FARMER JONES BOUGHT NEW AUTOMOBILE

How he Learned to Drive the
Machine Before Trying it
Out on The Roads of His
Section.

Atlanta, July 15.—Farmer Ahasverus Jones, of Middle Georgia, came to Atlanta last week and bought an automobile of leading make and latest model. He bought it after the local agent had taken him to ride in it half a dozen times and explained to him all the details of operating it so he could begin using it as soon as he got home.

The agent also furnished a chauffeur who saw the car safely delivered to the farm.

Three days afterward the agent got the following letter from Farmer Jones:

"Dear Sir: I like my new car, but the differential is not working well. Please ship me a new differential gear at once."

This message, for more reasons than one, puzzled the agent. The differential, that queer lamp on the rear axle, is one of the mysterious parts of the automobile, familiar only to garage men and mechanics. The average automobile owner has never seen the inside of his differential box, and has only the vaguest idea of what is inside it.

For Farmer Jones to have got acquainted with his differential in so

short a time was almost as hard to believe as that anything could have got the matter with it so soon.

The agent supposed maybe his patron had merely got terms mixed, and wanted a spark plug or a monkey wrench. He wired and the slightest answer came, "I know exactly what a differential is and mine is wrong."

So down to the farm went the agent. He got there about 10 o'clock one morning. Nobody was in sight at the house, but out in the barn he heard the noise of a gin or a threshing machine in full operation. Astounded because it wasn't the season for cotton ginning or harvesting wheat, he went to the barn door and peeped in. No, it wasn't a gin; it wasn't a threshing machine; it was the automobile. Farmer Jones had jacked it clean off the floor, with all four wheels suspended in the air. Then he had cranked it up and climbed in and taken hold of the steering gear, opened wide the throttle and thrown in the clutch. The wheels were flying at great rate. Every minute or so Farmer Jones would turn an imaginary curve, and blow his horn at an imaginary pedestrian, retarding the spark when he came to an imaginary hill, just as the agent had taught him in Atlanta. He had been practicing that way for three days past. He did not intend to show himself to his neighbors, he said, until he had full control of the machine. "What was the matter with the differential?" Well the agent could see for himself how curious the wheels acted. Sometimes one went and sometimes the other, and sometimes they went in different directions.

The housewife says: "Our summer trip Won't cost us much this year; I've planned just how to save some coin."

Her husband says: "You dear!" "Yes," she replies, "we don't need much. For our vacation rest, I'll get but six new gowns while you Can have your oldest pressed."

Escaped With His Life.

"Twenty-one years ago I faced an awful death," writes H. B. Martin, Port Harrelson, S. C. "Doctors said I had consumption and the dreadful cough I had looked like it, sure enough. I tried everything. I could hear of, for my cough, and was under the treatment of the best doctor in Georgetown, S. C., for a year, but could get no relief. A friend advised me to try Dr. King's New Discovery. I did so, and was completely cured. I feel that I owe my life to this great throat and lung cure." Its positively guaranteed for coughs, colds, and all bronchial affections. 50c and \$1.00. Trial bottle free at W. H. Ellis Co.

The agent was a little sore. "I didn't tell you this car for a stationary monkey engine," he said. "Now you watch." So he lowered the car to terra firma, swung it around to the door, opened the throttle and out she swung as easily as you please, both hind wheels doing their work perfectly.

Farmer Jones is still wondering why they wouldn't do the same way when the car was jacked off the ground. The agent couldn't fully explain to him, for that's what makes the mystery of the differential.

BOOZE WAS SLACK IN CITY SATURDAY NIGHT.

One Dry Night in History of
Statesboro.

Saturday night was no doubt the driest night for some few Saturdays in the history of Statesboro, according to the story told by the thirsty crowd that generally wait for the Saturday express to arrive, when they may take their, or maybe more and enjoy their Sunday, the usual express came in Saturday, but when the boys called for their small package they were advised that there was nothing doing, no nothing doing in the line of booze this time because the express company absolutely refused to ship whiskey. This will cut the usual disturbances short that have heretofore been taking effect every Saturday night in the dark town district.

SURPRISE DINNER TO MRS. R. A. WOODRUM.

