To: Henderson Library, Acquisitions
From: Fredrick J. Rich, Chair 
Date: September 29, 1997
Subj: donation of publications

The Department of Geology and Geography wishes to turn over the accompanying publications on behalf of the family of the late Dr. Richard Petkewich. Dick had accumulated a great volume of literature during his years at GSU, and neither the family nor the department have a need for these things. Included here are several years' worth of Journal of Paleontology, the Bulletin of the American Association of Petroleum Geologists, field guides published by the Georgia Geological Society, and sundry other items. We hope that, if some or all of these items can be used to fill out collections already held by Henderson Library, they will be added to the library's holdings. On the other hand, you may wish to use these a trade materials for other institutions.

I would appreciate your sending an acknowledgment of this gift to the following son of Dr. Petkewich, as he has taken on the job of clearing out his father's office:

Mr. Mark Petkewich
914 Teepee Way
Statesboro, GA 30461

Thankyou.
