. Will be pleased to have you call on me at The Cash Camera.

Respectfully,
DR. H. H. ERWIN,
Optician and Optometrist.

Boilers For Sale.

Two steam boilers, second hand, but in first class condition, one forty horse power and one fifty horse power, with stacks to go with them, for sale. For further particulars apply to D. D. Arden, S. & S. Ry.

For Sale.
A one-half interest in Turpentine Still near Wilson, Ga. See HOMER C. PARKER, Trustee.

Cows Astray.

From my home, about March 1st, 1911, four head of cattle, one cow and calf, one pale red cow, butthead, swarthyback, one black yearling, white back, crop in one ear, hole in the other.

Money to Loan.

I will loan money on Farm Lands or on Improved City Property.

HOMER C. PARKER.

DWELLING BURNED.

On Monday a tenant house on the farm of Mr. Horace Hagins, in the 48th district, caught fire and was consumed. The origin of the fire was caused from a defective fire. The sparks from the burning building set the woods on fire and it was with difficulty that the property of the neighbors was saved.

FOLEY KIDNEY PILLS

FOR NEURALGIA, RHEUMATISM, GRAVEL AND BLINDNESS

CITY SCHOOLS TO CLOSE.

The commencement exercises of the Statesboro Institute came to a close last night, the exercises beginning on Sunday, when Dr. Talliaferro, pastor of the First Baptist church of Dublin, delivered the commencement sermon to a large and appreciative audience, one that packed the large auditorium to its full capacity. Dr. Talliaferro delivered a very able discourse and those who missed it missed a genuine treat. On Monday evening a musical recital was given by Miss Ruth Kennedy, the principal of the music department of the school. Again a large audience greeted and cheered the different selections.

The exercises came to a close Tuesday evening when the diplomas were awarded to the graduating class, of two young men and seven young women. After these diplomas were delivered Col. R. Lee Moore came on the stage and in a few well selected words presented to Prof. Mulloy and Miss Maude Atkins, assistant principal, two handsome presents from the graduating class.

Hon. Pleasant A. Stovall delivered the commencement address. A large audience filled the auditorium, notwithstanding the fact that the day had been a very busy one in town. Col. Stovall delivered one of the most eloquent literary discourses that has been heard here in some time. His address was well received and highly appreciated by all who heard it.

This morning the most of the faculty who live in other towns are departing for their homes. Prof. Mulloy, who goes to Tifton, will remain with us about one week more to close up his affairs here.

Notice—Shingle Mill for Sale.

One Trevor No. 1 shingle machine, one boiler, with two 48-inch inserted tooth saws, 48-inch butting saw outfit, two presses, rip machines, 30 h. p. Ames engine and boiler. G. M. Martin, two hundred and forty-three dollars and sixty-three cents. One on M. Joiner for thirty dollars and two cents. One on Moses Roe for twenty dollars and one cent. One on J. B. Kennedy for one hundred and forty-two dollars and twenty-one cents.

...

Any information as to their whereabouts will be rewarded.

W. L. STREET,
Statesboro, Ga.

PUBLIC BUILDING BILL INTRODUCED.

...

Congressman Chas. G. Edwards introduced a bill in the lower house of the National Congress on yesterday providing for an appropriation of seventy-five thousand dollars for the erection of a post office building in the city of Statesboro. The building is to be located on the site already secured by Congressman Edwards, and located on South Main street.

...

Mr. Edwards states that he has strong faith in the success of the bill, and while it may not get through during the present extra session yet he has got it on the way, under consideration, and will be in a position to push it when the regular session opens in December.

...

The importance of Statesboro demands a good public building, and it is believed that when Mr. Edwards brings the matter properly before the Appropriation Committee, as he will do, we will be included in the next general appropriation bill for public building purposes.

...

It has long been Mr. Edwards' ambition to build this structure in Statesboro. He has been telling us about it and he will stick to it until he gets it, this means we are going to win when Charlie Edwards gets what he has behind a proposition you can't find for something to happen.

...

Now is the time to paint your house. I have the Paint at right prices

THAT WAS WHY.

...

Two women previously unacquainted, were conversing at a reception. After a few conventional remarks, the younger exclaimed:

"I cannot think what has upset that tall blond man over there. He was so attentive a little while ago, but he won't look at me now."

..."Perhaps," the other said, "he saw me come in. He's my husband."

...

"It was Cervantes, was it not, who said: 'No man is born wise?'"

..."Perhaps it was, but women found it out long before Cervantes did."—Chicago Record-Herald.