Brooklet, Ga., July 22, 1911.
Editor News, Statesboro, Ga.
The family and friends of Mrs. R. A. Woodrum, 62 years old, met at her home on the above date, and a surprise dinner was enjoyed under the shade of large china trees, about 15 miles from Statesboro. Many nice presents were presented. Twenty-seven children and grandchildren, and friends numbering about 100 were present. The day was much enjoyed by all present. We hope to enjoy many more such occasions.

B. E. CASSIDY DEAD, AT METTER, GA.

Mr. B. E. Cassidy, a prominent farmer of near Metter, Ga., died at his home Thursday after a short illness. Mr. Cassidy was about 55 years old and has been a resident of Bulloch for a number of years, and was considered one of the prominent farmers of the county. Mr. Cassidy was well known over the county and has a great number of friends that much regret to hear of his death. He leaves a family to mourn his death. His remains were interred in the cemetery at that place Friday.

REVIVAL SERVICES AT MACDONNELL CHURCH.

Revival services will be held at MacDonnell church, Hubert, Ga., beginning next Sunday. The pastor will be assisted by his brother, Rev. J. C. G. Brooks, of Ashburn, who is well and favorably known to many of the good people of this county, having assisted in a revival at New Hope two years ago. The general public is most cordially invited to attend these services.

BULLOCH ROADS ARE THE BEST IN STATE

Declares W. B. Blood, of
Kellogg's Toasted Corn
Flake Company.

In an interview with the News reporter, Mr. W. B. Blood, who has been in Statesboro for three or four days advertising Kellogg's Cornflakes, stated that he had traveled about three thousand miles over the roads of Georgia in this big advertising automobile truck and says that he has not found roads that would equal Bulloch's roads. He also says that the crops of this county are second to none, that better crops can be found in this county than any other county in the State.

Mr. Blood was very favorably impressed with Statesboro and Bulloch County and says that he will give us a good word wherever he goes.

Mr. Blood is traveling through every county in the state and to have such remarks made about our roads and crops shows that Bulloch stands out as the leader.

EXPERT FARMER OF CHATHAM COUNTY VISITS STATESBORO

Inspects The Big Canal and
The Agricultural School.

Bulloch County had quite a distinguished farmer visit her farms Wednesday. At an invitation of Manager Baco of the Savannah & Statesboro Railway, Prof. J. M. Johnson, the superintendent of that famous Model farm which the Savannah Chamber of Commerce is conducting, visited the big tract of land owned by the stock company of Statesboro and Bulloch county men and which is located at Tucker, 14 miles east and on the Savannah & Statesboro Railway. He was met at Ivanhoe by Mr. Baco, R. F. Donaldson, W. G. Raines, W. B. Martin, and Prof. E. C. J. Dickens of the Agricultural School and accompanied to the train and walked over the big 3300 acre farm and inspected the canal which Mr. Baco is digging with the big steam shovel.

Automobiles took the party from Arelia to Statesboro where dinner was waiting them at the Jaekel Hotel.

Talking to the News of the undertaking, Prof. Johnson was full of enthusiasm. He said: "That drainage movement is the biggest farm improvement in your county for years."

It is a pronounced success. That big ditch will absolutely dry that big tract to where it will be one of the finest farms in the county. It will teach your people and in fact the people of this vast section that these supposed low lands are in fact the best lands of the state. Much and lasting credit is due Manager Baco for his patient toils and skill in doing the surveying and carrying the work to successful termination. I regard it as the realization of Baco's dream. Some men doubtless looked upon it at one time as a vision, but you watch them now come to see in it a real and valuable lesson to farmers. The great holders of that big farm have a gold mine when that farm is developed. All they need to do is to put cash into it and develop the property."

