### ***JUSTIFICATION:***

The student teaching fee was approved and implemented in Fall 2004 when the PSC capstone funds were cut. Since that time, all programs have significantly increased the formal assessment of all teacher candidates including student teachers. This has required the College of Education to put additional responsibilities on classroom teachers to help provide this additional documentation. After eight years we have determined that since we have increased teachers' work load for hosting a student teacher, we need to increase the small stipend that the teachers receive for this work by \$25 - from \$250 to \$275.
