MEP Middle School Students Enjoy Summer Enrichment

Middle schoolers in the MEP program try out different tools for blowing bubbles.

Children of migrant workers often find themselves falling behind in school because of frequent moves. That's why the federally funded Migrant Education Program (MEP) was created. Georgia runs its MEP through the Department of Education.

For the first time, Georgia Southern University was host to a group of MEP middle schoolers from across the state who spent a week on campus in enrichment classes ranging from mathematics to leadership skills. Not

only was it a first for Georgia Southern, this summer's program was the first MEP for middle schoolers.

That's how COE's Katie Brkich found herself in a room with 20 sixth, seventh and eighth graders along with several interpreters, teaching mathematics and science/engineering. An assistant professor in Teaching & Learning with a special interest in migrant education and Latino/a science education, Brkich used hands-on explorations of human body proportional reasoning and data graphing for her mathematics class and ran a week-long investigation in the science of bubbles with her students for science/engineering. "While blowing bubbles may seem like child's play, it is actually the result of numerous scientific concepts and many applications of product and materials engineering working simultaneously," Brkich explained. Schools Partner with COE in Undergraduate Research Effort

Four Bulloch County schools are working with the College of Education on a grant that will give six undergraduate educator candidates hands-on research experience and help the partner schools evaluate their school improvement plans as it relates to outcomes for specific learners.

School representatives discuss COE's new undergraduate research project.

The project, Research to Practice, was funded this spring by the Office of Research Services and Sponsored Programs. Dr. Kimberley Drawdy,

CELS and First District RESA Host Leadership Academy

First District RESA and Georgia Southern University's Center for Educational Leadership and Service partnered to present the Summer Leadership Academy on June 24. The event for educational leaders throughout the FDRESA service area was held at the College of Education. The one day conference provided information and training sessions for school and system administrators to address the implementation of both the Common Core GPS Curriculum and the Teacher and Leader Keys Effectiveness Systems in Georgia. Over 150 school and system leaders attended.

Assistant Professor Jason LaFrance, director of CELS, said the academy is one of many collaborations he plans between COE and RESA designed to assist school districts in improving leadership within schools and ultimately increasing student performance. "I think the turnout is a clear indication that our school leaders are eager to get information and share their experiences. We're delighted to help facilitate that interaction," he said.

RESA's Director Whit Myers (r) looks over the day's program with Administrative Assistant Arlene Farmer.

Teaching & Learning, Dr. Meca Williams-Johnson, Curriculum, Foundations & Reading, and Mrs. Kathleen Tootle, Teaching & Learning, are the grant administrators. Stilson Elementary, Brooklet Elementary, Southeast Bulloch Middle School and Southeast Bulloch High School were approved to participate by Bulloch County School Superintendent Charles Wilson. [Click here for more information on the research project.](#)

Clinical Supervisors Attend "Camp"

More than 100 clinical supervisors and 20 College of Education faculty discussed best practices for mentoring teacher candidates at a day-long "camp" coordinated by COE's office of undergraduate teacher education. In addition to discussions on development of the teacher candidate and how to be a successful clinical supervisor, educators received updates from faculty and staff on edTPA, the recent NCATE accreditation review and advances in technology in the P-12 classroom.

"Clinical CAMP" (Coaching, Assessing, Mentoring and Planning) is an annual event bringing together teachers from COE's 36 partner schools. These schools provide a wide range of field experiences and clinical practice sites for teacher candidates who spend nearly 1,000 hours practicing and refining their skills as teachers before graduating from Georgia Southern University and the College of Education.

Alumni News

1950-1959

William Edward Lewis ('52 B.S.) joined the military one month after graduating from Georgia Teachers College and spent his career working in military intelligence. He lives in Severna Park, MD.

1960-69

Jerry Wilcher ('68 B.S. Ed., Elementary Education) is retired and living in Macon. After graduating from Georgia Southern, he went on to earn two degrees from the University of Georgia and one from Augusta State.

1980-89

Lee Ann Roberts ('85 M.Ed., '80 B.S. Ed.) recently retired after teaching 33 years, 22 in Jeff Davis County and the last 11 in Tattnall. She now lives in Glenville.

1990-99

Brian Ronald Holt ('98 M.Ed., '97 B.S. Ed.) is the broadcast video production teacher and yearbook adviser at Worth County High School in Sylvester.