Prof. Johnson is a member of the Board of Visitors of the State College of Agriculture and was once one of the professors of that great College. He naturally went to see our Agricultural school. Talking to the News he said: "I have heard so much of the success of your First District School that I wanted to see for myself. Indeed it is all that is said for it. I found that a busy bull. In the office Prof. Dickens has things in business shape like a bank, he knows just where the school stands at home and in the District. So great is that pile of application blanks for admission that it means a large student body. So he plans and Prof. Brown, the able Professor of Mechanics is directing in the building of a large new building for a dining room and dormitory. It will be a beauty and a great help to the school, but the thing which struck me is the farm. I walked over it from side to side, it is well laid out and splendidly cultivated. It shows the results of different fertilization and cultivation. Prof. Dickens, Prof. Harper (my old student whom I was glad to see doing such good work) and Mr. Barr the superintendent all seem to work in perfect harmony together, it is the best ordered crop I have seen. I have this to say, if Prof. Dickens and his faculty manages the school right

New Railroad Basket Picnic

Editor Statesboro News:

August 5th we will have a basket railroad picnic at the end of the railroad at the Waldburg Waters place. There and then we will vote on two lines, one to Claxton, and one to Pembroke, and proceed to build the one chosen. Parties of Statesboro, Brooklet, Claxton and Pembroke and intermediate sections who are interested in the railroad are invited to come with their families and enjoy the day. We will have speaking, band music, barbecue, and free rides over new railroad during the day. It will be practically decided that day whether the road will be extended to the Seaboard Railroad or to the Zetterwater timber, and go the opposite direction to Olives, the success or failure of that day will be an index of the intelligence, enterprise and progress of our people here, can we afford to put our heads under our wings and sleep until this opportunity has past and continue to live in remote exclusion without a railroad to give us advantages that our liberal and progressive neighbors enjoy, this is now a matter of our choice. We can act and have the road, or do nothing and let others have it. Which will we do? If people don't act and reach out they never get things. Of course

part of the institution as well as they do the farm, it is no wonder that the whole state looks upon this as the leading District Agricultural school of Georgia.

I thoroughly enjoyed my visit to your county, the big canal and the big school, the two are a great blessing to the already famous Bulloch county."

To operate a three gin system for upland cotton. A man with some force and one who takes hold and don't mind work. If this kind of a man has only worked around a system gin and can learn and wants to learn, I can use him.

Address: "THE GINS," care Statesboro News.

We have men who are void of intelligence, sympathy and enterprise and never help their neighbors, and we always have some of that kind, but I appeal to the intelligent element of our community, who live for the pleasure and happiness of their neighbors as well as their own, to come over and help to secure the greatest and most important need of our country, the new railroad. We may never have an opportunity again offered to us. Will we show our appreciation of this opportunity to have equal advantages of others by having a railroad.

NOW FOR THE RACE

We are not racing with the fellow that brings the first bale of new cotton, but we want to see if we cannot be in our new bank building before the first bale of new cotton arrives.

Premium \$5.00 for the first bale of new cotton.

Started With Nothing

From The Oklahoma City Times.

Dr. John T. M. Johnston, president of the National Reserve Bank, of Kansas City, at a recent meeting of the directors of that bank arose and asked that each one present who had begun business with a capital of \$10,000 stand up.

There were 25 directors of the bank in the room, and their wealth would aggregate about \$20,000,000. Not a man of the 25 arose.

Dr. Johnston then put another proposition. He said:

"Each man of you who had \$5,000 with which to begin business stand up."

The 25 directors looked around at each other, but not one of them stood up.

"Each of you who had \$1,000 stand up," persisted Dr. Johnston.

The directors looked at each other and laughed, but none of them arose.

Dr. Johnston kept putting the proposition, lowering the amount by \$100 each time, and when he got down to \$150 one of the directors stood up and said that was the amount of his capital when he began business.

The majority of the others began with a dollar.

Dr. Johnston himself, estimated to be worth well on toward a half million dollars, began his business career without even a pair of shoes.

Hives and Prickly Heat Relieved

Free!

Home and Mother

Two wonderful words! Fraught with untold meanings, yet, all too often ill-appreciated. The author of "Home Sweet Home" had no home. The longing of his lonely soul found voice in those appealing verses, and all the world sings them.

The following beautiful address comes quoted in one of our exchange. We take pleasure in passing it on to our readers.

"Home and mother! What tender associations are linked with home and mother! What pleasing memories and deep emotions it awakens! It calls up the fondest memories of life and opens in our nature the purest, deepest of consecrated thoughts and feelings. The father's and mother's love, the sisters' embrace, the brothers' welcome—wherever the heart wanders it carries the thought of home with it. The home is the foundation of civilization. The influence of home perpetuates itself. We cannot honor with too deep a reverence the home affections; we cannot cultivate them with too much solicitude. When the home affections are duly cultivated all others follow or grow out of them as a natural consequence. If we have fervent and noble affections such as give power to the human heart, such as make it supremely beautiful, let us cultivate all the feelings that originate as from a radiant point—in the home circle.

The home should be dedicated to love and truth, to all that is tender in feeling and noble in nature. The language of home should be such as would not stain the purest lips, nor fall harsh on the most refined ear. In the home where true courtesy prevails it seems to meet you on the threshold, a delightful atmosphere. What an enduring tenderness is the love of the mother to her child, a love that transcends all other affections. Now, let me say to the young man, when you have a home with a loving mother in it, speak kindly and even countenances and tenderly to her, for it is but a little while and you will see her no more. Others may love you when she has passed away, but never again, never while the time is yours shall the love of woman be to you, as that of your old trembling mother has been. Alas! How little do we appreciate a mother's tenderness while she is alive. But when she is gone, when the cares and coldness of the world comes withering to our hearts, when we experience how hard it is to find sympathy—then how how few love us for ourselves, how few will befriend us in misfortune. It is then we think of the home and mother we have lost. Who has stood at the grave of a mother and not remember her kind words? Years may pass, memory may prove treacherous, but impression once made by a mother's influence remains.

Too frequently the effect of prosperity is to render the heart cold and selfish; but the heart can never forget the memory of home and mother. Such a memory is a constant inspiration for good. In every proper sense in which home can be considered, it is a powerful stimulant to noble action and high and pure morality. So value is the love of home, that every man and woman should value it as he or she values his or her worth. Home is a little world in which the duties of the great world are daily rehearsed. But, ah, how the memory of home and mother will bring to the heart a thrill of joyful recollections, and thus inspire new courage to take up the burden of life.

BACK IN HARNESS.

Sunday morning and evening Bro. W. K. Dennis was again at his duties after an illness of several weeks, although weak and not able to stand he delivered two talks that went deep into his audience. Bro. Dennis' return will be welcomed by the Methodist church as well as the town at large and it is to be hoped that he will be able to fill his appointments hereafter.

Brother Dennis ranks among the leading ministers of the State, as soon as he is physically able to again be active the Methodist church of Statesboro will be the scene of some of the ablest sermons ever delivered in the State.

6000 VISITORS IN STATESBORO LAST MONTH.

How does this sound, something like 6000 people passed through the gates of Statesboro last month. There was something like 3000 registered at the Jackson Hotel and allowing 1000 at other hotels and boarding houses, with 2000 people that did not register at any hotel. This is going some for a town this size and if a boosting word would be said to every stranger that enters our town how would it be until Statesboro would be the talk of every stranger that comes here. He would go away and begin talking of Statesboro.

Once you get it and the people talking of our town you will soon see the results, and a little hot air is not costly, and goes a long ways.

Take a town of this size with 6000 people going and coming here each month, not including any big days, you can put it down in your pipe that this is going some. Statesboro has greater advantages than any town in this section and if we do not grasp them it is our own fault.

Next month we will give an actual count of all the visitors that come to town and register at the hotels, but in the mean time we want to ask that every citizen of Statesboro get the boosting habit and tell every stranger that sticks his head in our limits that we have the goods and we are going to have the greatest town in the world.

Get hot air properly going and it will bring better results than any remedy you can apply, mix her well and put it into every stranger that comes. You simply can't build a town unless you put plenty of hot stuff to the outsiders. After we get them here we can show them what we have then, it will be a different time. All we want is to get them here and then they will see what we have and be a citizen of Statesboro and Bulloch county.

PROGRESSIVE FARMING

Mr. Johnson of Savannah was in Statesboro this week and while here was driven over some of Bulloch's farming lands and remarked that "Bulloch county has the best crops I have seen this year."

This little remark, "Bulloch" means that it hit the spot. Bulloch has the goods. Our farmers are made of men that know how to till the soil and are putting forth efforts that will bring forth returns for many years to come.

The farming lands of Bulloch can produce greater yields than any county in the State of Georgia but we have a great amount of lands here that are not in cultivation which should be put up in small farms and advertised and bring good class of immigrants to our country.

We still have room for improvements and why not take advantage of same, advertise our lands and show what they produce. To do these things and do them properly we should have a farmers club, say a farmers ROOSTING CLUB. Get all the leading farmers of the county interested, also the farmers Union, meet and organize some Farmers Club and have this club for the benefit of better farming, other towns have Board of Trades and similar organization, then why shouldn't the Farmers come together and organize something that will be of benefit to them as well as to the merchants, doctors and any other business man.

We are anxious to see the farmers come closer together and are willing to do everything we possibly can to help this cause and would like to have several interesting articles on this subject from our farmers.

ELECTRIC CURE FEMALE ILLS, STOMACH, LIVER AND BILIOUSNESS

JOYS OF THE COMFORTER.

"Keep my commandments and I will stay with you, and I will send you another comforter; even the spirit of truth, whom the world cannot receive, neither knoweth; but you shall know him; for he shall dwell within you." Yes, we shall know Him. We shall feel His wonderful presence pervading our souls and converting our deepest sorrows into unspeakable joys. This is a privilege that is accorded only the living children of God; and what a privilege it is indeed, this privilege of shouting forth the glories and honors of the most high God.

There is a passage of Scripture which reads: "Know ye not that your body is the temple of God?" And so long as God abides in our bodies, we cannot help but praise His name. God's spirit is always a welcome visitor in the soul of man. It is joyfully received, for there is no other joy in which to receive it; it works good in whomsoever it dwelleth. In the preacher, it goes out in words of edification and comfort; in the layman in words of praise and supplication.

We find within the spirit of the Lord when He takes His abode in our souls; for the joy that He brings detracts us from all earthly things, and we care only to praise His just and holy name.

We, the living children of God, are blessed above the inhabitants of the earth in that we feel our sorrows changed into inexpressible joys by the presence of the Holy Ghost within our souls.

Christ is the one great healer in whom we may most confidently trust. He not only destroys the work of Satan in the soul of regenerate man; but He changes sorrow into joy, He draws us irresistibly into the sweet region of the love of God; and here in this region we magnify the Lord and feel the unfathomable depth of His joy.

ANTIS CLAIM TEXAS BY 10,000 MAJORITY.

Legislative Investigation and Report. Submission of Vote to the People Now Being Considered by Defeated Faction. Houston, Tex., July 21.—At 10 o'clock this morning Chairman Ball of the state-wide, concedes that the anti-prohibitionists will have a majority not exceeding 5,000 on the face of the returns. He claims frauds have been practiced, and will resort to the courts. Legislative investigation and re-submission vote to the people are under consideration.

At 10 o'clock this morning Chairman Walters, of the anti-prohibitionists, says the returns up to that hour indicated that the majority for anti-prohibition would be slightly above 10,000. After 36 hours of ballot counting, the "wets" maintain a slender lead of hardly more than 5,000 in unofficial returns. Unless the vote yet to come is different in favor from that up to the present time, the remaining ballots cannot swing the election to the "drys." This morning's returns while meager, showed a slight continued advantage for the liquor supporters.

The boxes yet to be heard from are mostly in sparsely settled sections, remote from wire, rail or even automobile communication. They are both prohibition and anti-prohibition territory.

The hope of the prohibitionists that these missing returns would wipe out the anti-prohibition lead was almost gone by eleven o'clock today, and only a clever surprise in their favor than has yet occurred in the long count can revive their predictions of success.

SMITH TO TABLE W. & A. PROBLEM.

Atlanta, July 21.—It is announced today that Gov. Hoke Smith proposes to take hold of the alleged violation by the Nashville, Chattanooga and St. Louis Railroad of its lease contract of the Western & Atlantic, and take steps to force compliance.

It is claimed the lease requires that the Western and Atlantic shall not charge more in proportion for a haul between Georgia points and Chattanooga. Beyond the limits of the state, than for hauls of the same distance within the state; but that consideration higher charges are made.

Former Governor Joseph M. Brown is now being attacked for failing to take steps against the lease, because just before leaving office he turned the matter over to the Railroad Commission, expressing the view that that body first should fix rates on the Western and Atlantic.

The attack is made, of course, incident to his prospective entry into the race for governor.

LAND DRAINING IN BULLOCH COUNTY

Prof. Johnson Returns Enthusiastic After Inspection of Arcola's Three Mile Ditch.

Draining 9,000 acres of rich farming lands in Bulloch county, D. N. Baot, superintendent of the Savannah and Statesboro Railroad, and his associates in a land developing company, have constructed a ditch or canal nearly three miles at Arcola.

Prof. James M. Johnson, director of the Model Farm, at the special request of Mr. Baot, paid a visit to this scene of land reclamation yesterday and returned highly enthusiastic at the progress in approved drainage that has been made there.

According to Prof. Johnson's estimates by the draining of these 9,000 acres of rich and naturally fertile soil, suitable for general farming and trucking, as well as for cotton growing, 150 farms have been reclaimed that will repay any and all expenditures in time and money that may be laid out in their cultivation.

"Mr. Baot and his associates in the land company at Arcola have between 8,000 and 9,000 acres of land which they are developing for farming and colonization purposes. Prof. Johnson said: 'The land lies on either side of the Savannah and Statesboro Railroad, thirteen miles southeast of Statesboro. It is flat and almost perfectly level. So level that there is considerable portion on which there is no natural drainage to

make it safe for agricultural purposes. Some two years ago Mr. Baot began a careful survey of the land to ascertain the level, the ponds and the natural slope. From a superficial point of view it seemed that the land offered but little opportunity for drainage, natural or artificial. But when the engineer's level had been put on the land a slope varying from three to ten feet a mile in a certain direction was found.

"Mr. Baot next ascertained that practically every pond could be tapped by a main ditch gradually ascending the slope. Having these facts at hand he mapped out the exact course that this ditch or canal should follow. He then encountered the difficulties of having to cross the lands of other parties. However, not to be thwarted in the good work, he purchased outright one tract in order that he might control the main outlet of the canal. He was also able to interest the other owners whose land had to be crossed to him the right of way and contributed somewhat to the defraying of the expenses of opening a ditch across their own lands.

"At present Mr. Baot and his land company have nearly two miles completed and opened. The ditch varies in depth from one foot at the shallowest point to ten feet or more at the deepest places. It also varies in width at the top from 25 feet at the widest point to perhaps 15 feet at the narrowest part and will average from 16 to 18 feet. At the bottom it is about 3 feet in width.

"Three-quarters of a mile is yet to be excavated. The work of excavation is progressing at the rate of 100 feet a day. In all there will be something like 40,000 cubic yards of dirt handled in making this ditch. It will cost between 4 and 6 cents a cubic yard for the excavation.

"With a set of laterals which may be easily laid out and cheaply constructed as occasion may warrant, this work will transform the entire 9,000 acres owned by the company and the between 600 and 800 acres owned by other people from a section that formerly was but poorly suited to agricultural purposes into one of the most desirable and easily tilled districts in the whole South.

"The soil is similar in all essential respects to that in many parts of the coastal region. Naturally it is well suited when properly drained to practically all the farm crops grown in this climate. On a small field in this tract now under cultivation for the first time cotton is growing. The stalks are now shoulder high and by actual count they are bearing from 50 to 100 bolls apiece and in some cases as many as 125 bolls and give evidence of making a full weight bale per acre.

"Just down a narrow roadway from this tract is a field of corn in which are many stalks averaging two ears apiece. This field is good for from 10 to 50 bushels per acre and this the first year after the land has been put under cultivation.

"Big strawberry industry plan and will be developed at this point within the next few years. Other fruits, such as figs, pears, and grapes, are now growing at certain spots in this vicinity. The regular trucking crops such as potatoes, beans, lettuce and others of those valuable crops will be at home in this soil.

"Mr. Baot is the pioneer in this work. He is a hustler in any business he undertakes and from what people who know him say of him the success of an enterprise is practically assured when placed in his hands. The ditch is Mr. Baot's vision realized. Members of his company speak only in praise of his work and do not hesitate to say he is the father of the enterprise.

"When the ditch is completed and a few laterals have been opened in the lower and flatter places, the general water level in the district drained will be lowered from three to five feet, or 1 foot more than the flat piece of land will say that the flat piece of land will be raised that much higher. Nine thousand acres of land will be made suitable for dwelling places for white people. Room will be made for 150 to 160 farmers on lands that are naturally fertile enough to guarantee good returns for all labor and expense put out on them in their cultivation. Not only this, but the enterprise being in the nature of a pioneer work will serve as an object lesson for the whole South."

"Morning News."

"Perhaps of more importance though is the adaptability of the land to some of the trucking crops. The soil in physical qualities is practically identical with those in the Chatham strawberry district of North Carolina. Doubtless a

by all dealers.

VOL. 11, No. 41.

ATTORNEY COOPER IN BEHALF RAWLINGS BOYS

The first step in another effort to have the three Rawlings boys Jesse, Leonard and Milton, pardoned from the penitentiary was taken Monday, when attorney John Randolph Cooper, who made the noted fight to save the elder Rawlings from the gallows, filed an application with the prison commission and had a conference with Governor Smith.

It is probable that no action will be taken on the application for pardon until Judge Patterson the third member of the prison commission, is able to be present at the hearing. At present he is confined to his home at Griffin by illness.

Since Attorney Cooper filed his former application in behalf of these boys, the complexion of the prison commission has changed and Governor Brown has been succeeded by Governor Smith.

Loss of Time Means Loss of Pay.

Kidney trouble and the ills it breeds means lost time and lost pay to many a working man. M. H. Hent, 1214 Little Pema St., Stratter, Ill., was so bad from kidney and bladder trouble that he could not work, but he says: "I took Foley Kidney Pills for only a short time and got entirely well and was soon able to go back to work, and am feeling well and healthier than before." Foley Kidney Pills are tonic in action, quick in results—a good friend to the working man or woman who suffers from kidney ills.

PULASKI BANK.

Bank Examiner T. J. Denmark is in Statesboro, having just returned from an examination of the Citizens' Bank of Pulaski. Mr. Denmark declined to give a statement, but it is understood from reliable authority that the condition of the bank is not what has been currently reported.

It appears that the bank had made a larger number of loans than the current funds on hand would justify and also that a considerable amount of overdrafts had been allowed by the cashier. This exhausted the working capital of the bank and for the present the bank is closed.

But we understand that the loans and overdrafts are good and that in a very short while business will be resumed. There are ample assets to cover all the indebtedness of the bank and pay off all the depositors. We also understand that the assets are considered ample to cover the capital stock, so that no one will suffer loss.

A. M. Reese, from Savannah, has been employed as cashier and just as soon as the books can be straightened out the bank will be opened for business again. The officers and directors are all men of good standing, personally and financially and it is their purpose to protect all their depositors against loss and to have the bank opened again in a very short while.

Foley Kidney Pills will check the progress of your kidney and bladder trouble and heal by removing the cause. Try them.

TO BATTLE AGAINST A COMMON DISEASE.

An Expert on Hook Worms Is Now in County for That Purpose.

(Savannah Georgian.) It will be recalled by our readers that John D. Rockefeller, a few years ago gave a million dollars, the income of which is to be used to inform the people about and encourage the eradication of the hook worm in the South. The prevalence of the hook worm has long been known, but it is only in the last few years that even physicians have recognized how extensively this little pest has impaired the health of the youth in many sections of the South. It has been found, however, that perhaps no other one thing causes as much poor health among white children.

Under the plan of the commission in charge of this work a certain number of men are assigned to each state, to lecture on the bad effects of hook worm and various phases of sanitation and hygiene and to make examinations to see whether individuals are infected.

More people, men and women, are suffering from kidney and bladder trouble than ever before, and each year more of them turn for quick relief and permanent benefit to Foley's Kidney Remedy, which has proven itself to be one of the most effective remedies for kidney and bladder ailments, the medical science has devised.

THOSE WHO CAN VOTE IN THE SPECIAL PRIMARY

An interesting question is agitating the minds of many of the best lawyers in Georgia, and that question concerns the qualifications of voters who may desire to vote in the primary election at which Governor Smith's successor will be chosen, providing the primary is not held until after January.

The law appears to be very clear on the subject of special elections that may be held during the same year the regular election is held or during the succeeding year, but in this instance, if the gubernatorial primary is held in January or February it will be in the second year after the general election.

Prominent attorneys agree that there is nothing ambiguous about the poll tax requirements. Those who may vote are those who have paid all taxes due at least six months before the election, except when the election is held within six months from the expiration of the time fixed by law for the payment of taxes.

The time fixed by law for the payment of taxes is between October 1st and December 20th. If the primary election is held during January or February of next year persons who have paid 1910 tax six months before the date of the primary will be qualified to vote, as far as the tax requirement is concerned, as six months before the primary date the 1911 tax would not be due.

But the registration question is one which has some of the lawyers wool-gathered. Representative Lawrence said that he had not had time to look up the law, but he heard the question discussed in Atlanta and there seemed to be a probability that the General Assembly may be called upon to amend the registration law.

The best law that could be found in the Georgia Code of 1911 applicable to the impending contingency is Sec. 61, page 24, under the head of "Additional Registration Law."

"Any person who has registered for any election occurring before the said next general elections, be listed and entitled to vote at such intermediate or general elections; and fifteen days before any intermediate or special election the said tax collectors shall file with the county registrars an accurate and complete list of all names signed in said voter's books since January 1, of that year, and not before filed with such registrars."

This section has been construed to mean that all voters who were registered for the last governor's election are qualified to vote in the approaching primary, provided they have paid all taxes due to six months prior to the date of the primary.

Thirty Years Together.

Thirty years of association—think of it. How the merit of a good thing stands out in that time—or the worthlessness of a bad one. So there's no guesswork in this evidence of Thos. Aris Concord, Mich., who writes: "I have used Dr. King's New Discovery for 30 years, and its the best cough and cold cure I ever used." Once it finds entrance in a house you can't pry it out. Many families have used it forty years. It's the most infallible throat and lung medicine on earth. Unequalled for fastness, asthma, hay-fever, croup, quins or sore lungs. Price 50c, 1.00. Trial bottle free. Guaranteed by W. H. Ellis Co.

NOW FOR THE RACE

We are not racing with the fellow that brings the first bale of new cotton, but we want to see if we cannot be in our new bank building before the first bale of new cotton arrives.

Premium \$5.00 for the first bale of new cotton.

Statesboro, Georgia.

COMMERCIAL DEPARTMENT.

The trustees have decided to add to the Statesboro Institute a commercial or business department, and have elected Prof. Frank M. Waters to the principalship of the department.

Prof. Waters was reared in this county and is a member of one of our leading families. Having first obtained a good literary education, he then prepared himself to teach the commercial courses, bookkeeping, typewriting, shorthand, etc., by a full course in one of the best business colleges in the country. He then taught in a college in Ohio, and for the past two years has been at the head of the bookkeeping department of Macon & Andrews Business College of Memphis, Tennessee, and his work there has been of a very high order.

With this valuable training and experience he will certainly make a success in Statesboro. There is no reason why our boys and girls must be sent away from home to obtain business training. We believe the trustees of the school have made a wise move in adding this department and in selecting Professor Waters as teacher. His rates will be very reasonable. He will offer a course in bookkeeping and a course in shorthand—the latter to include typewriting. He will also offer a combined course. Tuition for the combined course will be \$7.50 per month; for the single course \$5.00 per month. Commercial correspondence and penmanship included in all the courses.

A representative of Draughn's Business College was here last week with a proposition to the trustees to establish a branch of Draughn's college in connection with the school, but they elected Professor Waters instead. The fact that Draughn's college considers this a favorable location for a branch indicates the possibilities of such a department in our school.

In the interest of building up the school and increasing its sphere of usefulness, we urge our people to patronize the commercial department.

HE PUT OFF STARTING A BANK ACCOUNT

DON'T YOU

DON'T wait to start a bank account. Don't put it off, but start today; and then you'll have something to look forward to—something to depend upon—something working for you.
